Policing Space Territoriality And The Los Angeles Police Department:

Policing Space Steve Herbert, 1996-11-15 *Policing Space* is a fascinating firsthand account of how the Los Angeles Police Department attempts to control its vast heterogeneous territory. As such, the book offers a rare ground level look at the relationship between the control of space and the exercise of power. Author Steve Herbert spent eight months observing one patrol division of the LAPD on the job. A compelling story in itself, his fieldwork with the officers in the Wilshire Division affords readers a close view of the complex factors at play in how the police define and control territory, how they make and mark space. A remarkable ethnography of a powerful police department underscored throughout with telling on the scene vignettes, this book is also an unusually intensive analysis of the exercise of territorial power and of territoriality as a key component of police power. Unique in its application of fieldwork and theory to this complex subject, it should prove valuable to readers in urban and political geography, urban and political sociology, and criminology, as well as those who wonder about the workings of the LAPD.

Policing Space Steven Kelly Herbert, 1997 *Policing Space* is a fascinating firsthand account of how the Los Angeles Police Department attempts to control its vast heterogeneous territory. Police, Power, and the Production of Racial Boundaries Ana Muñiz, 2015-08-03 Based on five years of ethnography, archival research, census data analysis, and interviews, *Police Power and the Production of Racial Boundaries* reveals how the LAPD, city prosecutors, and business owners struggled to control who should be considered dangerous and how they should be policed in Los Angeles. Sociologist Ana Muñiz shows how these influential groups used policies and everyday procedures to criminalize behaviors commonly associated with blacks and Latinos and to promote an exceedingly aggressive form of policing. Muñiz illuminates the degree to which the definitions of gangs and deviants are politically constructed labels born of public policy and court decisions, offering an innovative look at the process of criminalization and underscoring the ways in which a politically powerful coalition can define deviant behavior. As she does so, Muñiz also highlights the various grassroots challenges to such policies and the efforts to call attention to their racist effects. Muñiz describes the fight over two very different methods of policing: community policing, in which the police and the community work together, and the broken windows or zero tolerance approach, which aggressively polices minor infractions such as loitering to deter more serious crime. *Police Power and the Production of Racial Boundaries* also explores the history of the area to explain how Cadillac Corning became viewed by outsiders as a violent neighborhood and how the

city's first gang injunction a restraining order aimed at alleged gang members solidified this negative image As a result Mu iz shows Cadillac Corning and other sections became a test site for repressive practices that eventually spread to the rest of the city

The Police and Society Victor E. Kappeler, Brian P. Schaefer, 2018-09-11 The most productive route to understanding the dynamic interrelationships of the police with society is to examine the recurring central themes in policing The articles in this anthology represent some of the best scholarship on compelling issues Selected for both their complementary and competing natures the articles serve as touchstones for one another often challenging previous conceptions Many selections question the methods by which information was acquired the practices that evolved from that information and the background assumptions behind the construction of practices Some of the many issues and conflicts addressed in this collection include What is the nature of the police role and function Who benefits from police service Who is harmed How are public safety and social order secured while maintaining individual rights and freedoms To what extent do our expectations about the police and society reflect our values and demands Are the police a society unto themselves Is policing at a critical crossroads The editors assembled this volume with the goal of helping readers to identify underlying assumptions to dissect how values influence inquiries and to discover connections A better understanding of the role of the police in society provides a solid foundation for assessing the efficacy of future police society relationships

Terrorism, Risk and the Global City Jon Coaffee, 2016-03-16 First published in 2003 this account of the anti terrorist measures of London's financial district and the changes in urban security after 9 11 has been revised to take into account developments in counter terrorist security and management particularly after the terrorist attack in London on July 7th 2005 It makes a valuable addition to the current debate on terrorism and the new security challenges facing Western nations Drawing on the post 9 11 academic and policy literature on how terrorism is reshaping the contemporary city this book explores the changing nature of the terrorist threat against global cities in terms of tactics and targeting and the challenge of developing city wide managerial measures and strategies Also addressed is the way in which London is leading the way in developing best practice in counter terrorist design and management and how such practice is being internationalized

