children have a place and where difference is a natural part of what it is to be a human being Based on this understanding many countries around the world are moving towards more inclusive education systems However working against inclusive education are forces of exclusion factors that act to exclude and marginalize minority students from participation and learning at school Therefore in order to progress the principles and practices of inclusive education an examination of the construct of exclusion is critical Important questions to be interrogated if inclusive education is to be a reality are What is exclusion Why does it occur How can it be reduced and eliminated This book critically examines the construct of exclusion exploring how disabled students experience exclusion both from and within school and suggesting reasons why this occurs Finally key foci for change are proposed as platforms for interrogating reducing and eliminating the forces of exclusion
