Lessons from Frankenstorm John Licata, 2013-07-26 The world has been brought to its knees in recent years due to an increased amount of hurricanes tsunamis and earthquakes which collectively have left tens of millions without power and derailed economic growth in the process However today weather is not the only threat to massive power loss It's time to fight back before energy weaknesses and instabilities from disruptive weather patterns cause financial chaos around the world through cyberwarfare In *Lessons from Frankenstorm* you'll learn how to fight back Overview A look back at recent events Fukushima India blackout Sandy here in the U S August 2003 blackout in Northeast U S etc Set up the case that something needs to be done especially with warming temperatures 2012 was the hottest year on record What are threats Focus here is on weather temperatures rising tides global warming dwindling water supplies which impact certain energy sources i.e. fracking biofuels terrorism cyberterror which may create a whole new investing sector in the very near future What can governments and utilities do It could be good to focus on disaster recovery efforts crisis management legislation planning and strategy AHEAD of next major storm or terrorist threats that could rattle global financial marketplaces New legislation could lead to new asset allocation by investors technology companies utilities and private equity Legislation i.e. endorsing modern nuclear power offshore wind etc may also cause new alliances joint ventures as a result Could Frankenstorm be used as a global blueprint for energy innovation Here focus on efforts seen in New York and New Jersey emerging from the darkness and ruin left by Superstorm Sandy through the real next generation energy technologies and themes that investors may want to focus on for the next decade i.e. thorium nuclear reactors which China just announced they are moving toward should the U S follow Complacency is not the answer Doing nothing and simply waiting for another major power outage that not only challenges our credibility as a superpower in a new world economy but could also cripple global market centers maybe look at how slow Japan has reacted to Fukushima while Germany moved way too fast in my view to move away from nuclear power something that has caused surging electricity prices