Banished Katherine Beckett, Steve Herbert, 2009-11-12 With urban poverty rising and affordable housing disappearing the homeless and other disorderly people continue to occupy public space in many American cities Concerned about the alleged ill effects their presence inflicts on property values and public safety many cities have wholeheartedly embraced zero tolerance or broken window policing efforts to clear the streets of unwanted people Through an almost completely unnoticed set of practices these people are banned from occupying certain spaces Once zoned out they are subject to arrest if they return effectively banished from public places Banished is the first exploration of these new tactics that dramatically enhance the power of the police to monitor and arrest thousands of city dwellers Drawing upon an extensive body of data the authors chart the rise of banishment in Seattle a city on the leading edge of this emerging trend to establish how it works and explore its

ramifications They demonstrate that although the practice allows police and public officials to appear responsive to concerns about urban disorder it is a highly questionable policy it is expensive does not reduce crime and does not address the underlying conditions that generate urban poverty Moreover interviews with the banished themselves reveal that exclusion makes their lives and their path to self sufficiency immeasurably more difficult At a time when more and more cities and governments in the U S and Europe resort to the criminal justice system to solve complex social problems Banished provides a vital and timely challenge to exclusionary strategies that diminish the life circumstances and rights of those it targets

Making the San Fernando Valley Laura R. Barraclough, 2011 In the first book length scholarly study of the San Fernando Valley home to one third of the population of Los Angeles Laura R Barraclough combines ambitious historical sweep with an on the ground investigation of contemporary life in this iconic western suburb She is particularly intrigued by the Valley s many rural elements such as dirt roads tack and feed stores horse keeping districts citrus groves and movie ranches Far from natural or undeveloped spaces these rural characteristics are she shows the result of deliberate urban planning decisions that have shaped the Valley over the course of more than a hundred years The Valley s entwined history of urban development and rural preservation has real ramifications today for patterns of racial and class inequality and especially for the evolving meaning of whiteness Immersing herself in meetings of homeowners associations equestrian organizations and redistricting committees Barraclough uncovers the racial biases embedded in rhetoric about open space and western heritage The Valley s urban cowboys enjoy exclusive semirural landscapes alongside the opportunities afforded by one of the world s largest cities Despite this enviable position they have at their disposal powerful articulations of both white victimization and with little contradiction color blind politics

Transnational Environmental Crime Rob White, 2017-07-05 The essays selected for this volume illustrate the growing interest in and importance of crime that is both environmental and transnational in nature The topics covered range from pollution and waste to biodiversity and wildlife crimes and from the violation of human rights associated with the exploitation of natural resources through to the criminogenic implications of climate change The collection provides insight into the nature and dynamics of this type of crime and examines in detail who is harmed and what can be done about it Differential victimisation and contemporary developments in environmental law enforcement are also considered Collectively these essays lay the foundations for a criminology that is forward looking global in its purview and that deals with the key environmental issues of the present age

Understanding Police Culture John P. Crank, 2014-09-25 Police culture has been widely criticized as a source of resistance to change and reform and is often misunderstood This book seeks to capture the heart of police culture including its tragedies and celebrations and to understand its powerful themes of morality solidarity and common sense by systematically integrating a broad literature on police culture into middle range theory and developing original perspectives about many aspects of police work

boundary identifying where it is located which processes and performances help construct and animate it and who takes part in them Although the relationship between prison and non prison has garnered academic interest from various disciplines in the last decade the cultural performance of the boundary has been largely ignored This book adds to the field by exploring the complexity of the material and symbolic connections that exist between society and carceral space Drawing on a range of cultural examples including governmental legislation penal tourism prisoner work programmes and art by offenders Jennifer Turner attends to the everyday practised manifestations and negotiations of the prison boundary The book reveals how prisoners actively engage with life outside of prison and how members of the public may cross the boundary to the inside In doing so it shows the prison boundary to be a complex patchwork of processes people and parts The book will be of great interest to scholars and upper level students of criminology carceral geography and cultural studies *Police Ethics* Tom

Mohammad-Mahmoud Ould Mohamedou,2017-11-20 The Islamic State of Iraq and Syria has been the subject of intense scrutiny in the West Considered by many to be the most dangerous terrorist organisation in the world it has become shrouded in numerous myths and narratives many emanating from the US which often fail to grasp its true nature Against these narratives Mohammad Mahmoud Ould Mohamedou presents a bold new theory of ISIS By tracing its genealogy and documenting its evolution in Iraq and Syria he argues that ISIS has transcended Osama Bin Laden s original project of Al Qaeda mutating into an unprecedented hybrid form that distils postcolonial violence postmodernity and the emerging post globalisation international order This book analyses ISIS from a social sciences perspective and unpacks its dynamics by looking beyond superficial questions such as its terrorist nature and religious rhetoric It transforms our understanding of ISIS and its profound impact on the very nature of contemporary political violence **Handbook on the Geographies of Power**

