Mary Tompkins Lewis, 2007 The essays in this wide ranging text capture the theoretical range and scholarly rigor of criticism that has fundamentally transformed the study of French Impressionist and Post Impressionist art *Paintings and the Past* Ivan Gaskell, 2019-05-13 This book is an exploration of how art specifically paintings in the European manner can be mobilized to make knowledge claims about the past No type of human made tangible thing makes more complex and bewildering demands in this respect than paintings Ivan Gaskell argues that the search for pictorial meaning in paintings yields limited results and should be replaced by attempts to define the point of such things which is cumulative and ever subject to change He shows that while it is not possible to define what art is other than being an open kind it is possible to define what a painting is as a species of drawing regardless of whether that painting is an artwork or not at any given time The book demonstrates that things can be artworks on some occasions but not necessarily on others though it is easier for a thing to acquire artwork status than to lose it That is the movement of a thing into and out of the artworld is not symmetrical All such considerations are properly matters not of ontology what is and what is not an artwork but of use that is how a thing might or might not function as an artwork under any given circumstances These considerations necessarily affect the approach to paintings that at any given time might be able to function as an artwork or might not be able to function as such Only by taking these factors into account can anyone make viable knowledge about the past This lively discussion ranges over innumerable examples of paintings from Rembrandt to Rothko as well as plenty of far less familiar material from

contemporary Catholic devotional works to the Chinese avant garde Its aim is to enhance philosophical acuity in respect of the analysis of paintings and to increase their amenability to philosophically satisfying historical use Paintings and the Past is a must read for all advanced students and scholars concerned with philosophy of art aesthetics historical method and art history

*Riverscapes and National Identities* Tricia

Cusack,2010-03-02 Painted riverscapes such as Claude Monet s impressions of the Seine Isaak Levitan s Volga views or Thomas Cole s Hudson scenery became iconic not least because they embodied nationalist ideas about place and about culture At a time when nationalism was taking root across Europe and the United States the riverscape played an important role in transforming the abstract idea of the nation into a potent visual image It not only offered a picture of the nation s physical character but through aspects such as style the figures portrayed and the nature of the implied spectator it presented a cultural ideal In this highly original book Tricia Cusack explores significance of painted riverscapes to the creation of national identities in nineteenth and early twentieth century Europe and America Focusing on five rivers the Hudson the Volga the Seine the Thames and the Shannon the author outlines the history of the development of national landscapes elaborating on the distinctive nature of riverscapes Drawing on the symbolic potential of rivers to represent life and time the riverscape provided a metaphor for the mythic stream of national history flowing unimpeded out of the past and into the future

*Cleansing the City* Michelle Elizabeth Allen,2008 *Cleansing the City* Sanitary Geographies in Victorian London explores not only the challenges faced by reformers as they strove to clean up an increasingly filthy city but the resistance to their efforts Beginning in the 1830s reform minded citizens under the banner of sanitary improvement plunged into London s dark and dirty spaces and returned with the material they needed to promote public health legislation and magnificent projects of sanitary engineering Sanitary reform however was not always met with unqualified enthusiasm While some improvements such as slum clearances the development of sewerage and the embankment of the Thames may have made London a cleaner place to live these projects also destroyed and reshaped the built environment and in doing so altered the meanings and experiences of the city From the novels of Charles Dickens and George Gissing to anonymous magazine articles and pamphlets resistance to reform found expression in the nostalgic appreciation of a threatened urban landscape and anxiety about domestic autonomy in an era of networked sanitary services *Cleansing the City* emphasizes the disruptions and disorientation occasioned by purification a process we are generally inclined to see as positive By recovering these sometimes oppositional sometimes ambivalent responses Michelle Allen elevates a significant undercurrent of Victorian thought into the mainstream and thus provides insight into the contested nature of sanitary modernization
