elements in our mythologies diets and scientific paradigms yet most species now face an uncertain future through exploitation for the pet and bushmeat trades as well as progressive habitat loss New information about disease transmission dietary and economic linkage and the continuing international focus on conservation and primate research have created a surge of interest in primates and focus on the diverse interaction of human and nonhuman primates has become an important component in primatological and ethnographic studies By examining the diverse and fascinating range of relationships between humans and other primates and how this plays a critical role in conservation practice and programs *Primates Face to Face* disseminates the information gained from the anthropological study of nonhuman primates to the wider academic and non academic world

Monkeys, Apes, and Humans Michael A. Huffman, Naofumi Nakagawa, Yasuhiro Go, Hiroo Imai, Masaki Tomonaga, 2012-10-19 This book introduces to the reader unfamiliar with primatology in Japan three research projects representative of the unique multidisciplinary approach carried out by scientists at Kyoto University the country's premier institution for primate studies The projects are all aimed at understanding the age old questions where did we come from and what makes us unique or similar to our primate ancestors The first chapter by Naofumi Nakagawa focuses on the cultural diversity of social behavior in the Japanese macaque This chapter reviews research on primate culture in particular the work on Japanese macaques then presents what is arguably the first example of a culturally transmitted social convention in the species called hug hug The second chapter by Michael A Huffman introduces our current knowledge of self medication in primates based largely on a long term study of wild chimpanzees at Kyoto University's longest ongoing chimpanzee field in Africa Mahale in Tanzania The suite of behavioral adaptations to parasite infections in chimpanzees is compared with our current knowledge of self medication in other primates and other animal species The third chapter by Yasuhiro Go Hiroo Imai and Masaki Tomonaga describes the ambitious efforts to combine cognitive science and genomics into a new discipline called comparative cognitive genomics This chapter provides an overview of recent advancements in chimpanzee comparative cognition the construction of a chimpanzee genomic database and comparative genomic studies at the individual level looking into factors affecting personality and individuality

Primate Ethnographies Karen B. Behavioral Primatology A. M. Schrier, 2013-11-26 First published in 1977 The volume of research on nonhuman primates has expanded tremendously during the past 20 years and researchers familiarity with them has increased correspondingly This series of volumes deals with scientific studies of the behavior of nonhuman primates apes monkeys and prosimians The behavior of these animals is of course of interest in its own right But then so is that of the many other orders

of animals Behavior of nonhuman primates is of special interest because these animals are more closely related to human beings structurally physiologically and beyond doubt behaviorally than are any other living animals
