Beyond the Architect's Eye Mary N. Woods, 2013-12-11 Typical architectural photography freezes buildings in an ideal moment and rarely captures what photographer Berenice Abbott called the medium s power to depict how the past jostled the present In Beyond the Architect s Eye Mary N Woods expands on this range of images through a rich analysis that commingles art amateur and documentary photography genres usually not considered architectural but that often take the built environment as their subject Woods explores how photographers used their built environment to capture the disparate American landscapes prior to World War II when urban and rural areas grew further apart in the face of skyscrapers massive industrialization and profound cultural shifts Central to this study is the work of Alfred Stieglitz Frances Benjamin Johnston and Marion Post Wolcott but Woods weaves a wider narrative that also includes Alice Austen Gertrude K sebiar Berenice Abbott Margaret Bourke White Helen Levitt Lisette Model Louise Dahl Wolfe Morgan and Marvin Smith Eudora Welty Samuel Gottscho Walker Evans Max Waldman and others In such disparate places

as New York City the rural South and the burgeoning metropolis of Miami these unconventional architectural photographers observed buildings as deeply connected to their context Whereas Stieglitz captured New York as the quintessential modern urban landscape in the period the South was its opposite a land supposedly frozen in the past Yet just as this myth of the Old South crystallized in photographs like Johnston's a New South shaped by popular culture and modern industry arose Miami embodied both of these visions In Wolcott's work agricultural fields where stoop labor persisted were juxtaposed with Art Deco hotels a popular modernism of the machine age that remade Miami Beach into a miniaturized Manhattan on the beach Beyond the Architect's Eye is a groundbreaking study that melds histories of American art cities and architecture with visual studies of landscape photography and cultural geography *The Magazine of Art* Marion Harry Spielmann, 1896

Contemporary Art About Architecture Nora Wendl, 2017-07-05 An important resource for scholars of contemporary art and architecture this volume considers contemporary art that takes architecture as its subject Concentrated on works made since 1990 *Contemporary Art About Architecture A Strange Utility* is the first to take up this topic in a sustained and explicit manner and the first to advance the idea that contemporary art functions as a form of architectural history theory and analysis Over the course of fourteen essays by both emerging and established scholars this volume examines a diverse group of artists in conjunction with the vernacular canonical and fantastical structures engaged by their work I Mangano Ovalle Matthew Barney Monika Sosnowska Pipa Nguyen Duy and Paul Pfeiffer are among those considered as are the compelling questions of architecture's relationship to photography the evolving legacy of Mies van der Rohe the notion of an architectural unconscious and the provocative concepts of the unbuilt and the unbuildable Through a rigorous investigation of these issues *Contemporary Art About Architecture* calls attention to the fact that art is now a vital form of architectural discourse Indeed this phenomenon is both pervasive and in its individual incarnations compelling a reason to think again about the entangled histories of architecture and art **Art History Through the Camera's Lens** Helene E.

Roberts, 2013-09-13 Photography of art has served as a basis for the reconstruction of works of art and as a vehicle for the dissemination and reinterpretation of art This book provides the first definitive treatment of the subject with essays from noted authorities in the fields of art history architecture and photography The essays explore the many meanings of photography as documentation for the art historian inspiration for the artist and as a means of critical interpretation of works of art *Art History Through the Camera's Lens* will be important reading for students historians librarians and curators of the visual arts **Photo-era Magazine** Juan C. Photography Mary Warner Marien, 2006 Each of the eight chapters takes a period of up to forty years and examines the medium through the lenses of art science social science travel war fashion the mass media and individual practitioners Back Cover **Forthcoming Books** Rose Arny, 1996-06 **The Place of the Viewer** Kerr Houston, 2019-05-07 In recent decades art historians and critics have occasionally emphasized a dynamic embodied mode of looking accenting the role of

the viewer and the complex interplay between beholders and works of art In *The Place of the Viewer* Kerr Houston shows that an attention to the position and physical experiences of beholders has in fact long informed art historical analyses and that close study of the theme can lead to a fuller understanding of the discipline the act of viewership and individual works of art Simultaneously attentive to historical ideas and contemporary scholarship this book identifies a vein of thought that has been generally overlooked and proposes new ways of seeing familiar works and traditions *General exterior photography. Montage and the Metropolis Martino Stierli, 2018-01-01 Montage has been hailed as one of the key structural principles of modernity yet its importance to the history of modern thought about cities and their architecture has never been adequately explored In this groundbreaking new work Martino Stierli charts the history of montage in late 19th century urban and architectural contexts its application by the early 20th century avant gardes and its eventual appropriation in the postmodern period With chapters focusing on photomontage the film theories of Sergei Eisenstein Mies van der Rohe s spatial experiments and Rem Koolhaas s use of literary montage in his seminal manifesto *Delirious New York* 1978 Stierli demonstrates the centrality of montage in modern explorations of space and in conceiving and representing the contemporary city Beautifully illustrated this interdisciplinary book looks at architecture photography film literature and visual culture featuring works by artists and architects including Mies Koolhaas Paul Citroen George Grosz Hannah Hoch El Lissitzky and Le Corbusier

The Realisms of Berenice Abbott Terri Weissman, 2011-01-10 *The Realisms of Berenice Abbott* provides the first in depth consideration of the work of photographer Berenice Abbott Though best known for her 1930s documentary images of New York City this book examines a broad range of Abbott s work including portraits from the 1920s little known and uncompleted projects from the 1930s and experimental science photography from the 1950s It argues that Abbott consistently relied on realism as the theoretical armature for her work even as her understanding of that term changed over time and in relation to specific historical circumstances But as Weissman demonstrates Abbott s unflinching commitment to realist aesthetics led her to develop a critical theory of documentary that recognizes the complexity of representation without excluding or obscuring a connection between art and engagement in the political public sphere In telling Abbott s story *The Realisms of Berenice Abbott* reveals insights into the politics and social context of documentary production and presents a thoughtful analysis of why documentary remains a compelling artistic strategy today