Mat Coleman,John Agnew,2018-07-27 The so called spatial turn in the social sciences means that many researchers have become much more interested in what can be called the spatialities of power or the ways in which power as a medium for achieving goals is related to where it takes place Most famous authors on the subject such as Machiavelli and Hobbes saw power as entirely equivalent to domination exercised by some over others Though this meaning is hardly redundant understandings of power have become more multidimensional and nuanced as a result of the spatial turn Much recent writing in human geography for example has rigorously extended use of the term power beyond its typical understanding as a resource that pools up in some hands and some places to a medium of agency that has different effects depending on how it is deployed across space and how actors cooperate or not to give it effect To address this objective the book is organized thematically into four sections that cover the main areas in which much of the contemporary work on geographies of power is concentrated bodies economy environment and energy and war *Urban and Regional Planning and Development* Rajiv R.

Thakur,Ashok K. Dutt,Sudhir K. Thakur,George M. Pomeroy,2020-02-10 This book discusses urban planning and regional development practices in the twentieth century and ways in which they are currently being transformed It addresses questions such as What are the factors affecting planning dynamics at local regional national and global scales With the push to adopt a market paradigm in land development and infrastructure the relationship between resource management sustainable development and the role of governance has been transformed Centralized planning is giving way to privatization not only in the traditional regions but also in newly emerging regions of Asia Africa and Latin America Further attempts are being made to bring planning related decision making closer to the people who are most affected by it Presenting a collection

of studies from scholars around the world and highlighting recent advances in the field the book is a valuable reference guide for those engaged in urban transformations whether as graduate students researchers practitioners or policymakers

The SAGE Handbook of Qualitative Geography Dydia DeLyser, 2010 The process of learning qualitative research has altered dramatically and this Handbook explores the growth change and complexity within the topic and looks back over its history to assess the current state of the art and indicate possible future directions Moving beyond textbook rehearsals of standard issues the book examines key methodological debates and conflicts approaching them in a critical discursive manner

On the Frontlines of the Welfare State Barry Goetz, 2017-02-17 Although public safety agencies protect our well being they also shape social problems and community inequities Public safety protections promote what T H Marshall called social rights of equitable citizenship Frontlines of Welfare State shows how public safety agencies function as welfare state agencies responsible for a range of essential public functions including emergency service criminal investigation regulatory oversight and social service outreach Furthermore this volume shows how public safety agencies are being asked to absorb more social welfare functions amidst cut backs in other areas of the welfare state Two areas of public safety are examined arson control and fire prevention especially within the contexts of urban change and gentrification and community policing especially as a mechanism of expanding drug treatment service and prevention programs Facilitating a greater understanding of institutional biases within the state built around organizational structures procedures and cultures and their impact on social outcomes this original and exciting book will be of interest to researchers practitioners and undergraduate and postgraduate students in the fields of Policing and Fire Control Public Policy and Administration Drugs and Substance Abuse and White Collar Crime

Citizens and borderwork in contemporary Europe Chris Rumford, 2013-10-31 The extent to which ordinary people can construct shift and dismantle borders is seriously neglected in the existing literature The book explores the ability of citizens to participate in the making of borders and the empowerment that can result from this bordering and debordering activity Borderwork is the name given to the ways in which ordinary people can make and unmake borders Borderwork is no longer only the business of nation states it is also the business of citizens and indeed non citizens This study of borderwork extends the recent interest in forms of bordering which do not necessarily occur at the state s external borders However the changing nature of borders cannot be reduced to a shift from the edges to the interior of a polity To date little research has been conducted on the role of ordinary people in envisioning constructing maintaining shifting and erasing borders creating borders which facilitate mobility for some while creating barriers to mobility for others appropriating the political resources which bordering offers contesting the legitimacy of or undermining the borders imposed by others This book makes an original contribution to the literature and stands to set the agenda for a new dimension of border studies This book was published as a special issue of Space and Polity
