**Analogies and Models in Science and Theology** Humphrey Uchechukwu Ude,2024-07-17 This book uses the tenets of Hesse s Network Model of theory NMT to debunk scientism and argue for the indispensability of socio cultural matrices including theological values in the search for objective knowledge It is unique in many respects First it uses the notion of analogies and models to evaluate the structure of scientific knowledge and extrapolates its findings in Christian theological discussions Second there is no known scholarly work to the best of my knowledge which does an in depth and extensive study of Mary Hesse from the point of view of her NMT It uses the notion of entrenchment not only to distinguish itself from other related concepts such as holism but also to support the argument on invariance theory observation statements Third it underscores the indispensability of socio cultural matrices in the search for knowledge by identifying a link between Hesse and Habermas in what I call Hesse Habermas Sociology of Knowledge Finally it employs the notion of metaphoric redescription to argue that both science and theology deal with interpretation of observed phenomena It is a reliable source to all interested in epistemological debates philosophically minded students of science and scientifically minded philosophers theologians metaphysicians students of religion and sociology especially students of Habermas

Warring with Words Michael Hanne, William D. Crano, Jeffery Scott Mio, 2014-08-01 Scholars in many of the disciplines surrounding politics explicitly utilize either a narrative perspective or a metaphor perspective though rarely the two in combination to analyze issues theoretical and practical domestic and international in the broad field of politics Among the topics they have studied are competing metaphors for the state or nation which have been coined over the centuries in diverse cultures the frequency with which communal and international conflicts are generated at least in part by the clashing religious and historical narratives held by opposing groups the cognitive short cuts employing metaphor by which citizens make sense of politics the need for political candidates to project a convincing self narrative the extent to which the metaphors used to formulate social issues determine the policies which will be developed to resolve them the failure of narratives around the security of the nation to take account of the individual experiences of women and children This volume is the first in which eminent scholars from disciplines as diverse as social psychology anthropology political theory international relations feminist political science and media studies have sought to integrate the narrative and the metaphor perspectives on politics It will appeal to any scholar interested in the many ways in which narrative and metaphor function in combination as cognitive and rhetorical instruments in discourse around politics Public Administration Series--Bibliography, 1985

**Bounded Rationality and Politics** Jonathan Bendor, 2010-06-02 In *Bounded Rationality and Politics* Jonathan Bendor considers two schools of behavioral economics the first guided by Tversky and Kahneman's work on heuristics and biases which focuses on the mistakes people make in judgment and choice the second as described by Gerd Gigerenzer's program on fast and frugal heuristics which emphasizes the effectiveness of simple rules of thumb Finding each of these radically incomplete Bendor's illuminating analysis proposes Herbert Simon's pathbreaking work on bounded rationality as a way to reconcile the inconsistencies between the two camps Bendor shows that Simon's theory turns on the

interplay between the cognitive constraints of decision makers and the complexity of their tasks
