Howe Institute,1990 Reviews major developments affecting the Canadian economy and addresses the key policy areas that will demand the attention of Canadian governments in coming years It is a collection of essays by different authors resting on a common philosophical foundation but reflecting the particular concerns and policy priorities of each author **Employment and Economic Performance** Jonathan Michie,John Grieve Smith,1997 With the end of the post war boom in the early 1970s the world economy has experienced large scale unemployment From an assumption that the unemployment problem had been solved and that full employment could be maintained through demand management techniques we now live in an entirely different world Any suggestion of a return to full employment is met with questions of whether such a thing is possible whether it would not lead to inflation or to excessive trade union power or in the case of individual economies to unsustainable balance of payment deficits The contributors to this volume ask whether full employment policies would be affordable Would they lead to yawning fiscal deficits which would in the end require a U turn in policy with unemployment reappearing This well informed and original contribution to current policy debate faces up to these questions and considers what would be involved in a move to much lower levels of unemployment Money and Macroeconomics David E. W. Laidler,1997-01-01 Money and Macroeconomics is a significant collection of David Laidler s most important papers on the so called monetarist counter revolution This volume contains both published and unpublished examples of his influential contribution detailing empirical work on the demand for money the economics of inflation the foundations of the buffer stock approach to monetary theory the monetarist critique of new classical economics and issues of economic policy *APAIS 1991: Australian public affairs information service* ,
