## **Mondrian The Art Of Destruction:**

*Mondrian* Carel Blotkamp, 2001 Piet Mondrian was one of the great pioneers of abstract art This book looks at the relationship between his paintings and his theories on art      **Mondrian's Philosophy of Visual Rhythm** Eiichi Tosaki, 2017-11-15 This volume investigates the meaning of visual rhythm through Piet Mondrian's unique approach to understanding rhythm in the compositional structure of painting drawing reference from philosophy aesthetics and Zen culture Its innovation lies in its reappraisal of a forgotten definition of rhythm as stasis or composition which can be traced back to ancient Greek thought This conception of rhythm the book argues can be demonstrated in terms of pictorial strategy through analysis of East Asian painting and calligraphy with which Greek thought on rhythm has identifiable commonalities The book demonstrates how these ideas about rhythm draw together various threads of intellectual development in the visual arts that cross disparate aesthetic cultural practices As an icon of early 20th Century Modernism Mondrian's neoplasticism is a serious painterly and philosophical achievement In his painting Mondrian was deeply influenced by Theosophy which took its influence from Eastern aesthetics particularly East Asian and Indian thought However Mondrian's approach to visual rhythm was so idiosyncratic that his contribution to studies of visual rhythm is often under recognized This volume shows that a close inspection of Mondrian's own writing thinking and painting has much to tell scholars about how to understand a long forgotten aspect of visual rhythm Rodin's famous criticism of photography athlete in motion is forever frozen can be applied to Muybridge's zoopraxiscope the Futurists rendition of stroboscopic images and Duchamp's *Nude Descending a Staircase* Through a comparative study between Mondrian's painting and these seminal works this volume initiates a new convention for the cognition of the surface of painting as visual rhythm Mondrian's simultaneous emphasis on the static and the rhythmic is hardly fodder for a publicist Eiichi Tosaki has taken on the challenge of elucidating Mondrian's theories of rhythm and particularly his conception of static rhythm The result is a tour de force that will forever alter the reader's encounter with the works of Mondrian Prof Kathleen Higgins      **Towards Universality** Richard Padovan, 2013-07-04 There is no shortage of books about Le Corbusier or Mies van der Rohe or De Stijl However this book considers them in relation to each other observing how a study of one can illuminate the works of the others Going beyond a superficial look at the end products of these architects this book examines the philosophical foundations of their work taking as its central theme the aim of universality as opposed to the individual and the particular Each of these three aimed at universality but for each this concept took on a different form The universality of De Stijl and artists like Van Doesburg and Mondrian resembled that of the universe itself it was boundless going beyond the limits of the canvas and seeking to abolish the wall as the boundary between interior and exterior space In contrast each of Le Corbusier's creations was a self contained universe within a clear frame while Mies fluctuated between these two perspectives      **De Stijl and Dutch Modernism** Michael White, 2003-09-20 The name De Stijl title of a magazine founded in the Netherlands in 1917 is now used to identify the abstract art and

functional architecture of its major contributors Mondrian Van Doesburg Van der Leek Oud Wils and Rietveld De Stijl achieved international acclaim by the end of the 1920s and its paintings buildings and furniture made fundamental contributions to the modern movement This book is the first to emphasize the local context of De Stijl and explore its relationship to the distinctive character of Dutch modernism It examines how the debates concerning abstraction in painting and spatiality in architecture were intimately connected to contemporary developments in the fields of urban planning advertising interior design and exhibition design The book describes the interaction between the world of mass culture and the fine arts

**Abstraction and the Classical Ideal, 1760-1920** Charles A. Cramer, 2006 This study traces an important but largely overlooked conception of abstraction in art from its roots in eighteenth century empirical epistemology to its application in the pursuit of ideal form from Joshua Reynolds to Piet Mondrian Theorized by Enlightenment philosophy as a means of discovering ideal essence by purging natural form of its accidental and contingent qualities abstraction was a major focus of philosophical scientific and aesthetic discourse for more than one hundred fifty years serving as the nucleus of fundamental debates about the philosophy of mind the relationship between the Ancients and the Moderns the nature of human racial and functional variety the nature of God's creative ideas the use of brushwork in painting the validity of abstraction in art and the visual appearance of ideal truth and beauty

The Affinity of Neoconcretism Mariola V. Alvarez, 2023-03-07 The 1950s and early 1960s in Brazil gave birth to a period of incredible optimism and economic development In *The Affinity of Neoconcretism* Mariola V Alvarez argues that the neoconcretists a group of artists and poets working together in Rio de Janeiro from 1959 to 1961 formed an important part of this national transformation She maps the interactions of the neoconcretists and discusses how this network collaborated to challenge existing divides between high and low art and between fields such as fine art and dance This book reveals the way in which art and intellectual work in Brazil emerged from and within a local political and social context and out of the transnational movements of artists artworks published materials and ideas

