Pollock, 2007-10-24 The theoretical turn within the arts and humanities in the 1970s and 1980s has for many had its day with work produced under its rubric all too often feeling tired or even downright lazy In its place whilst hazarding against an outright rejection of theory this book introduced by Mieke Bal presents work by a new generation of scholars responding directly to Bal s idea of the travelling concept By taking a concept from one discipline and with a genuine understanding of its origin thoughtfully applying this in a new context exciting new possibilities are opened up for analysis of artworks and other cultural objects Here we find these travelling concepts employed in fresh explorations of subjects as diverse as the paintings of Poussin and of Adam Elsheimer Chantal Akerman s film the Museum of the French Revolution and the work of

German Jewish painter Charlotte Salomon This is a uniquely illuminating contribution to the edgy territorial conflicts between visual culture art history and cultural studies

Visual Politics of Psychoanalysis Griselda Pollock, 2013-10-08 In this innovative collection a distinguished group of international authors dare to think psychoanalytically about the legacies of political violence and suffering in relation to post traumatic cultures worldwide They build on maverick art historian Aby Warburg's project of combining social cultural anthropological and psychological analyses of the image in order to track the undercurrents of cultural violence in the representational repertoire of Western modernity Drawing on post colonial and feminist theory they analyze the image and the aesthetic in conditions of historical trauma from enslavement and colonization to the Irish Famine from Denmark's national trauma about migrants and cartoons to collective shock after 9/11 from individual traumas of loss registered in allegory to newsreels and documentaries on suicide bombing in Israel Palestine and from Kristeva's novels to Kathryn Bigelow's cinema

Eva Hesse Vanessa Corby, 2010-06-22 Here is an important new examination of the work of American German Jewish artist Eva Hesse one of the most significant figures in twentieth century art Using exciting new feminist approaches and taking as her starting point two key works Corby reveals the way in which Hesse has been constructed as a woman artist and explores the overlooked legacy of the Holocaust and refugee life in her art practice Considering creativity and the feminine trauma and historiography and providing a reassessment of Hesse's relationship with her mother and its impact on her work the book also confirms the importance of drawing practice within Hesse's wider oeuvre

Transformative Objects and the Aesthetics of Play Lynn M. Somers, 2024-12-26 This book considers the sculpture of Louise Bourgeois 1911-2010 in light of psychoanalyst D.W. Winnicott's 1896-1971 radical ideas regarding transitional objects potential space and play offering a model for exploring the complex and psychologically evocative work Bourgeois produced from 1947 to 2000 Critical concepts from British object relational theories destruction reparation integration relationality and play drawn from the writings of Winnicott Melanie Klein Marion Milner and Christopher Bollas among others bear upon the decades long study of psychoanalysis Bourgeois brought to her sculptural production that was symbolic metaphorical and most importantly useful The book demonstrates how Bourgeois's transformative sculptural objects and environments are invested in object relations both psychical and tangible and explores Bourgeois's contention that the observer physically engage with the intricate sculptural objects and architectural spaces she produced Each chapter focuses on a key body of work *Femme Maison* *Personages* *Lairs* *Janus* and *Cells* examining how these imaginative and playful objects are staged as embodied encounters in space and time to invoke the mutuality reciprocity and ambivalence of our object relationships Weaving a tapestry of aesthetic cultural and psychological encounters *Transformative Objects and the Aesthetics of Play* addresses critical relationships among Bourgeois's work and that of other artists from Pieter Brueghel to Eva Hesse It brings together practical archival and theoretical material offering close examinations of historically situated objects and analyses of their complex affects and spatiality Gathering critical perspectives from

psychoanalysis cultural analysis feminist queer literary and affect studies the book extends its specific art historical scope to investigate the crucial roles that art and cultural experience assume in everyday life Crossmappings Elisabeth Bronfen, 2018-05-22 The great influential cultural critic Elisabeth Bronfen sets out in this book a conversation between literature cinema and visual culture The crossmappings facilitated in and between these essays address the cultural survival of image formulas involving portraiture and the uncanny relation between the body and its visual representability the gendering of war death and the fragility of life as well as sovereignty and political power Each chapter tracks transformations that occur as aesthetic figurations travel from one historical moment to another but also from one medium to another Many prominent artists are discussed during these journeys into the cultural imaginary include Degas Francesca Woodman Cindy Sherman Paul McCarthy Eva Hesse Louise Bourgeois Wagner Picasso and Shakespeare as well as classic Hollywood s film noir and melodrama and the TV series The Wire and House of Cards **Picturing Peace** Tom Allbeson, Pippa Oldfield, Jolyon Mitchell, 2024-12-26 How can photographers curators and editors convey narratives of peace and not just stories of war Providing interdisciplinary and international perspectives on timely debates Picturing Peace explores humanitarianism and visual culture community collaboration collective memory and imagined futures for creating and sustaining of civil societies How things look and are perceived are not superficial issues when it comes to war and conflict photography is vitally relevant not only to documenting violence but also to rebuilding peaceful societies The volume examines the intersecting issues of visual culture and peacebuilding including the genealogies of photography and conflict decolonisation and the gaze the significance of archival material as well as recent peacebuilding initiatives Exploring multiple forms of peace photography the volume offers a range of voices from preeminent international scholars as well as interviews with practicing photographers who have experience of working with post conflict communities As such the book provides a timely investigation into the politics of representation questioning how photographers might help foster social relationships transform conflicts and reconcile communities in the image oriented cultures Post-Traumatic Art in the City Isabelle de le Court, 2020-11-26 Post Traumatic Art in the City comprises an original analysis of the nexus of war art and urban society in two specific contexts late 20th century Beirut and Sarajevo With an emphasis on conceptions of the post traumatic De le Court explores how cities and art are mutually formative in war and post war contexts providing unique insight into the politically and psychologically driven art scenes from within the works of art themselves Grounded in close analyses and new research the book makes an important contribution to the fields of art history and trauma studies **Feminist Practices** Lori A. Brown, 2016-04-15 Women continue to be extremely under represented in the architectural profession Despite equal numbers of male and female students entering architectural studies there is at least 17 25% attrition of female students and not all remaining become practicing architects In both the academic and the professional fields of architecture positions of power and authority are almost entirely male and as such the profession is defined by a heterosexual Eurasian male

