Is there really such a thing as a professional gambler The answer is an unequivocal Yes This book s authors are but two examples Many thousands of people around the country make a good living exclusively from gambling It is not easy but it can be done The key is to understand which games are beatable and know how to beat them David Sklansky and Mason Malmuth have spent many years writing about the finer points of poker blackjack and other beatable games As you will see in the book those other games are horses sports progressive slots and video poker casino tournaments and special promotions They don t include craps roulette keno or baccarat for reasons they ll explain This book was written for the not quite as experienced aspiring gambler It shows you everything you need to learn and do if you want to gamble for a living from both the practical and the technical standpoints The rest is up to you **Blackjack Essays** Mason Malmuth,1996-05 Designed to aid the serious player beat the games in today s modern casino environment The days when you could simply master a count and expect to be a winner are gone forever As a result winning at blackjack requires not only numerous skills but also a lot of thinking about the game Unlike most blackjack books this text assumes that you already know how to count cards and it introduces techniques that should be useful to the successful player The topics covered are card domination more commonly known as shuffle tracking theoretical concepts blackjack biases current blackjack mistaken ideas supplemental strategies playing in a casino obsolete techniques and front loading In addition advice is offered on gambler s ruin the one deck game back counting betting strategies heads up play becoming a professional casino preparation first basing and much more

Getting the Best of It David Sklansky,1997 Contains six sections discussing probability poker blackjack other casino games sports betting and general gambling concepts This book contains some of the most sophisticated gambling ideas that have ever been put into print Included is perhaps the best discussion of the basic mathematics of gambling yet it is written so that even the most non mathematical of readers can understand it Many of the ideas discussed are those that the author himself has successfully used during his career Topics include expectation combinations Baye s Theorem the eight mistakes in poker checking in the dark playing tight The Key Card Concept casinos and their mistakes crapless craps betting sports hedging and middling knowing what s important the Law of Averages and Other Fallacies and much more On Living Our Explanations Lee Thayer,2017-02-08 People have always tried to explain whatever they want to talk about or have to deal with in their worlds To explain something to oneself or to others makes it comprehensible If the explanation becomes socially tenable it provides a person or a tribe with a perspective on their world a way of knowing it That perspective becomes their reality It is a virtual reality created by people for the use of those people Virtual realities are products of our talk and our minds which archive and channel the meaning of things First our minds get created and then our minds create us personally and collectively All human worlds that we know anything about function as they do based upon the meaning of their worlds and them in it Most of the other animals on earth dont have much to say about their pasts or their future People do because they invented the concept of the past and the concept of the future in order to think and talk about them Those who

superseded us in our particular cultures invented explanations to give virtual reality to everything they wanted to talk about or do something about We live in and through those explanations as we understand them We invent our explanations on top of those we inherit and that we and our progenies will grow up living in and through This counter intuitive premise is that we do not live in any natural world We live consciously and even subconsciously in our worlds as we have explained themor could explain them Physiological or biological events certainly do occur But we deal with them according to what they meant to us Random events like accidents do occur But we can explain them before they occur and after they occur There is nothing that occurs in our worlds that we cannot explain or justify in some way Whether or not it rains is something we do not control But to talk about it or think about it we have to do so in and through our explanations Your lover may be dumping you for his or her own a priori explanations How you deal with it depends upon how you explain it to yourself We liveand we diein accordance with our explanations of our worlds and of us in them We live our explanations **Winning Concepts in**

to dubious advice from their friends While they may have picked up a valuable tidbit here or there most players have two options wise up or go broke The world s foremost poker theorist David Sklansky and noted poker authority Ed Miller will wise you up quickly No Limit Hold em Theory and Practice is the definitive work on this complex game It provides you a window into the heads of experts teaching you in straightforward and enjoyable terms the how s and why s of winning play
