   Policing the Internet Alan Marzilli,2009 Examine the debate between supporters of free speech and those who think that free speech on the Internet has gone too far   **The Internet Police: How Crime Went Online, and the Cops Followed** Nate Anderson,2013-08-19 Describes how authorities in Australia Belgium Ukraine and the United States combined forces to respond to a child pornography ring as well as how other criminal sting operations have been policed and patrolled online   *Handbook of Internet Crime* Yvonne Jewkes,Majid Yar,2013-03-07 An essential reference for scholars and others whose work brings them into contact with managing policing and regulating online behaviour the Handbook of Internet Crime emerges at a time of rapid social and technological change Amidst much debate about the dangers presented by the Internet and intensive negotiation over its legitimate uses and regulation this is the most comprehensive and ambitious book on cybercrime to date The Handbook of Internet Crime gathers together the leading scholars in the field to explore issues and debates surrounding internet related crime deviance policing law and regulation in the 21st century The Handbook reflects the range and depth of cybercrime research and scholarship combining contributions from many of those who have established and developed cyber research over the past 25 years and who continue to shape it in its current phase with more recent entrants to the field who are building on this tradition and breaking new ground Contributions reflect both the global nature of cybercrime problems and the international span of scholarship addressing its challenges   **Policing the Internet** Peggy Daniels,2007 This book examines the topic of policing of the Internet by presenting readers with two sides to each point under debate Are teens in need of policing or are the dangers they face greatly exaggerated Readers will explore whether or not the Internet requires special policing and or regulation the threats posed by cyberterrorism and identity theft and the role both positive and negative of social networks Two essays on cyberbullying are also included Perspectives are presented from eyewitnesses scientific journals government officials and many others   **Technology-led Policing** Evelien De Pauw,Paul Ponsaers,Kees van der Vijver,Willy Bruggeman,Piet Deelman,2011 Technology has always played an important role in the performance of police tasks In recent years that role has not only expanded but has also been renewed On one hand technology plays a role in supporting policing closed circuit television scanning equipment technical methods of detection etc On the other hand new technology offers opportunities to commit crime particularly in the sphere of information technology which requires constant adjustments of the police in their investigation methods The use of

technology raises many interesting questions There are important privacy issues There are also consequences of investing in technology Additionally are police investigations keeping sufficiently up to date with technological developments including advances in computer technology as well as strong developments in the sphere of natural science This book originally a volume of the Journal of Police Studies examines the concerns and necessity for technology in poli   Policing Cybercrime David S. Wall,Matthew Williams,2017-12-22 Cybercrime has recently experienced an ascending position in national security agendas world wide It has become part of the National Security Strategies of a growing number of countries becoming a Tier One threat above organised crime and fraud generally Furthermore new techno social developments in social network media suggest that cyber threats will continue to increase This collection addresses the recent inertia in both critical thinking and the empirical study of cybercrime and policing by adding to the literature seven interdisciplinary and critical chapters on various issues relating to the new generation of cybercrimes currently being experienced The chapters illustrate that cybercrimes are changing in two significant ways that are asymmetrical On the one hand cybercrime is becoming increasingly professionalised resulting in specialists that perform complex and sophisticated attacks on computer systems and human users On the other the hyper connectivity brought about by the exponential growth in social media users has opened up opportunities to non specialist citizens to organise and communicate in ways that facilitate crimes on and offline While largely distinct these developments pose equally contrasting challenges for policing which this book addresses This book was originally published as a special issue of Policing and Society   Handbook of Policing Tim Newburn,2012-08-21 This new edition of the Handbook of Policing updates and expands the highly successful first edition and now includes a completely new chapter on policing and forensics It provides a comprehensive but highly readable overview of policing in the UK and is an essential reference point combining the expertise of leading academic experts on policing and policing practitioners themselves   Policing the Internet Roman Espejo,2012 These books provide a range of opinions on a social issue each volume focuses on a specific issue and offers a variety of perspectives e g eyewitness accounts governmental views scientific analysis newspaper accounts to illuminate the issue This edition in the At Issue series examines issues related to the policing of the Internet The title explores whether or not the Internet requires special policing and or regulation the threats posed by cyberterrorism and identity theft and the role b Greenhaven Press s At Issue series provides a wide range of opinions on individual social issues Enhancing critical thinking skills each At Issue volume is an excellent research tool to help readers understand current social issues and prepare reports   Law, Policy and the Internet Lilian Edwards,2018-11-29 This comprehensive textbook by the editor of Law and the Internet seeks to provide students practitioners and businesses with an up to date and accessible account of the key issues in internet law and policy from a European and UK perspective The internet has advanced in the last 20 years from an esoteric interest to a vital and unavoidable part of modern work rest and play As such an account of how the internet and its users are regulated is vital for

