Policy And Practice In Further Education Managing The Proceeb Of Change:

Making Managers in Universities and Colleges Craig Prichard, 2000-06-16 This book provides an alternative means of discussing the development and significance of managers and management in universities and colleges It is particularly concerned with the way managing involves the development of different ways of talking acting and relating to people at work Yet this is often difficult and variably successful as it confronts often strong professional and occupational work identities and cultures The book provides a detailed look at the manager in contemporary further and higher education in Britain as post compulsory education has been required to operate on a more commercial basis and universities and colleges are increasingly regarded as small to medium sized enterprises It draws upon interviews with more than 70 senior post holders It explores for example the work of the traditional university vice chancellor who came to see himself as the new chief executive schooled himself in the works of international management gurus Henry Mintzberg and Tom Peters and engaged his 3000 staff in the virtues of thriving on chaos The result as one seasoned higher education observer has noted was 18 months of misery for university personnel It tells the story of the professor of material science who came to see himself as small businessman responsible for maintaining a 2 million a year departmental turnover But at the same time he considered this new identity to be constantly hamstrung by the bureaucratic centralism of his university It tells the stories of senior women administrators who empowered by their appointment as managers challenged the deeply embedded paternalism of their senior academic colleagues And it tells the stories of numerous heads of department and sections repositioned as managers in the new marketized further education who have struggled to re imagine students as funding units and colleagues as their staff Craig Prichard provides a highly nuanced theoretically sophisticated and critically informed account of the repositioning of senior university and college academics as managers This is important reading for those interested in post compulsory education public sector management and the sociology of work and education and of course for university and college managers themselves

Register of Educational Research in the United Kingdom National Foundation For Educational Research, 2005-11-30 The latest volume of The Register of Educational Research in the United Kingdom lists the major research projects being undertaken in Britain during the latter months of 1994 the whole of 1995 and 1996 and the early months of 1997

School Leadership and Strategy in Managerialist Times Scott Eacott, 2012-01-01 This book is dedicated to an analysis and synthesis of research on strategy and school leadership with the ultimate goal of suggesting a new research programme Each chapter takes up this challenge through different means resulting in an overview of the construct of strategy within the practice of school leadership It is hoped that each of these chapters encourages students practitioners and scholars to continue to investigate this important topic and to undertake the methodological challenges set out to advance our understanding of strategy and school leadership in managerialist times Despite maintain a primarily scholarly focus as such a focus is exceedingly important for the advancement of any domain of inquiry it is also recognised

that many of the ideas discussed have profound practical significance for schools and those who lead and manage them The arguments in this book particularly those in the latter chapters seek to expand the horizons of scholarship and understanding on the topic of strategy and school leadership Although this should not be interpreted as a prescriptive call for how further inquiry should be undertaken it is but one voice in the conversation The reviews studies analysis and proposed research programme of this book argue that the strategies of school leaders are of considerable theoretical and practical importance to schools the governance of schooling and the behaviour and performance of schools While this book offers a blueprint for further inquiry it remains for the reader to accept the challenge Doing so will enable important new insights into strategy and school leadership

Register of Educational Research in the United Kingdom ,1995 *Managing Further Education* Jacky Lumby,2001-07-23 The incorporation of the further education sector in 1993 was followed by a period of extreme turbulence Colleges plunged into the complex task of managing huge organizations while under pressure from cuts in funding and a steady expansion in the number and range of students While financial scandals may have attracted attention the success of the further education sector in continuing to provide a vital educational service for millions of people has been less recognized Despite the significant contribution of the sector to education and training practitioners struggle to find adequate research evidence on which to base reflection and practice They need material relevant to the specific situation of managers working w

Out-of-Field Teaching Practices Anna Elizabeth du Plessis,2017-04-17 Society perceives the role of school leaders as fixers Yet the author poses some confronting questions can they fix or manage the out of field phenomenon without having in depth knowledge and understanding Can educators teach the next generation of teachers and school leaders without appreciating the realities of the workplace Can policymakers develop effective policies without a deeper understanding of the workforce issues that influence quality education beyond the obvious issues Many dilemmas face today s teaching workforce and workplaces The book takes the reader on a journey as experienced in real life by teachers and school leaders It aims an extreme global focus on the quality of education and on governments achievements in providing opportunities to prepare the next generation of students for their future The author s assessment exposes more concerns than assurances Anna du Plessis academic career includes more than 25 years of classroom experience across three countries Her journey in leadership positions started during her fourth year of teaching Her compassion for teachers school leaders and students stimulated a search for a deeper understanding of the lifeworld and challenges facing educational practitioners The objective in this book is to share information that will improve education systems strategies decisions policies and actions Readers of this book might be parents student teachers prospective school leaders educational directors policymakers or teacher educators Only knowing and understanding can inform well directed decisions
