**Language in Interaction** Inbal Arnon, Marisa Casillas, Chigusa Kurumada, Bruno Estigarribia, 2014-07-17 Understanding how communicative goals impact and drive the learning process has been a long standing issue in the field of language acquisition. Recent years have seen renewed interest in the social and pragmatic aspects of language learning, the way interaction shapes what and how children learn. In this volume we bring together researchers working on interaction in different domains to present a cohesive overview of ongoing interactional research. The studies address the diversity of the environments children learn in, the role of para linguistic information, the pragmatic forces driving language learning and the way communicative pressures impact language use and change. Using observational, empirical and computational findings, this volume highlights the effect of interpersonal communication on what children hear and what they learn. This anthology is inspired by and dedicated to Prof. Eve V. Clark, a pioneer in all matters related to language acquisition and a major force in establishing interaction and communication as crucial aspects of language learning.
