Poland Complying With Eu Environmental Legislation:

Poland Gordon Hughes, Julia Bucknall, 1999 The prospect of joining the European Union defines much of Poland's current policy agenda. The political and economic consensus in favor of joining the EU as quickly as possible is very strong and indeed most of the adjustments required are likely to be in Poland's immediate interest. However, the changes required to comply with EU directives in the environment sector involve sustained high levels of investment and significant uncertainty about the timing and nature of the associated benefits. The European Commission's Opinion on Poland's application for EU membership acknowledges the severity of the environmental problems in Poland and comments on the challenges the country will have to face especially in the areas of wastewater treatment and air pollution. The Opinion concludes that while full transposition of the environmental acquis in Poland could be expected in the medium term, effective compliance with a number of pieces of legislation would require sustained high levels of investment and considerable administrative effort. Full compliance in areas such as drinking water and certain aspects of waste management could be achieved only in the long term and will necessitate increased levels of public and private investment. This paper aims to address some of the issues involved in planning compliance with EU environmental directives. The paper has three principal objectives: Highlight major issues that Poland is likely to face in implementing the requirements; Estimate the total costs of compliance for the public sector in certain key sectors and outline possible options for reducing those costs; and Assess where the burden of those costs is likely to fall and the options for financing the investments. *OECD Environmental Performance Reviews: Poland 2003* OECD, 2003-06-17 This review of Poland's environmental conditions and policies evaluates progress in reducing the pollution burden, improving natural resource management, integrating environmental and economic policies, and strengthening international co-operation. *OECD Economic Surveys: Poland 2001* OECD, 2001-04-10 This 2001 edition of OECD's periodic reviews of Poland's economy examines recent economic developments, policies, and prospects and includes special features on structural policies for employment-friendly growth and encouraging environmentally sustainable growth. [Change and Continuity in Poland's Environmental Policy](#) Andersson, 2013-03-14 **EU Enlargement and the Environment** JoAnn Carmin, Stacy D. VanDeveer, 2023-05-31 This volume focuses attention on key environmental and institutional changes associated with eastern expansion of the European Union, assessing and challenging prevailing views about the outcomes and processes of this historic development. Looking at four central themes: capacity changes and limitations, the EU's mixed messages and conflicting priorities, non-state actor roles and developments, and the exchange of ideas and information, the volume shows that enlargement will change the EU, not just make it bigger, and that EU officials and programs are improving aspects of environmental policy in CEE countries, even as they are making others less sustainable. This book was previously published as a special issue of the journal *Environmental Politics*. **Introduction to Polish Law** Stanisław Frankowski, Adam Bodnar, 2005-01-01 During two decades encompassing three epochal events: the collapse of European

communism in 1989 NATO membership in 1999 and accession to the European Union in 2004 the legal system of Poland has emerged with remarkable maturity and stability In an exemplary blend of its democratic heritage from the era between the World Wars proven effective legislation from the communist era and the vibrant 1997 Constitution Polish law dramatically reflects new social economic and political realities With eleven lucid chapters written by fifteen academic experts from the Warsaw University School of Law and Administration each in his or her respective field of law this deeply informed but succinct and practical volume is the ideal starting point for research whenever a question of Polish law arises The authors clearly explain the legal concepts customs and rules surrounding such essential elements as the following principles and practices of constitutional law administrative law and procedure civil procedure courts and special judicial bodies judicial review enforcement of foreign judgments family succession and inheritance matters formation and conduct of corporations and partnerships contract formation interpretation and termination environmental protection harmonizing Polish economic law with EU standards competition law and regulatory framework of market processes special regulation of energy telecommunications and financial markets copyrights patents utility models and industrial designs licence agreements the labour relationship and types of employment contracts and criminal law and procedure Each chapter includes its own detailed bibliography English speaking legal practitioners and academics have here an ideal introduction to the basic institutions principles and rules of Polish law Encompassing all the major fields of legal practice Introduction to Polish Law provides an essential understanding of the Polish legal system so that users can become familiar with law and legal processes in Poland and pursue further research on specific Polish legal matters Practitioners will find it of great value for both counselling and courtroom use

OECD Environmental Performance Reviews: Poland 2015 OECD,2015-04-23 This report is the third OECD review of Poland s environmental performance It evaluates progress towards sustainable development and green growth with a focus on forestry and biodiversity as well as waste and materials management

OECD Economic Surveys: Poland 2008 OECD,2008-06-10 Poland has been catching up with the rest of the OECD more quickly in the past two years but the short term outlook is clouded by strong excess demand pressures and rising inflation This 2008 edition of OECD s periodic survey of the Polish economy

The Europeanization of Central and Eastern Europe Frank Schimmelfennig,Ulrich Sedelmeier,2005 This book demonstrates the importance of the credibility and the costs of accession conditionality for the adoption of EU rules in Central and Eastern Europe

Transnational Politics of the Environment Liliana B. Andonova,2003-11-21 A study of the effect of EU membership on Central and Eastern European environmental policy and the interplay of political incentives and industry behavior that determines policy In Transnational Politics of the Environment Liliana Andonova examines the effect of the European Union EU on the environmental policies of Bulgaria the Czech Republic and Poland Compliance with EU environmental regulations is especially onerous for Central and Eastern European countries because of the costs involved and the legacy of pollution from communist era industries But Andonova argues that EU

integration has a positive impact on environmental policies in these countries by exerting a strong influence on the environmental interests of regulated industries With her empirical study of chemical safety and air pollution policies from 1990 to 2000 she shows that export competitive industries such as the chemical industry that would benefit from economic integration have an incentive to adopt EU norms By contrast industries such as electric utilities that primarily serve the domestic market remain opposed to EU environmental standards and must be prodded by their own governments to implement environmental protection measures These differences in domestic interests greatly influence the course of reforms and the adoption of EU standards Transnational Politics of the Environment challenges the current focus on intergovernmental cooperation between East and West by highlighting the roles of industries transnational norms and domestic institutions in promoting change in environmental regulation It offers a generalizable framework for understanding the politics of environmental regulation in emerging market economies and helps bridge the divide between the study of domestic and international environmental politics

Research Handbook on EU Environmental Law Marjan Peeters, Mariolina Elia Antonio, 2020-06-26 This comprehensive Research Handbook discusses how the EU has used its regulatory power to steer towards environmentally friendly behaviour delving into the deep concerns related to the compliance with and enforcement of EU environmental law It also highlights the important role of civil society's use of environmental procedural rights and characterizes how the CJEU case law has contributed to the effective implementation of EU environmental legislation

Telecommunications Legislation in Transitional and Developing Economies Tim Schwarz, David Satola, 2000 This paper examines the design of telecommunications legislation in countries with transitional and developing economies TDCs engaged in liberalising and privatising their telecommunications sectors It attempts to synthesise good practice and is intended to be used as a tool for legislative drafting The main purpose of the paper is to highlight some of the issues which policy makers and legislators in TDCs may wish to bear in mind The paper has three components The first section outlines the scope and underlying principles of telecommunications legislation the second section outlines the regulatory imperatives of telecommunications legislation and the third part the annex contains framework telecommunications legislation

Deregulation and Its Discontents M.
