Monitoring, Security, and Rescue Techniques in Multiagent Systems Barbara Dunin-Keplicz,Andrzej Jankowski,Marcin Szczuka,2005-01-14 In today s society the issue of security has become a crucial one This volume brings together contributions on the use of knowledge based technology in security applications by the world s leading researchers in the field *Monitoring, Security, and Rescue Techniques in Multiagent Systems* Barbara Dunin-Keplicz,Andrzej Jankowski,Marcin Szczuka,2006-08-13 In today s society the issue of security has become a crucial one The use of knowledge based technology in security applications emerges with important applications in monitoring control crisis and rescue management This volume contains extended and improved versions of selected contributions presented at the International Workshop Monitoring Security and Rescue Techniques in Multiagent Systems MSRAS 2004 held in Plock Poland June 7 9 2004 bringing together the world s leading researchers in the field Monitoring, security and rescue techniques in multiagent systems Andrzej Jankowski (informatyka),Andrzej Skowron,Marcin Szczuka,2004 Soft Methods for Integrated Uncertainty Modelling Jonathan Lawry,Enrique Miranda,Alberto Bugarin,Shoumei Li,Maria Angeles Gil,Przemyslaw Grzegorzewski,Olgierd Hryniewicz,2007-10-08 The idea of soft computing emerged in the early 1990s from the fuzzy systems c munity and refers to an understanding that the uncertainty imprecision and ig rance present in a problem should be explicitly represented and possibly even ploited rather than either eliminated or ignored in computations For instance Zadeh de ned Soft Computing as follows Soft computing differs from conventional hard computing in that unlike hard computing it is tolerant of imprecision uncertainty and partial truth In effect the role model for soft computing is the human mind Recently soft computing has to some extent become synonymous with a hybrid approach combining AI techniques including fuzzy systems neural networks and biologically inspired methods such as genetic algorithms Here however we adopt a more straightforward de nition consistent with the original concept Hence soft methods are understood as those uncertainty formalisms not part of mainstream s tistics and probability theory which have typically been developed within the AI and decisionanalysiscommunity Thesearemathematicallysounduncertaintymodelling methodologies which are complementary to conventional statistics and probability theory , Human-Centric Decision-Making Models for Social Sciences Peijun Guo,Witold Pedrycz,2013-11-01 The volume delivers a wealth of effective methods to deal with various types of uncertainty inherently existing in human centric decision problems It elaborates on comprehensive decision frameworks to handle different decision scenarios which help use effectively the explicit and tacit knowledge and intuition model perceptions and preferences in a more human oriented style The book presents original approaches and delivers new results on fundamentals and applications related to human centered decision making approaches to business economics and social systems Individual chapters cover multi criteria multiattribute decision making decision making with prospect theory decision making with incomplete probabilistic information granular models of decision making and decision making realized with the use of non

additive measures New emerging decision theories being presented as along with a wide spectrum of ongoing research make the book valuable to all interested in the field of advanced decision making The volume self contained in its nature offers a systematic exposure to the concepts design methodologies and detailed algorithms A prudent balance between the theoretical studies and applications makes the material suitable for researchers and graduate students in information computer sciences psychology cognitive science economics system engineering operation research and management science risk management public and social policy **New Frontiers in Scientific Discovery** Zdzisław Pawlak,2007 Zdzislaw Pawlak is a great scientist and a great human being This volume contains a short perspective on the life and work of Zdzislaw Pawlak It reflects the influence of a number of research initiatives by Pawlak in a whole range of research areas **Rule Systems Theory** Helena Flam,Marcus Carson,2008 Explaining the complexity of social life remains the central challenge of the social sciences This book offers a variety of theoretical empirical explorations and applications inspired by an important neo institutional approach to tackling this complexity the rule systems theory Its point of departure is the assumption that institutions and cultural formations possess causal powers and relative autonomy constraining and enabling people s social actions and interactions Structural and cultural properties of society are carried by transmitted and reformed by human agents whose interactions generate reproduce elaborate and transform structures The contributors are highly accomplished economists sociologists and political scientists who come from the US and several European countries The book is meant as a Festschrift for Tom Burns a central figure in the development of the rule systems theory **Transactions on Rough Sets XVI** James F. Peters,Andrzej Skowron,Sheela Ramanna,Zbigniew Suraj,Xin Wang,2013-01-29 The LNCS journal Transactions on Rough Sets is devoted to the entire spectrum of rough sets related issues from logical and mathematical foundations through all aspects of rough set theory and its applications such as data mining knowledge discovery and intelligent information processing to relations between rough sets and other approaches to uncertainty vagueness and incompleteness such as fuzzy sets and theory of evidence Volume XVI includes extensions of papers from the Rough Sets and Knowledge Technology Conference which was held in Banff Canada in October 2011 In addition this book contains a long paper based on a PhD thesis The papers cover both theory and applications of rough fuzzy and near sets They offer a continuation of a number of research streams which have grown out of the seminal work by Zdzislaw Pawlak during the first decade of the 21st century *Computer Recognition Systems 2* Marek Kurzynski,Edward Puchala,Michal Wozniak,Andrzej Zolnierek,2007-10-18 This book presents the results of the 5th International Conference on Computer Recognition Systems CORES 07 held 22 25 October 2007 in Hotel Tumski Wroclaw Poland It brings together original research results in both methodological issues and different application areas of pattern recognition The contributions cover all topics in pattern recognition including for example classification and interpretation of text video and voice **Innovations in Hybrid Intelligent Systems** Emilio Corchado,Juan Manuel Corchado Rodríguez,Ajith Abraham,2007-12-22 This carefully edited

book combines symbolic and sub symbolic techniques to construct more robust and reliable problem solving models This volume focused on Hybrid Artificial Intelligence Systems contains a collection of papers that were presented at the 2nd International Workshop on Hybrid Artificial Intelligence Systems held in 12 13 November 2007 Salamanca Spain
