Polar Politics Creating International Environmental Regimes Cornell Studies In Political Economy:

Polar Politics Oran R. Young, Gail Osherenko, 1993 Co recipient of the 1994 Harold and Margaret Sprout Award given by the Environmental Studies Section of the International Studies Association A region of critical environmental significance the Arctic continues to be the focus of international conflicts of interest How well have nations succeeded in creating regimes that establish international rights and responsibilities in the circumpolar North *The Making of International Environmental Treaties* Gerry Nagtzaam, 2009 Gerry Nagtzaam contends that in recent decades neoliberal institutionalist scholarship on global environmental regimes has burgeoned as has constructivist scholarship on the key role played by norms in international politics In this innovative volume the author sets these interest and norm based approaches against each other in order to test their ability to illustrate why and how different environmental norms take hold in some regimes and not others The book explores why some global environmental treaties seek to preserve and protect some parts of nature from human utilization some seek to conserve certain parts of nature for human development whilst others allow the reckless exploitation of nature without accounting for the consequences It tracks the fate of these three underlying environmental norms preservation conservation and exploitation using case studies on whaling mining in Antarctica and tropical timber The book illustrates how international political battles to shape environmental regimes inevitably result in clashes between these competing environmental norms This unique study will prove a fascinating read for both academics and practitioners in the fields of international environmental politics and international environmental law Human Dimensions of Global Environmental Change National Research Council, Division of Behavioral and Social Sciences and Education, Policy Division, Board on Environmental Change and Society, Committee on the Human Dimensions of Global Change and Committee on Global Change Research, 1999-07-29 This publication is extracted from a much larger report Global Environmental Change Research Pathways for the Next Decade which addresses the full range of the scientific issues concerning global environmental change and offers guidance to the scientific effort on these issues in the United States This volume consists of Chapter 7 of that report Human Dimensions of Global Environmental Change which was written for the report by the Committee on the Human Dimensions of Global Change of the National Research Council NRC It provides findings and conclusions on the key scientific questions in human dimensions research the lessons that have been learned over the past decade and the research imperatives for global change research funded from the United States Global Environmental Change Committee on Global Change Research, Policy Division, Policy and Global Affairs, National Research Council, 1999-09-28 How can we understand and rise to the environmental challenges of global change One clear answer is to understand the science of global change not solely in terms of the processes that control changes in climate and the composition of the atmosphere but in how ecosystems and human society interact with these changes In the last two decades of the twentieth century a number of such research efforts supported by computer and satellite technology have been

launched Yet many opportunities for integration remain unexploited and many fundamental questions remain about the earth's capacity to support a growing human population This volume encourages a renewed commitment to understanding global change and sets a direction for research in the decade ahead Through case studies the book explores what can be learned from the lessons of the past 20 years and what are the outstanding scientific questions Highlights include Research imperatives and strategies for investigators in the areas of atmospheric chemistry climate ecosystem studies and human dimensions of global change The context of climate change including lessons to be gleaned from paleoclimatology Human responses to and forcing of projected global change This book offers a comprehensive overview of global change research to date and provides a framework for answering urgent questions *Global Political Economy* John Ravenhill, 2008 An authoritative introduction to Global Political Economy The book covers all bases contemporary theory introductions to particular issue areas and an extended debate on globalization that reflects a variety of perspectives The book is accompanied by an Online Resource Centre Student resources Timeline Web links Glossary Instructor resources Tables and figures from the book to download 2 in depth case studies **Global Environmental Change and International Law** Lynne M. Jurgielewicz, 1996 This is one of the few books dealing with regime theory to be written from a legal point of view Jurgielewicz's book is part of an effort to promote interdisciplinary research on the nature of the international legal order Her work explores the concept of international regimes within the international legal order utilizing the policy oriented approach to international law The study uses examples of global environmental change as models By examining the general international law applicable to climate change and ozone layer depletion the author attempts to explain the original need for regime formation in these areas Next Jurgielewicz looks at the role of regimes within international law focusing on their formation maintenance source of legal obligation and compliance mechanisms The book concludes that regimes are present within the international legal order and play a vital role in maintaining that order This book will appeal to students in law schools graduate schools or advanced undergraduate seminars covering international relations international legal theory international law and international organizations **International Governance** Oran R. Young, 2018-05-31 How can the global environment be safeguarded in the absence of a world government In the vanguard of efforts to address this critical question Oran R Young draws on environmental issues to explore the nature of international governance Young's analysis invokes the distinction between governance a social function involving the management of interdependent individuals or groups and government a set of formal organizations that makes and enforces rules International Cooperation Oran R. Young, 1989 The notion of regimes as institutions that shape international behavior has received much attention from scholars in the field of international relations as a way of understanding how sovereign states secure international cooperation Oran Young here seeks both to develop our theoretical grasp of international regimes and to expand the range of empirical applications of this line of analysis **How Effective Negotiation Management Promotes Multilateral**

