Godfrey,2009 Explores humanity s fascination with lake and sea monsters and separates fact from fiction by examining ancient legends and myths contemporary eyewitness accounts and the latest scientific discoveries **A Manifestation of Monsters: Examining the (Un)Usual Suspects** Karl P. N. Shuker,2015-09 The spectacular front cover painting by American artist Michael J Smith depicting 17 astonishing mystery beasts and other controversial entities was the inspiration for this latest book by leading cryptozoologist Dr Karl Shuker Ever since first seeing it in 2012 Shuker has wanted to prepare a book incorporating this painting s eclectic company of creatures but the fundamental problem that he faced was how to categorize them collectively What single term could be used that would encompass this exceedingly diverse array of forms plus the many additional creatures also to be included in the book Cryptid was not sufficiently comprehensive nor was mystery creature or unknown animal because some of the depicted beasts seemingly exist beyond the perimeters and parameters of cryptozoology s traditional confines Eventually Shuker concluded that only one such term could satisfy all those requirements Indeed it was tailor made for this purpose The term What else could it be Monster Derived from the Latin noun monstrum and the Old French monstre monster has many different definitions a very strange frightening possibly evil ugly mythical creature something huge and or threatening a mutant or abnormal animal even something extraordinary astonishing incredible unnatural inexplicable These definitions collectively cover all of this book s subjects and so too therefore does the single word monster from which the definitions derive Consequently this book is a manifestation of monsters a unique exhibition a singular gathering an exceptional congregation of some of the strangest most mystifying and sometimes truly terrifying creatures ever reported

Encyclopedia of Cryptozoology Michael Newton,2016-10-05 On every continent and in every nation animals unrecognized by modern science are reported on a daily basis People passionately pursue these creatures the name given to their field of study is cryptozoology Coined in the 1950s the term literally means the science of hidden animals When the International Society of Cryptozoology ISC was formed in 1982 the founders declared that the branch of science is also concerned with the possible existence of known animals in areas where they are not supposed to occur either now or in the past as well as the unknown persistence of presumed extinct animals to the present time or to the recent past what makes an animal of interest to cryptology is that it is unexpected This reference work presents a flesh and blood view of cryptozoology Here 2 744 entries

are listed the majority of which each describe one specific creature or type of creature Other entries cover 742 places where unnamed cryptids are said to appear profiles of 77 groups and 112 individuals who have contributed to the field descriptions of objects and events important to the subject and essays on cryptotourism and hoaxes for example Appendices offer a timeline of zoological discoveries annotated lists of movies and television series with cryptozoological themes a list of crypto fiction titles and a list of Internet websites devoted to cryptozoology
