Renascent Rationalism:

Renascent Rationalism Helier J. Robinson, 1975 Renascent Rationalism represents a new and provocative departure from the mostly barren currents of twentieth century philosophy The author enlisting the aid of theoretical science leads off from the tradition of Plato Descartes Spinoza Leibniz and Russell and then steps well beyond The result is a single integrated philosophical system resting in direct opposition to the contemporary positions of analysis empiricism pragmatism existentialism and phenomenology There are four major effects of Helier Robinson's acceptance of the Leibniz Russell theory of perception as his base all the philosophic problems of perception are solved a whole new philosophy of science develops an entirely new theory of mind emerges and some startling theological and ethical consequences ensue The art of metaphysical speculation is thus revived Renascent Rationalism offers a clear if controversial alternative to the dominating influence of Hume and Kant and the resulting blind alleys of much modern philosophizing Publisher **Renascent Rationalism** Helier J. Robinson, 2008 LEVEL II in Helier J Robinson's PERENNIAL PHILOSOPHY SYSTEM There are two major errors in our common sense understanding of perception Most people are not aware of these errors yet in order to develop a fully integrated world view it is crucial to understand them This book starts out with the problems of perception and their solution It then carries this understanding forward into a whole new set of ideas **Renascent Christianity** Martin Kellogg Schermerhorn, 1898 **Relation Philosophy of Mathematics, Science, and Mind** Helier J. Robinson, 2007-09 The Social Relations of Physics, Mysticism, and Mathematics S. Restivo, 2012-12-06 The problems I address in this book are among the least studied in the sociology of science and knowledge Part I is a critique of the claim that there are parallels between ancient mysticism and modern physics and a sociological analysis of this claim as a strategy in intellectual conflict This study must ultimately be rooted more firmly in a type of sociology of knowledge that is just now beginning to crystallize and which I discuss in Chapter 7 and a sociology of religion that is not so much unknown as underground and timid that is a non worshipful materialist sociology of religion My study of physics mysticism parallelism is a vehicle for exploring epistemic strategies I thus conclude Part I by sketching a materialist emancipatory epistemic strategy My conclusion brings together a number of ideas formulated by myself and others over the past several years but stops short of a systematic synthesis A more integrated and coherent model than what I can sketch here must wait on the results of research now in progress in the critical as opposed to apologetic or worshipful sociology of knowledge *The Renaissance and 17th Century Rationalism* Prof G H R Parkinson (Author), G.H.R. Parkinson, 2023-05-09 This fourth volume traces the history of Renaissance philosophy and seventeenth century rationalism covering Descartes and the birth of modern philosophy *The poetry of the Celtic races, and other studies [selected from the works of] E. Renan, tr., with intr. and notes by W.G. Hutchison* Joseph Ernest Renan, 1896 *Renascent India* H. C. E. Zacharias, 2023-02-14 First published in 1933 Renascent India aims to explain the how and why of the Indian problem and it really succeeds in explaining them by marshalling all the relevant facts of hundred

years from 1833 1932 The book represents inside knowledge and is written with real insight and sympathy from the Indian point of view H C E Zacharias makes available a mass of hitherto inaccessible material including two unpublished letters from the late Edwin S Montagu and his book constitutes a scholarly treatise almost the first reference book on the subject The narrative reads like a thrilling story and rivets the reader s attention from first to last This book is an important archival resource about the British India and will be of interest to scholars and researchers of colonial history Indian history British history and postcolonial studies The Oxford companion to philosophy Ted Honderich,1995 Entries on philosophers schools of thought subjects theories debates concepts practical issues **Plant Pathosystems** Raoul A. Robinson,2012-12-06

One of the points clearly stressed in the beginning of this book is that the essential feature of any dynamic system is change and that where there is change there may also be growth and evolution Plant breeding and plant protection have grown and evolved considerably during the past century they have also witnessed several important Hegelian changes This book by R A Robinson is just such a change in scientific thinking It is unique in presenting an entirely new insight to plant parasite relationships and in providing a practical guide for managing plant pathosystems for man s advantage in agriculture The author brings together for the first time in a holistic manner the various plant protection and breeding disciplines he analyses their past limitations and deficiencies and throws useful new light on the nature of parasitism From this he is able to gain a clear understanding of the functions of the various pathosystem components On the basis of this understanding he then proposes practical ways for using these components to achieve and maintain the type of balance which is the basis of survival in any evolutionary system including that of man himself All this is done in a lively and elegant manner using logic as the main driving force to elucidate and define entirely new concepts without obtruse mathematical or biochemical formulae

Science, Society, and Values Sal P. Restivo,1994 He has tried in his career and specifically in this volume to understand science without accepting the culture of science uncritically **The Ethical Society** William T. Carruthers,2021-08-19 How is it that we know we are headed for destruction as a species and yet are unable to effect the necessary changes needed for survival We know from history that our current thinking and values will not lead to a peaceful sustainable future It is more crucial now than ever that we learn to break the cycle so that we can create a global community that balances diversity and individuality with integration and harmony The answer lies in how we think We are trapped in social systems based on power structures designed to keep us divided in antagonistic and non viable behaviors We have divorced how we understand the world through science with how we find meaning in our lives through religion alienating us from the world and each other To overcome these challenges we need to focus our thinking on the global community by giving priority to universal ethical values With ethical priority we can shift power interests from a tribal to a human perspective and reconnect understanding with meaning We can reduce alienation and improve harmony around the world In *The Ethical Society* William Carruthers provides the roadmap for us to finally achieve that peaceful sustainable world **Red, Black, and Objective** Sal

Restivo,2016-04-08 Drawing on the empirical findings generated by researchers in science studies and adopting Kropotkin's concept of anarchism as one of the social sciences Red Black and Objective expounds and develops an anarchist account of science as a social construction and social institution Restivo's account is at once normative analytical organizational and policy oriented in particular with respect to education With attention to the social practices and discourse of science this book engages with the works of Feyerabend and Nietzsche as well as philosophers and historians of objectivity to ground an anarchistic sociology of science Marx and Durkheim figure prominently in this account as precursors of the contemporary science studies perspective on the perennial question What is science The result is an approach to understanding the science and society nexus that is at once an extension of Restivo's earlier work and a novel adaptation of the anarchist agenda Red Black and Objective is an exploration by one of the founders of the science studies movement of questions in theory practice values and policy As such it will appeal to those with interests in science and technology studies social theory and sociology and philosophy of science and technology **Advances in Design for Cross-Cultural Activities Part II** Denise M.

The Age of the Social Sal Restivo, 2018-06-12 The concept of society *sui generis* society as a level of reality which could be studied scientifically crystallized in the middle of the nineteenth century in Europe with the work of Durkheim Marx and Weber and today more than at any other period in history the idea of the social has gained a foothold in philosophy biology and neuroscience However this idea has emerged into prominence not through the historical or contemporary efforts of sociologists but mainly through the efforts of biologists and neuroscientists This book seeks to re-establish the credentials of sociology as the science of society While acknowledging the amalgamation of traditional disciplines into interdisciplinary and multidisciplinary networks of research and theory and championing interdisciplinarity in recognising the capacity of converging perspectives to yield more interesting general theories of social life the author defends disciplinarity in maintaining sociology's achievements as a discipline With chapters on the sociological world view imagining society the self love education mathematics and religion *The Age of the Social* re-states the importance of sociology as the source of robust ideas about the social in an age in which this notion has grown in importance As such it will appeal to scholars across the social sciences with interests in method and philosophy in the social disciplines
