Furusten,2016-12-01 It is often claimed that we live in an expert society a society where more and more individuals take expert roles in increasingly narrow fields In contrast to more traditional experts most of these new experts lack generally accepted mechanisms for the certification and legitimation of their expertise This book focuses on these new as well as established experts and the efforts undertaken to secure and legitimate their expertise We view these efforts as organizing attempts and study them on four different levels the society the market the organization and the individual Based on empirical studies on these four levels of analysis The Organization of the Expert Society makes the argument that current organizing initiatives in the expert society are based in an objectifying view of expertise that risks concealing and downplaying key aspects of expertise Well intended organizing initiatives in the expert society thus run the risk of promoting ignorance rather than securing expertise Focusing on a current general and global phenomenon the rise and organization of an expert society The Organization of the Expert Society will be key reading for scholars academics and policy makers in the management fields of Organizational Theory Management Consulting Organizations Society Critical Management Studies as well as the disciplines of Sociology Political Science and Social Anthropology **Handbook of Critical Policy Studies**

Voluntary Disruptions Abraham L. Newman, Elliot Posner, 2018-03-09 From home mortgages to iPhones, basic elements of our daily lives depend on international economic markets. The astonishing complexity of these exchanges may seem ungoverned. Yet the global economy remains deeply bound by rules. Far from the staid world of treaties and state-to-state diplomacy, economic governance increasingly relies on a different class of international market regulation: soft law, comprised of voluntary standards, best practices, and recommended guidance created by a motley assortment of international organizations. *Voluntary Disruptions* argues that international soft law is deeply political, shaping the winners and losers of globalization. Some observers focus on soft law's potential to solve problems and coordinate market participants. *Voluntary Disruptions* widens the discussion, shifting attention to the ways soft law provides new political resources to some groups while not to others, and alters the sites of contestation and the actors who participate in them. Highlighting two mechanisms—legitimacy claims and arena expansion—the book explains how soft law, typically viewed as limited by its voluntary nature, disrupts and transforms the politics of economic governance. Using financial regulation as its laboratory, *Voluntary Disruptions* explains the remarkable pre-crisis alignment of US and European approaches to governing markets, the rise and prominence of transnational industry associations in the 1990s and 2000s, and the ambivalence of US reforms towards international market cooperation in the wake of the 2008 financial crisis. Rethinking scholarly and policy approaches to international soft law, this volume answers enduring and pressing questions about global finance, international relations, and power transformations in governance. It is a major new academic book series from Oxford University Press. It is designed to accommodate the impressive growth of research in comparative politics, international relations, public policy, federalism, and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions, subnational governments, and public-private networks. It brings together work that advances our understanding of the organization, causes, and

consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford
