a synthetic approach for examining and explaining EU policy making The focus of his analysis is on the European Commission's two pronged strategy of liberalisation and harmonisation which began in the late 1980s and culminated in an important milestone on January 1st 1998 when the EU Member States fully opened their telecommunications markets to competition He concludes that a synthetic approach which enables the researcher to apply a number of approaches to multiple settings and various levels of analysis is useful even necessary in understanding and explaining the many dimensions of EU policy making This authoritative study will be of interest to all those in the telecommunications industry including attorneys consultants and lobbyists who would like to know how the EU's policy developed It will appeal more generally to political scientists and scholars of European history and politics *Policy Making in the European Union - Policy Making and Implementation* Heiko Bubholz, 2002-07-19 Seminar paper from the year 2002 in the subject Politics Topic European Union grade 1.0 Jagiellonian University in Krakow Centre for European Studies course EU Law and Institutions language English abstract Now in January 2002 a visible step in European integration has been accomplished With the introduction of the European currency about 296.8 million citizens¹ of the European Union EU will hold the new symbols of unity of Europe's peoples in their hands What began with an attempt of reconciliation and co-operation via the ECSC in 1952 has now developed towards a so far unprecedented transfer of sovereign rights and competence from nation states to a supranational intergovernmental organisation However throughout the EU prevail doubts concerning the deeper mechanism of policy making Despite certain inscrutability and the mysterious nature of decision making there are demands for more democracy in the Union On the other side it may be assumed that most of the European citizen do not really take notice of high and low politics decided upon in the European institutions Aim of this paper shall therefore be a closer elaboration of the policy making process in the European Union the enforcement of decisions on European and national level and finally influences or interdependencies from outside the formal institution interfering in Europe's policy and polity Hence the results of the Nice IGC are not ratified yet which might not be assumed soon I focus on the binding regulations of the Amsterdam Treaty² After a short description of the as I would prefer to name it macro level Commission Council Parliament Courts where provisions are concluded the implementation of these policies and decisions on the micro national level shall be explained thereafter Finally outside impetus lobbying national interests etc on the decision and interpretation process shall be elaborated in a limited scope as well European Union in the Global Context Simon Sweeney, 2023-12-22 European Union in the Global Context explores the interplay between the state and state sovereignty nationalism European integration and globalisation It provides essential foundations in these areas while using stimulating arguments to prompt discussion and provoke interest in the relationships between these processes It critically analyses the challenges faced by the EU from the contemporary political and economic dynamics of globalisation IPE including trading relationships set through the WTO and bilateral relations with emerging markets especially the BRICS economies Likewise pressures from within such as a

resurgence of nationalism localisation anti austerity politics and Euroscepticism are examined While the Union is fundamentally challenged by pressures from above and below and by its own internal dysfunction it remains central to the effective management of the international political economy European Union in the Global Context is a lively focused and engaging text incorporating anecdotes and contemporary arguments and presenting different perspectives on European integration and globalisation It will be of key interest to students of European Politics European Studies European Union Studies and more broadly global political economy foreign and security policy and international relations

EU Environmental Policies in Subnational Regions Antje C.K. Brown,2017-10-05 This title was first published in 2001 Despite the fact that environmental directives are one of the strongest areas of policy decreed by the EU it has a much poorer record when it comes to actual implementation of these policies Instead of focusing on the traditional state centrist accounts this book compares two subnational regions within the EU Scotland and Bavaria and their role in the policy process The author offers a multi layered implementation map which highlights three main government layers involved in the filtering process and identifies various formal and informal determinants which shape EU environmental policies during the process The book not only compares implementation performances between the two regions and their respective states but also compares the region s processes against the national processes thereby exposing determinants that would otherwise remain undetected In doing so it confirms that subnational regions feature determinants which differ in many respects from national determinants and influence the effectiveness of EU environmental policies The book contributes to a better understanding of the implementation deficit and presents a more refined picture of the EU environmental policy reality