Cooperation Kai Monheim, 2014-10-24 Multilateral negotiations on worldwide challenges have grown in importance with rising global interdependence Yet they have recently proven slow to address these challenges successfully This book discusses the questions which have arisen from the highly varying results of recent multilateral attempts to reach cooperation on some of the critical global challenges of our times These include the long awaited UN climate change summit in Copenhagen which ended without official agreement in 2009 Canc n one year later attaining at least moderate tangible results the first salient trade negotiations after the creation of the WTO which broke down in Seattle in 1999 and were only successfully launched in 2001 in Qatar as the Doha Development Agenda and the biosafety negotiations to address the international handling of Living Modified Organisms which first collapsed in 1999 before they reached the Cartagena Protocol in 2000 Using in depth empirical analysis the book examines the determinants of success or failure in efforts to form regimes and manage the process of multilateral negotiations The book draws on data from 62 interviews with organizers and chief climate and trade negotiators to discover what has driven delegations in their final decision on agreement finding that with negotiation management organisers hold a powerful tool in their hands to influence multilateral negotiations This comprehensive negotiation framework its comparison across regimes and the rich and first hand empirical material from decision makers make this invaluable reading for students and scholars of politics international relations global environmental governance climate change and international trade as well as organizers and delegates of multilateral negotiations This research has been awarded the German Mediation Scholarship Prize for 2014 by the Center for Mediation in Cologne Transnational Environmental Policy Reiner Grundmann, 2002-11-01 Transnational Environmental Policy analyses a surprising success story in the field of international environmental policy making the threat to the ozone layer posed by industrial chemicals and how it has been averted The book also raises the more general question about the problem solving capacities of industrialised countries and the world society as a whole Reiner Grundmann investigates the regulations which have been put in place at an international level and how the process evolved over twenty years in the US and Germany

Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic Erokhin, Vasilii, Gao, Tianming, Zhang, Xiuhua, 2018-12-28 Global interest in the exploration of the Arctic has been growing rapidly As the Arctic becomes a global resource base and trade corridor between the continents it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the environment The Handbook of Research on International Collaboration Economic Development and Sustainability in the Arctic discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic Featuring research on topics such as agricultural production environmental resources and investment collaboration this book is ideally designed for policymakers business leaders and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Arctic region **Fighting for Partnership**

Lowell Turner, 1998 West Germany from 1949 to 1990 was a story of virtually unparalleled political and economic success. This economic miracle incorporated a well functioning political democracy expanded to include a social partnership system of economic representation. Then the Wall came down. Economic crisis in the East, industrial collapse, massive layoffs, a demoralized workforce triggered gloomy predictions. Was this the beginning of the end for the widely admired German model? Lowell Turner has extensively researched the German transformation in the 1990s. Indeed, in 1993 he was at the factory gates at Siemens in Rostock for the first major strike in post Cold War eastern Germany. In that strike and in a series of other incisively analyzed workplace and job developments in eastern Germany, he shows the remarkable resilience and flexibility of the German social partnership and the contribution of its institutions to unification. His controversial and to some radical findings will stimulate debate at home and abroad.

The Roots of Japan's Environmental Policies Anny

Wong, 2018-10-24 The study focuses on Japan's policies toward international environmental issues and includes case studies on whaling, deforestation in the tropics and acid deposition in Asia.

