non invasive methods the survey enabled more elaborate distinctions to be made between different classes of hillforts than has hitherto been possible The new data reveals not only the complexity of the archaeological record preserved inside hillforts but also great variation in complexity among sites Survey of the surrounding countryside revealed hillforts to be far from isolated features in the later prehistoric landscape Many have other less visible forms of enclosed settlement in close proximity Others occupy significant meeting points of earlier linear ditch systems and some appear to overlie or be located adjacent to blocks of earlier prehistoric field systems *The Bookseller and the Stationery Trades' Journal* ,1886 Official organ of the book trade of the United Kingdom Publication ,1960