everyone concerned with the modern information society This book also addresses the fact that internet regulation is not just a matter of law but increasingly intermixed with technology economics and politics Policy developments are closely analysed as an intrinsic part of modern governance Law Policy and the Internet focuses on two key areas e commerce including the role and responsibilities of online intermediaries such as Google Facebook and Uber and privacy data protection and online crime In particular there is detailed up to date coverage of the crucially important General Data Protection Regulation which came into force in May 2018 **Crime and the Internet** David Wall,2003-09-02 Is the internet really powerful enough to allow a sixteen year old to become the biggest threat to world peace since Adolf Hitler Are we all now susceptible to cyber criminals who can steal from us without even having to leave the comfort of their own armchairs These are fears which have been articulated since the popular development of the internet yet criminologists have been slow to respond to them Consequently questions about what cybercrimes are what their impacts will be and how we respond to them remain largely unanswered Organised into three sections this book engages with the various criminological debates that are emerging over cybercrime The first section looks at the general problem of crime and the internet It then describes what is understood by the term cybercrime by identifying some of the challenges for criminology The second section explores the different types of cybercrime and their attendant problems The final section contemplates some of the challenges that cybercrimes give rise to for the criminal justice system The Internet, Law and Society Yaman Akdeniz,Clive Walker,David Wall,2000 On cyberspace controversies and the law **Policing China** Suzanne E. Scoggins,2021-06-15 In Policing China Suzanne E Scoggins delves into the paradox of China s self projection of a strong security state while having a weak police bureaucracy Assessing the problems of resources enforcement and oversight that beset the police outside of cracking down on political protests Scoggins finds that the central government and the Ministry of Public Security have prioritized stability maintenance weiwen to the detriment of nearly every aspect of policing The result she argues is a hollowed out and ineffective police force that struggles to deal with everyday crime Using interviews with police officers up and down the hierarchy as well as station data news reports and social media postings Scoggins probes the challenges faced by ground level officers and their superiors at the Ministry of Public Security as they attempt to do their jobs in the face of funding limitations reform challenges and structural issues Policing China concludes that despite the social control exerted by China s powerful bureaucracies security failures at the street level have undermined Chinese citizens trust in the legitimacy of the police and the capabilities of the state **The Net Is Closing** Yair Cohen,2017-03-03 The net is closing The e police are here Bringing to the fore a powerful debate about the future policing of the internet a platform from which the crying voices of victims of online crime can be loudly and clearly heard Telling a painful truth about what really happens online the net is closing birth of the e police calls out internet bullies and online anonymity and shines a bright light on who or what is behind policing our current virtual reality The book is a polemical work about online safety and policing It argues for a move away

from self policing and towards a more conventional form of state maintained supervision in the still relatively new sphere of human activity of the internet The inevitable conclusion that soon the internet will become neatly policed is primarily based on the author s extensive experience of working as a lawyer in the field of online defamation harassment and infringement of privacy Have you ever considered what society will look like in 5 10 or 50 years time without online law enforcement Have you or someone you know had their lives destroyed by trolls able to hide behind fake profiles but felt they had no one to turn to for redress Can you imagine what it feels like to receive death threats be sexually abused be too scared to leave the house or unfairly lose your small family business only to find that nobody really cares The author deploys his experience along with personal observations of the other forces which shape online behaviour such as the profit motive of large social media businesses to make a case for an approach to self expression and anonymity online which is more consistent with the real world already standards applied to offensive conduct by the state Through powerful real life stories addressing the conflict between emotion and logic the author tells the stories of a prominent football coach child abuser who carefully orchestrated sexual assaults on dozens of young victims so that he can freely share the videos of his abuse online and that of a school teacher whose innocent quest for companionship online turned into a pornographic nightmare involving blackmail and extortion by the Moroccan mafia and many more real life stories Urging the government relevant organisations and corporations to work towards providing a better safer future for us and our children this book turns up the heat on the privacy vs safety debate and puts forth some necessary yet somewhat controversial recommendations for change Determined purposive and armed with real life cases of online atrocities author and top UK Internet Lawyer Yair Cohen s fascinating insights into the internet and our society scares angers excited and disturbs Warning The Net Is Closing birth of the e police is not for the faint hearted After reading you will be on one side or the other **Policing the Internet in the Arab World** Rasha A. Abdulla,2009-07-29 New media scholars and human rights activists have argued that the Internet as a new medium should enjoy at least the same freedom of expression afforded to other media Some have even argued that the Internet by definition of its structure is a more democratic medium by nature and therefore should afford people even more freedom of expression than traditional media outlets However freedom of expression has always been a heated topic in the Middle East and the Arab world While most governments if not all claim to support and promote the principle of freedom of expression in reality government actions sometimes contradict these claims Furthermore in certain areas of the Arab world it seems that the indigenous people themselves are against certain aspects of freedom of expression especially if it touches upon sensitive areas such as religions traditions or moral values The question then becomes where the line is between freedom of expression and obscenity or profanity and who gets to draw this line Should drawing the line be an individual decision since this delineation may very well vary from one person to another or should an entity such as a government or a ministry or a religious authority draw the line for its people And if the latter is the case who in that authority decides where the line will be

and what are the standards that should be used to draw that line These are not easy questions to answer with regards to exposure to content through any medium but they are particularly difficult to answer when the Internet is the medium in question The reasons behind this fact have to do with the nature of the Internet as a media outlet that to a large extent amalgamates the personal with the mass and affords anybody the chance to be a publisher These factors are also used as arguments by those who advocate some kind of regulation or monitoring of the Internet for fear some sectors of society would be exposed to material that contradicts the general moral social cultural or religious traditions However quite often political factors also come into the equation and the monitoring or regulation of the Internet is then used to isolate or block people or entities with opposing political agendas or opinions to the mainstream governing voices thus creating an obvious obstacle to democracy and a serious threat to freedom of expression **Policing the Internet** Nicholas Redfearn,2000
