 a researcher in Europe during her country's Workers Party era she kept reading that Africans should be repaid for

 an examination and revision of some of the main theses of Speech Act Theory in relation to the problem of ideology and  
 action guiding language Starting from the idea that linguistic philosophy must take into account how the social structure of  
 the linguistic community may influence and direct the way its language is used a critical method of analysis is proposed  
 developing Speech Act Theory in a way suitable for this purpose The main guideline of this proposal is the consideration that  
 a theory of action rather than a theory of meaning should be taken as central in the analysis of language The notion of  
 illocutionary force the problem of intentions and conventions in the constitution of speech acts the definition of context and  
 the classification of speech acts are then discussed Based on the conclusions of this discussion a pragmatic method for the  
 analysis of language is formulated      **New Complete Digest of the Decisions of the Supreme Court and the District
