Primates in Fragments Laura K. Marsh,2013-06-29 This volume was created initially from a symposium of the same name presented at the International Primatological Society s XVIII Congress in Adelaide South Australia 6 12 January 2000 Many of the authors who have contributed to this text could not attend the symposium so this has become another vehicle for the rapidly growing discipline of Fragmentation Science among primatologists Fragmentation has quickly become a field separate from general ecology which underscores the severity of the situation since we as a planet are rapidly losing habitat of all types to human disturbance Getting ecologists particularly primatologists to admit that they study in fragments is not easy In the field of primatology one studies many things but rarely do those things genetics behavior population dynamics get called out as studies in fragmentation For some reason fragmentation primatologists fear that our work is somehow not as good as those who study in continuous habitat We worry that perhaps our subjects are not demonstrating as robust behaviors as they should given fragmented or disturbed habitat conditions I had a colleague openly state that she did not work in fragmented forests that she merely studied behavior when it was clear that her study sites everyone of them was isolated habitat Our desire to be just another link in the data chain for wild primates is so strong that it makes us deny what kinds of habitats we are working in However **Baby Panda's Kids Puzzles** Navneet Singh, Chapter 1 Maze Adventures with Baby Panda Help Baby Panda find his way to the bamboo forest Insert a simple maze here with a clear start and finish Challenge Can you help Baby Panda reach the yummy bamboo at the end of the maze Chapter 2 Match the Animals Can you match the baby animal to its mom Draw a line between them Baby Panda Mom Panda Baby Elephant Mom Elephant Baby Tiger Mom Tiger Baby Monkey Mom Monkey Chapter 3 Spot the Difference Look at these two pictures of Baby Panda playing in the park Can you find 5 things that are different Insert two similar but slightly different images of Baby Panda playing Chapter 4 Riddle Time with Baby Panda I m thinking of something green tall and crunchy What am I Hint Baby Panda s favorite food Answer Bamboo Chapter 5 Counting Fun How many pandas do you see Count carefully Insert a picture with multiple pandas

We furthermore present three different mechanisms for interactive image retrieval by incorporating user feedback to resolve the inherent semantic ambiguity present in the query image One of the proposed methods reduces the required user feedback to a single click using clustering while another keeps the human in the loop by actively asking for feedback regarding those images which are expected to improve the relevance model the most The third method allows the user to select particularly interesting regions in images These techniques yield more relevant results after a few rounds of feedback which reduces the total amount of retrieved images the user needs to inspect to find relevant ones
