Administrative and Economic Science Research, Theory Yüksel Akay Ünvan, 2021-12-15. Administrative and Economic

Science Research Theory      **Women in Management** Alan T. Belasen, 2017-04-07 This book presents a realistic perspective on the paradoxes employees face when navigating work and personal responsibilities for career success. The author answers the critical question of how to achieve sustainable and rewarding work-life integration from a perspective of both and rather than either/or. While most books focus on a fragmented hyper-effective view of women and leadership, this book advances the need for an integrated approach. Its Competing Values Framework acts as an organizing model that aligns personal competency with organizational capability, helping readers to identify important leadership roles and competencies, break societal barriers, and choose the right set of behaviors to fit their personal and professional goals. In chapter text boxes, provide personal insight from real employees both entering and established in leadership positions, offering a varied perspective on the challenges and resolutions available to women in management. As men become more engaged with their families, they too will find this book a useful tool. Students in diversity management, women and management career development, leadership, and organizational behavior classes will benefit from this realistic and sustainable alternative to the have-it-all model.
