**Color by Number** Art Munin,2023-07-03 Many deny that racism remains pervasive in America today How can we open eyes to the continuing disadvantages that keep many people of color from fulfilling their potential and having an equal chance to achieve the American Dream By presenting the impact of racism on the most innocent and powerless members of society children of color in the form of statistics this book aims to change attitudes and perceptions Children have no say about where they are born or what school they attend They have no control over whether or not they get medical treatment

when they fall ill They can't avoid exposure if their home is in a community blighted by pollution The questions this book poses are What responsibility do we expect children to take for their life circumstances Do those conditions blight their futures If they aren't responsible who is Are some in society privileged and complicit in denying people of color the advantages and protections from harm most of us take for granted Through the cumulative effect of official statistics rather than the more usual reliance on anecdote by taking a show me the numbers approach this book will open minds start conversations and even prompt readers to take action While the numbers are official they are often hard to find because they are scattered across so many sources Art Munin has not only done the research but shows the reader how to locate data on racial and socio economic disparities and develop her or his own case or classroom project Color by Number takes as its metaphorical point of departure the familiar children's activity of that name Art Munin has painstakingly researched and gathered the numbers and has filled in the spaces to reveal the hidden picture of racism in America from the perspectives of health the environment the law and education This book is intended as a fact based antiracism text for diversity and social justice courses and as a resource for diversity and social justice educators as they craft their race racism and White privilege curricula Art Munin's multidisciplinary approach drawing on scholarly work from medicine law sociology psychology and education provides the reader with a comprehensive way to understand the pervasiveness of racism

*The School as a Safe Haven* Rollin J. Watson, Robert S. Watson, 2002-05-30 The authors set out to see if the American school has always been safe Unfortunately they found that it has not that it is confronted in each new generation with a whole new set of threats and dangers This is a unique book that examines American schools and their safety from the point of view of historical incursions and threats rather than from anecdotal and sometimes questionable information Through the examination of thousands of documents and incidents the authors show that the American school has always been subjected to threats from many different sources Student violence is only a small part of this danger in fact the authors show that schools are confronted with many threats besides those presented sporadically by lone violent killers The authors at the same time believe there has been an overreaction to violence that may in itself not be salubrious for the academic programs and moral climates of our schools After the crisis at Columbine High School many well known commentators said that this was the worst crisis ever to take place in an American school The authors decided to look at the whole topic of school safety in America from the period right after World War II to the present This unique book is the first to place school safety at the heart of the educational endeavor in America the first to treat the subject of threats to the school in a broader historical context and the first to treat the subject as part of intellectual history By documenting thousands of instances during the period after World War II through the end of the century the authors have concluded that the myth of the school as a safe haven has been a comforting but not

always accurate metaphor The approach to the subject is from a myriad of perspectives First the state of school buildings after the War is discussed Next the authors look at juvenile delinquency in the 1950s Then they put school fires in context followed by a chapter on school bus accidents and other devastating events from nature In Civil Rights Uncivil Schools they discuss the deleterious impact of the century s most important social movement on schools In the creative chapter The Demise of Discipline they demonstrate through research ways in which discipline in the schools has been eroded In A Decadent Counterculture they assess the threats to schools by sex drugs and gangs In Terror Comes to School they show that many violent intrusions began in the 1970s and earlier well before the 1990s The concluding chapter The Paradox of the Clinton Era brings the history to the end of the century The Postscript discusses new ways of looking at threats to school safety
