**The Rise and Fall of a Public Debt Market in 16th-Century China** Wing-kin Puk, 2015-11-16 During the Ming dynasty 1368 1644 the

government invited merchants to deliver grain in return for salt certificates with which merchants drew salt as reward. The salt certificate therefore represented a national debt denominated in salt; the government thereby owed merchants. A speculative market of salt certificates was created in Yangzhou and brought into being powerful financiers in the early 17th century. The government financially hard pressed abolished the speculative market of salt certificates by franchising these financiers in return for their hereditary obligation to pay salt certificate surcharge. China was therefore deprived of a possibility to develop a public debt market. This story is a testimony to Fernand Braudel's argument of the nondevelopment of Capitalism in China.

*When Money Changes Society* Giacomo Bazzani, 2020-05-09. Classical sociology considered money as central to the functioning of modern society relating it to a progressive expansion of instrumental rationality and the emergence of weaker social ties. Modern money, the universal equivalent described by Simmel facilitates the exchange of goods and values by providing a single unit of account. This frees people and things from traditional social ties and makes them free to sell their work and trade goods on markets that increasingly erode national borders. Modern money thus frees the individual from traditional social ties and facilitates the creation of ever larger and more inter connected markets. Sardex money on the other hand seems to work in the opposite direction: the weak social ties of ordinary economic transactions are replaced by strong ones characterised by a high level of reciprocity and by an ethical code. Furthermore the movement of goods is restricted to the regional level and much is done to promote economic exchanges between member companies.

**The History of Bankruptcy** Thomas Max Safley, 2013-01-17. This volume takes up bankruptcy in early modern Europe when its frequency made it not only an economic problem but a personal tragedy and a social evil. Using legal business and personal records the essays in this volume examine the impact of failure on business organizations and practices, capital formation and circulation, economic institutions and ethics and human networks and relations in the so called transition to modern society from the early sixteenth to the early nineteenth century. One group of essays concentrates on the German speaking world and shows a common concern for the microeconomics of bankruptcy that is for such issues as the structure of the firm, the nature of its capital and the practices of its partners especially their assessment of risk. Another group of essays shifts the focus from Central to Western and Northern Europe and away from the microeconomics of the early modern firm to an institutional consideration of bankruptcy. The final group of essays turns to Southern Europe especially the Mediterranean basin to assess bankruptcy not as an unfortunate result of crisis but as an intentional response to crisis. All of the contributions are the result of original research; many of the scholars

publish in English for the first time All of the chapters are founded on close archival research offering insights not only into business organization and practice but also into social and cultural aspects of economic life from the late sixteenth to the early nineteenth century

**Fear and Fortune** Mette M. High, 2017-05-09 Mongolia over the last decade has seen a substantial and ongoing gold rush The widespread mining of gold looks at first glance to be a blessing for a desperately poor and largely pastoralist country where people's lives were disrupted by the end of the USSR and tens of millions of livestock were killed in devastating droughts in the early 2000s Volatility and uncertainty as well as political and economic turmoil led many people to join the hopeful search for gold This activity born out of uncertain times poses an intense moral problem in the land of dust disturbing the ground and extracting the precious metal is widely believed to have calamitous consequences With gold retaining strong ties to the landscape and its many spirit beings the fortune of the precious metal is inseparable from the fears that surround mining Tracing the continuities and discontinuities between human and nonhuman worlds Mette M High follows the paths of gold as it is excavated and converted into polluted money entering local shops and Buddhist monasteries joining the illegal gold trade and returning as renewed money for the big bosses of the gold mines High has done several years of fieldwork in Mongolia spending time with the ninjas as the miners are known locally as well as the people who disapprove of their illegal activities and warn of the retribution that the land and its inhabitants may suffer as a result This book is about radical change or as many Mongolians put it when life becomes strange and chaotic High has gained a deep understanding of the processes by which Mongolians square a morally questionable activity with the lure of profit How do they involve themselves with tainted sources of money and can it ever be cleansed and made usable Addressing how our lives and those of others are intimately intertwined Fear and Fortune offers an expansive and capacious approach to understanding the high stakes involved in human economic life

**Iron and Blood** Peter H. Wilson, 2023-02-14 From the author of the acclaimed The Thirty Years War and Heart of Europe a masterful landmark reappraisal of German military history and of the preconceptions about German militarism since before the rise of Prussia and the world wars German military history is typically viewed as an inexorable march to the rise of Prussia and the two world wars the road paved by militarism and the result a specifically German way of war Peter Wilson challenges this narrative Looking beyond Prussia to German speaking Europe across the last five centuries Wilson finds little unique or preordained in German militarism or warfighting Iron and Blood takes as its starting point the consolidation of the Holy Roman Empire which created new mechanisms for raising troops but also for resolving disputes diplomatically Both the empire and the Swiss Confederation were largely defensive in orientation while German participation in foreign wars was most often in partnership with allies The primary aggressor in Central Europe was not Prussia but the Austrian Habsburg monarchy yet Austria's strength owed much to its ability to secure allies Prussia meanwhile invested in militarization but maintained a part time army well into the nineteenth century Alongside Switzerland which relied on traditional militia both states exemplify the

longstanding civilian element within German military power Only after Prussia's unexpected victory over France in 1871 did Germans and outsiders come to believe in a German gift for warfare a special capacity for high speed high intensity combat that could overcome numerical disadvantage It took two world wars to expose the fallacy of German military genius Yet even today Wilson argues Germany's strategic position is misunderstood The country now seen as a bastion of peace spends heavily on defense in comparison to its peers and is deeply invested in less kinetic contemporary forms of coercive power
