Polar Exploration Martyn Bramwell, 1998 Describes some of the many explorations made to both the North and South Poles Includes chronology of events Suggested level primary intermediate junior secondary **Polar Exploration** Martyn Bramwell, 1998 Describes some of the many explorations made to both the North and South Poles *Polar Exploration* Bramwell, Martyn, Winterbotham, Ann, Crosby-Fairall, Marje, 1999 Describes some of the many explorations made to both the North and South Poles **Journeys to Antarctica** Kalman Dubov, 2020-11-10 The continent of Antarctica shrouded in mist ice and frightful weather was a land of mystery for millennia Ancient and medieval cartographers and scientists pondered its reality considering the South Pole at the extreme of Earth the counterpart of the North Pole But it was only in the 17th and 18th centuries that brave captains piloting tiny ships by today's standards began plying these waters The myth of Terra Australis was soon debunked as the misty veil of ice and cold yielded its secrets Soon many explorers set themselves the task of mastering this secret and unknown land The story of such exploration is a fascinating tale of those who braved the ice and cold those who lived to tell the tale of their exploits and those who did not Today waters seas mountains and valleys are known by these hardy men and their feats of bravery The tale of exploration is also coupled with greed spurred by the advance of territorial claims over land and sea In this regard the British were foremost in this quest They were only halted by the adoption of the Antarctic Treaty System an international agreement that preserves and protects Antarctica from every mercantile endeavor at least until 2048 There are no human settlements on Antarctica save for research stations as scientist explorers further our collective understanding of the continent its flora and fauna its many water animals that come here and to understand the story hidden beneath hundreds of feet of solid ice Of greatest importance is the effect this continent has on the rest of the globe with its teeming billions and ecological effect the world has on this distant land This review discusses the explorers who first mapped the land and its waters who navigated these channels and so leading to the wider discovery of the continent itself The expansion of British interests in Antarctica was also spurred by the claim over the Falklands Islands resulting in the 1982 conflict between Britain and Argentina The Argentine invasion was repelled by British forces though Argentina continues to claim sovereignty over the islands For a time Britain declared sovereignty from the Falklands to the South Pole with overlapping claims from other countries None of these sovereignty claims however are recognized under the Antarctic Treaty Of special interest is the science applied to the continent which requires specialized training and expertise I review some of the science appreciating the dedication and determination of the men and women to understand this icy continent Speaking of women I was surprised to learn that women were forbidden from participating in exploration and scientific efforts based on nothing more than machismo men who decided this was no place for women The first women who pioneered and came to Antarctica faced a host of male dominated and demeaning attitudes until these attitudes changed I also explore a Jewish conundrum how to visit Antarctica either during its long summer or its dark winter

and remain true to Jewish tradition That tradition mandates following laws that are time sensitive by the rhythm of day and night which do not apply in this remote region Ancient precedent is used to apply a modicum of reality to this remote region I then discuss my two visits to the continent once about Holland America s Prinsendam and the second aboard the Amsterdam While both journeys were memorable the second voyage was overshadowed by Covid 19 In fact the latter journey ended in late March just two months later when all passengers were required to disembark in Perth Australia and had to immediately return home Unless one is a research scientist travel to Antarctica is commonly by cruise ship Even then the Antarctic mainland is not seen Instead the ship will visit various points in the Antarctic Peninsula a location that is closer to Ushuaia Argentina or Punta Arenas Chile These locations are Fin del Mundo the end of the earth the last human habitation before reaching the Antarctic land mass My visits were to the Peninsula with each trip lasting just four and one half days Combined these nine days remain memorable for the uniqueness as for their stark color extremes White and dark predominates here with few other colors marring the landscape If ever I had a bucket list these nine days filled the void of the only landmass on earth where extremes of ice and snow of dark colored penguins whales and seals contrasted with the icebergs and high granite peaks atop snow encrusted mountains I remain grateful for this incredible opportunity to visit this remote land cocooned aboard a large and warm vessel with fellow passengers seeking the see this remote and distant land I hope this review does justice to the beauty and cold silence of this remote land