Indian Ocean Region Manoj Gupta, 2010-08-09 It is a privilege to introduce the reader to this book as I believe that it will make a significant contribution to given the difficulties in the knowledge of the Indian Ocean developing cooperation in the Indian Ocean region. There have been numerous failed efforts at regional cooperation in different fora in the Indian Ocean. As a result of the land based orientation of the people in the region, the importance for countries to develop the power to govern the sea has largely been ignored. The maritime approach taken by Manoj Gupta to the Indian Ocean as a region in international relations offers a timely and critical assessment of the potential for regional cooperation and ocean governance. The political leadership in the region can no longer ignore the need for cooperation in maritime affairs in the Indian Ocean. This book enriches the literature on Indian Ocean issues as it argues convincingly that the security of nations, economic well being of the people and health of the Indian Ocean cannot be divested from one another. All are fundamentally dependant on the ability of the countries in the region to individually and collectively exert the power to govern the sea.

International Politics and the Environment Ronald B

Mitchell, 2010 This title provides graduate students with a sophisticated overview of this increasingly important field, outlining the causes of international environmental problems and assessing the ways in which political responses have been formulated, implemented and evaluated.

Handbook of International Relations Walter Carlsnaes, Thomas Risse, Thomas Risse-Kappen, Beth A Simmons, 2002 NEW IN PAPERBACK FEBRUARY 2005 The most systematic and wide ranging survey of the multi faceted field of International Relations yet produced. It is sure to become a standard reference work and teaching text and is unlikely to be superseded at any time in the near future. It should be considered as essential reading. International Affairs. The Handbook of International Relations published 2002 in hardback quickly established itself as the benchmark volume providing a state of the art review and indispensable guide to the study of international relations. It is now released in paperback in order to be accessible to students in classroom use. Divided into three parts, the volume reviews both the

historical philosophical analytical and normative roots to the discipline and the key contemporary topics of research and debate today The first part introduces the major approaches within the field and unpacks many of the on going debates within the discipline including those between rationalist and constructivist approaches The second part moves on to explore the key concepts and contextual factors important to the subject from concepts like the state and power to international and transnational actors debates around globalization and contending feminist perspectives The final part reviews a number of the key substantive issues in international relations and is designed to complement the analytical tools and perspectives presented in Parts I and II Examples of the many topics included are foreign policy war and peace security nationalism and ethnicity finance trade development the environment and human rights

Nationalism, Liberalism, and Progress Ernst B. Haas, 2018-10-18 Far from being an inevitably aggressive and destructive force nationalism is for Ernst B Haas the primary means of bringing coherence to modernizing societies In the second volume of his magisterial exploration of this topic Haas emphasizes the benefits of liberal nationalism which he deems more progressive than other nation building formulas because it relies on reason to improve citizens lives The Dismal Fate of New Nations considers several societies that modernized relatively recently many of them aroused to nationalism by the imperialism of the old nation states The book probes the different patterns of development in emerging countries Iran Egypt India Brazil Mexico China Russia and Ukraine for insights into the possibilities and limitations of all nationalisms especially liberal nationalism Employing a systematic comparative perspective Haas organizes the book around the notion of change and its management by political elites in Asia Eastern Europe Latin America and the Middle East Haas particularly wants to understand how nationalism plays out in the politics of modernization within non Western cultures especially those where religions other than Christianity predominate Where the hold of religion remains formidable he argues the mixture of traditional and secular modernist institutions and beliefs will challenge the victory of liberal nationalism and the very success of nation state formation

International Studies Notes ,1994 At the Heart of the Union Neill Nugent, 2016-07-27 The European Commission is very much at the heart of the European Union Its wide variety of roles make it the institution most readily identified with the Union s many different activities Surprisingly relatively little has been written about this vital European institution This book makes a major contribution to furthering understanding of the Commission A broad range of different perspectives based on new research cover all aspects of its nature and functioning

A Sea Change: The Exclusive Economic Zone and Governance Institutions for Living Marine Resources Syma A. Ebbin, Alf H. Hoel, Are Sydnnes, 2005-06-07 This is the first systematic assessment of the international 200 mile exclusive economic zone To date 145 states have ratified the Law of the Sea Convention and most have established EEZs This volume focuses on the specific nature of the EEZ and the construction and evolution of institutions stemming from its introduction specifically examining developments at local national and international levels
