Mierse, 2022-12-01

*Artifacts from the Ancient Silk Road* explores the interconnectivity of the Eurasian continent from 4000 BCE to 1000 CE. It focuses on the role played by Central Asia through which passed the major trade routes the Silk Roads. *Artifacts from the Ancient Silk Road* covers life along the Silk Road over 5000 years as it can be understood by considering objects. In this first object based study to consider all of the peoples involved on the Silk Roads, objects provide the vehicles for explorations of different aspects of life for the various peoples of the Silk Roads including the sedentary peoples who established urban life on the Silk Roads, the steppe nomads who regularly interacted with the settled peoples and the peoples at either end of the Silk Roads who drove certain kinds of economic exchanges. The book looks at Central Asia as an international zone during ancient times when multiple religious, political and technological ideas found acceptance in the region and allows for a better understanding of how some ideas and forms developed in Central Asia while others passed through or were modified.

**The Routledge Handbook of Archaeology and Globalization** Tamar Hodos, 2016-11-18. This unique collection applies globalization concepts to the discipline of archaeology using a wide range of global case studies from a group of international specialists. Each