**The Spiritual Dynamic in Modern Art** C. Spretnak,2014-10-22 This book demonstrates that numerous prominent artists in every period of the modern era were expressing spiritual interests when they created celebrated works of art This magisterial overview insightfully reveals the centrality of an often denied and misunderstood element in the cultural history of modern art *The Road from Eden* John Barber,2008 *Hélio Oiticica* Irene Small,2016-02-03 Hélio Oiticica 1937 80 was one of the most brilliant Brazilian artist of the 1960s and 1970s He was a forerunner of participatory art and his melding of geometric abstraction and bodily engagement has influenced contemporary artists This book examines Oiticica's impressive works against the backdrop of Brazil's dramatic postwar push for modernization **Architecture Post Mortem** Donald Kunze,David Bertolini,Simone Brott,2016-04-15 Architecture Post Mortem surveys architecture's encounter with death decline and ruination following late capitalism As the world moves closer to an economic abyss that many perceive to be the death of capital contraction and crisis are no longer mere phases of normal market fluctuations but rather the irruption of the unconscious of ideology itself Post mortem is that historical moment wherein architecture's symbolic contract with capital is put on stage naked to all Architecture is not irrelevant to fiscal and political contagion as is commonly believed it is the victim and penetrating analytical agent of the current crisis As the very apparatus for modernity's guilt and unfulfilled drives modernity's debt architecture is that ideological element that functions as a master signifier of its own destruction ordering all other signifiers and modes of signification beneath it It is under these conditions that architecture theory has retreated to an Alamo of history a final desert outpost where history has been asked to transcend itself For architecture's hoped for utopia always involves an apocalypse This timely collection of essays reformulates architecture's relation to modernity via the operational death drive architecture is but a passage between life and death This collection includes essays by Kazi K Ashraf David Bertolini Simone Brott Peggy Deamer Didem Ekici Paul Emmons Donald Kunze Todd McGowan Gevork Hartoonian Nadir Lahiji Erika Naginski and Dennis Maher Water and Art David Clarke,2012-01-01 Restless protean fluid evanescent despite being a challenge to represent visually water has gained a striking significance in

the art of the twentieth century This may be due to the fact that it allows for a range of metaphorical meanings many of which are particularly appropriate to the modern age Water is not merely a subject of contemporary art but also a material increasingly used in art making giving it a distinct dual presence Water and Art probes the ways in which water has gained an unprecedented prominence in modern Western art and seeks to draw connections to its depiction in earlier art forms David Clarke looks across cultures finding parallels within contemporary Chinese art which draws on a cultural tradition in which water has an essential presence and is used as both a subject and a medium The book features a wealth of images by artists from East and West including Fu Baoshi Shi Tao Wei Zixi Fang Rending Leonardo da Vinci Bernini Turner Gericault Klee Matisse Monet Picasso Mondrian and Kandinsky Fast paced accessible and comprehensive Water and Art will appeal to the specialist and the general reader alike offering fresh perspectives on familiar artists as well as an introduction to others who are less well known

**Paradata and Transparency in Virtual Heritage** Anna Bentkowska-Kafel, Hugh Denard, 2016-05-13 Computer Generated Images CGIs are widely used and accepted in the world of entertainment but the use of the very same visualization techniques in academic research in the Arts and Humanities remains controversial The techniques and conceptual perspectives on heritage visualization are a subject of an ongoing interdisciplinary debate By demonstrating scholarly excellence and best technical practice in this area this volume is concerned with the challenge of providing intellectual transparency and accountability in visualization based historical research Addressing a range of cognitive and technological challenges the authors make a strong case for a wider recognition of three dimensional visualization as a constructive intellectual process and valid methodology for historical research and its communication Intellectual transparency of visualization based research the pervading theme of this volume is addressed from different perspectives reflecting the theory and practice of respective disciplines The contributors

archaeologists cultural historians computer scientists and ICT practitioners emphasize the importance of reliable tools in particular documenting the process of interpretation of historical material and hypotheses that arise in the course of research The discussion of this issue refers to all aspects of the intellectual content of visualization and is centred around the concept of paradata Paradata document interpretative processes so that a degree of reliability of visualization outcomes can be understood The disadvantages of not providing this kind of intellectual transparency in the communication of historical content may result in visual products that only convey a small percentage of the knowledge that they embody thus making research findings not susceptible to peer review and rendering them closed to further discussion It is argued therefore that paradata should be recorded alongside more tangible outcomes of research preferably as an integral part of virtual models and sustained beyond the life span of the technology that underpins visualization 2021 Günter Berghaus, Monica

Jansen, Luca Somigli, 2022-01-19 This volume explores the fraught relationship between Futurism and the Sacred Like many fin de siècle intellectuals the Futurists were fascinated by various forms of esotericism such as theosophy and spiritualism and saw art as a privileged means to access states of being beyond the surface of the mundane world At the same time they viewed with suspicion organized religions as social institutions hindering modernization and ironically used their symbols In Italy the theorization of Futurist Sacred Art in the 1930s began a new period of dialogue between Futurism and the Catholic Church The essays in the volume span the history of Futurism from 1909 to 1944 and consider its different configurations across different disciplines and geographical locations from Polish and Spanish literature to Italian art and American music
