biostratigraphy paleoceanography and taxonomy of agglutinated foraminifera in Tübingen September 17-29 1989 was a direct outgrowth of two previous workshops on agglutinated foraminifera held in Amsterdam in September 1981 IW AF I and in Vienna in June 1986 IW AF II. As such the Tübingen conference constitutes the Third International Workshop on Agglutinated Foraminifera IW AF III and was organised to provide a platform for synthesizing the current state of knowledge on this group of organisms and to strengthen interactions between basic research and applied micropaleontology. One of the main underlying themes of the conference was to identify topics in the paleoecology, biostratigraphy, paleoceanography and taxonomy of agglutinated foraminifera which are in urgent need of further research. About 80 scientists and students from 5 continents participated in the Tübingen conference which is one measure of the growth in interest in agglutinated foraminifera over the past decade. During four days of technical sessions scientific results were communicated in the form of 34 oral presentations and 15 poster displays.
