Michler,Ringel,2012-12-06 From April 1 1984 until March 31 1991 the Deutsche Forschungsgemeinschaft has sponsored the project Representation Theory of Finite Groups and Finite Di mensional Algebras The proposal for this project was submitted by B Huppert Mainz B Fischer Bielefeld G Michler Essen H Pahlings Aachen and C M Ringel Bielefeld in order to strengthen the interaction between the different re search areas in representation theory The Deutsche Forschungsgemeinschaft has given many research positions and fellowships for young algebraists enabling them to do research at their own uni versities or as visitors at well known research institutions in America Australia England and France The whole project benefitted very much from an extensive exchange programme between German and American scientists sponsored by the Deutsche

Forschungsgemeinschaft and by the National Science Foundation of the United States This volume presents lectures given in a final conference and reports by members of the project It is divided into two parts The first part contains seven survey articles describing recent advances in different areas of representation theory These articles do not only concentrate on the work done by the German research groups but also inform on major developments of the subject at all The volume omits those topics already treated in book form In particular it does not contain a survey on K **Singularities, Part 1** Peter Orlik,American Mathematical Society,1983 On April 7 10 1980 the American Mathematical Society sponsored a Symposium on the Mathematical Heritage of Henri Poincaré held at Indiana University Bloomington Indiana This title presents the written versions this Symposium It contains two papers by invited speakers who were not able to attend S S Chern and L

Cooper,Sean Sather-Wagstaff,2014-05-16 Commutative algebra combinatorics and algebraic geometry are thriving areas of mathematical research with a rich history of interaction Connections Between Algebra and Geometry contains lecture notes along with exercises and solutions from the Workshop on Connections Between Algebra and Geometry held at the University of Regina from May 29 June 1 2012 It also contains research and survey papers from academics invited to participate in the companion Special Session on Interactions Between Algebraic Geometry and Commutative Algebra which was part of the CMS Summer Meeting at the University of Regina held June 2 3 2012 and the meeting Further Connections Between Algebra and Geometry which was held at the North Dakota State University February 23 2013 This volume highlights three mini courses in the areas of commutative algebra and algebraic geometry differential

graded commutative algebra secant varieties and fat points and symbolic powers It will serve as a useful resource for graduate students and researchers who wish to expand their knowledge of commutative algebra algebraic geometry combinatorics and the intricacies of their intersection

Two-sided Projective Resolutions, Periodicity and Local Algebras Stefanie Küpper, 2010 This book introduces a new point of view on two sided projective resolutions of associative algebras By gluing the vertices we associate a local algebra A_{loct} to any finite dimensional algebra A We try to derive information on the cohomology of A from the associated local algebra A_{loc} that is from the local equivalence class of A For instance the Anick Green resolution is minimal for A if and only if it is so for A_{loc} We can read off the relations of A whether there is a locally equivalent algebra that has a finite or a periodic bimodule resolution over itself Comparing an algebra A and an associated monomial algebra A_{mon} there are inequalities of the following kind If the resolution of the monomial algebra A_{mon} is locally finite then the resolution of A is locally finite If the resolution of A_{mon} is locally periodic then the resolution of A is either locally finite or locally almost periodic

Algebras, Quivers and Representations Aslak Bakke Buan, Idun Reiten, Øyvind Solberg, 2013-08-24 This book features survey and research papers from The Abel Symposium 2011 Algebras quivers and representations held in Balestrand Norway 2011 It examines a very active research area that has had a growing influence and profound impact in many other areas of mathematics like commutative algebra algebraic geometry algebraic groups and combinatorics This volume illustrates and extends such connections with algebraic geometry cluster algebra theory commutative algebra dynamical systems and triangulated categories In addition it includes contributions on further developments in representation theory of quivers and algebras Algebras Quivers and Representations is targeted at researchers and graduate students in algebra representation theory and triangulate categories

Effective Methods in Algebraic Geometry T. Mora, C. Traverso, 2012-12-06 The symposium MEGA 90 Effective Methods in Algebraic Geometry was held in Castiglione della Pescaia Livorno Italy in April 17-21 1990 The themes we quote from the Call for papers were the following Effective methods and complexity issues in commutative algebra projective geometry real geometry algebraic number theory Algebraic geometric methods in algebraic computing Contributions in related fields computational aspects of group theory differential algebra and geometry algebraic and differential topology etc

were also welcome The origin and the motivation of such a meeting that is supposed to be the first of a series deserves to be explained The subject the theory and the practice of computation in algebraic geometry and related domains from the mathematical viewpoint has been one of the themes of the symposia organized by SIGSAM the Special Interest Group for Symbolic and Algebraic Manipulation of the Association for Computing Machinery SAME Symbolic and Algebraic Manipulation in Europe and AAECC the semantics of the name is varying an average meaning is Applied Algebra and Error Correcting Codes
