**Merchants of Menace** Richard Nowell,2014-04-10 Anglophone horror films are typically approached as the inevitable by products of psychological and social demons haunting filmmakers and their homelands in short as if they were our collective nightmares These reflectionist approaches have led horror films routinely and reductively to be framed as mouthpieces for misogynistic sadists lurking in the shadows of the exploitation sector as defiant expressions of resistance enacted by noble progressives or as platforms for the politically reactionary evils of the biggest scariest monster of all Hollywood The industry logic strategies and practices that heavily determine horror film content the nature of horror film production promotion and dissemination as well as the responses to these activities have therefore been either side stepped completely or reduced unhelpfully to the profit making motives underwriting all capitalist endeavours Consequently even though horror has been a key component of media output for almost a century the genre s industrial character remains under explored and poorly understood EDITOR