perspective This book argues that it is vital for all architectural students and practitioners to be exposed to a diversity of contemporary architectural practices as this might provide a first step into broadening awareness and transforming architectural engagement It considers the relationships between feminist methodologies and the various approaches toward design and their impact upon our understanding and relationship to the built environment In doing so this collection challenges two conventional ideas firstly the definition of architecture and secondly what constitutes a feminist practice This collection of up and coming female architects and designers use a wide range of local and global examples of their work to question different aspects of these two conventional ideas While focusing on feminist perspectives the book offers insights into many different issues concerns and interpretations of architecture proposing through these types of engagement architecture can become more culturally politically and environmentally relevant This next generation of architects claim feminism as their own and through doing so help define what feminism means and how it is evolving in the 21st century

Differencing the Canon Griselda Pollock, 2013-04-15 In this major book Griselda Pollock engages boldly in the culture wars over what is the canon and what difference can feminism make Do we simply reject the all male line up and satisfy our need for ideal egos with an all women litany of artistic heroines Or is the question a chance to resist the phallogocentric binary and allow the ambiguities and complexities of desire subjectivity and sexuality to shape the readings of art that constantly displace the present gender demarcations

Practical Aesthetics Bernd Herzogenrath, 2020-10-15 This collection brings together artists and theoreticians to provide the first anthology of a new field Practical Aesthetics A work of art already contains its own criticism a knowledge of its own which need not be conceptual or propositional Yet today there are many approaches to different forms of art that work on the brink between science and art sensible cognition and proposition aesthetic knowledge and rational knowledge while thinking with art or the artistic material rather than about it This volume presents ways of thinking with different forms of art film sound dance literature etc as well as new forms of aesthetic research and presentation such as Media Philosophy the audiovisual essay fictocriticism the audio paper and Artistic Research It reveals how writing about art can become artistic or poetic in its own right not only writing about artistic effects but producing them in the first place This takes art not as an object of external analysis but as a subject with a knowledge in

its own right creating a co composing conceptual interference pattern between theory and practice A practical aesthetics thus understood can be described as thinking with art in order to find new ways to create worlds and thus to make the world perceivable in different ways

Visuality in the Theatre M. Contingencies and Masterly Fictions Lauren Watson,2020-05-22 This book establishes deconstructive dialogues between texts which are generically chronologically and stylistically very different Each chapter aligns one of Dickens s later novels with a work of contemporary literature and a post structuralist theoretical text Working from the premise of Derrida s contre the relationship developed between these texts is not so much intertextual as countertextual each text re enacts the procedures of its counterparts simultaneously rearticulating and interrogating their status In this triangular mode of reading the contact zone between countertexts becomes the site on which new readings are generated readings that use the ambivalent relationship between writings to mark an analogous self difference within writing itself This productive self difference is described as a negotiation of the contradictory drives of signification a strategic management of the masterly and the contingent This book argues that Dickens s texts perform their negotiations in an acutely strenuous manner amplifying instability and exposing the means of literary production This lack of discipline proves contagious as the reader re enacts the text s spasmodic shifts between mastery and contingency As surrogate Dickensian readers in the countertextual economy the contemporary novel and post structuralist theory also display this instability an effect which allows this study to develop not only a theory of poetics but a poetics of theory This dramatic self difference is not simply restricted to writing however In later chapters this study examines how racial and gender identities are also marked by ambivalence and how their instability is exacerbated after contact with a Dickensian contre In conclusion the work is itself submitted to a Dickensian reading The author examines how the study s own manoeuvres have been exposed

through contact with many of the texts analysed within it and how this dialogue deconstructs the ideal of academic writing
