created designs and buildings for the family that achieved iconic status in the modern movement Focusing on the Tremaines houses and other projects such as a visitor center at the meteor crater in Arizona this volume explores the Tremaines architectural patronage in terms of the family s motivations and values exposing patterns in what may appear as an eclectic collection of modern architecture Architectural historian Volker M Welter argues that the Tremaines patronage was not driven by any single factor rather it stemmed from a network of motives comprising the clients practical requirements their private and public lives and their ideas about architecture and art

California Mediterranean Marc Appleton, 2007 In the early 20th century architects designing houses for the balmy climate of Southern California were influenced by the style of the villas and palaces that dominated the architecture of Italy, France, Spain, Greece, and Morocco and a few other North African locales. The resulting style, noted for its pleasing combination of simplicity and dignity for its often asymmetrical undecorated facades, reflected romantic European forms and yet distinguished itself by adding American ingenuity. Prime examples of this include Villa Narcissa, widely celebrated for its unimposing grandeur, and Casa Leon with its stunning hillside location and ocean views. Included here are residences by noted architects such as Julia Morgan, Bertram Goodhue, Addison Mizner, George Washington Smith, Wallace Neff, and others. While some of the houses are lavishly decorated villas with lush landscaping, others are more spare creations. What all these interpretations of the California Mediterranean style have in common is an indoor-outdoor approach to living. *The Californians*, 1988 **The Shorthorn World and Farm Magazine**, 1920
