## **Political Consultants And Negative Campaigning:**

Political Consultants and Negative Campaigning Kerwin C. Swint, 1998-01-22 One of the most closely watched and controversial aspects of modern political campaigning is the use of negative attack tactics This book examines the role played by negative campaigning through a national survey of professional political consultants Campaign consultants have become vitally important to political candidates in recent years as strategists fundraisers and media specialists The research in this book focuses on how consultants define negative campaigning including the differences between issue attacks and character attacks how and when criticism of the opponent should be implemented and which media should be used to deliver attack messages A statistical analysis of the survey data reveals insights into behavioral and professional differences among consultants with regard to party affiliation gender age and level of experience

**Mudslingers** Kerwin C. Swint, 2006 Americans have a love hate relationship with negative campaigning claiming to despise it and ranting about how it turns off the electorate while at the same time paying an increasing amount of attention to negative ads and tactics during ever lengthening campaign seasons Swint gathers the most compelling of these campaigns from the two Golden Ages of negative campaigning 1864 to 1892 and 1988 to the present in addition to some that fall outside those demarcations and ranks them in descending order from No 25 to No 1 Mudslingers covers presidential senatorial gubernatorial and mayoral races and chronicles the dirtiest most low down campaign tactics of all time The list includes the presidential campaign of 1800 when the disputed outcome of the race between Thomas Jefferson and John Adams had to be decided by the House of Representatives and the election of 2004 in which George W Bush beat John Kerry after one of the nastiest showdowns on record The first round of negative campaigning in American history was driven by post Civil War politics the end of Reconstruction an increasingly corrupt federal government and a rabid partisan press The current Golden Age of mudslinging and dirty politics is driven by huge increases in campaign spending television advertising decreased civility in public life and a muckraking mass media These fascinating stories from the annals of negative campaigning will entertain as well as educate reminding us the next time we are tempted to decry the current climate that it was almost ever thus

**Campaigns and Elections** Robert P. Watson, Colton C. Campbell, 2003 Examines elections at the federal state and local levels covering such topics as the use of political consultants polling campaign finance reform and partisan politics

Political Consultants and Campaigns Jason Johnson, 2011-08-02 A unique empirical and theoretical analysis of political consultants and how they achieve electoral success for their candidates

Political Consultants and Campaigns Jason Johnson, 2018-04-19 Political Consultants and Campaigns One Day to Sell examines the differences between how political science theory suggests campaigns should be run and how political consultants actually run campaigns In the wake of consultants who effortlessly move from campaigners to policymakers the dearth of knowledge about the attitudes beliefs and strategies of the consultants themselves is still a glaring absence in the analysis of American politics How can we purport to

know what is happening in American political campaigns if we don't know what is on the minds of the men and women who run them. This book provides a clearer understanding of modern day political campaigns by revealing what is on the minds of the people who run them. With original data from consultants, campaign managers and professional campaign schools, author Jason Johnson examines consultant behavior on message formation, policy positioning, candidate recruitment, Internet strategy and negative advertising and compares these practices to existing political science theory. This groundbreaking research makes *Political Consultants and Campaigns One Day to Sell* a must-have resource for all students of American politics, campaign managers or anyone interested in how political campaigns in America are run.

**Political Consultants and Voter Turnout: the Effects of Targeting and Negative Campaigning** John C. Blackburn, 1992

**Negative Political Advertising** Karen S. Johnson-Cartee, Gary Copeland, 2013-12-16. This volume provides a unique synthesis of the relevant literature from academic studies in the fields of political science, marketing, advertising, speech, communication, telecommunication and public relations combined with the practical wisdom of professional consultants. Offering the reader both the theory and practical applications associated with negative political advertising, this is the first book devoted exclusively to the various forms of negative campaigning in the United States. After developing a typology of negative political spots for greater clarity in explaining and evaluating them, the book addresses effectiveness questions such as: What works? When? Why? and How?

*Going Dirty* David Mark, 2006-03-19. *Going Dirty* is a history of negative campaigning in American politics and an examination of how candidates and political consultants have employed this often controversial technique. The book includes case studies on notable races throughout the television era in which new negative campaign strategies were introduced or existing tactics were refined and amplified upon. Strategies have included labeling opponents from non-traditional political backgrounds as dumb or lightweight, an approach that got upended when a veteran actor and rookie candidate named Ronald Reagan won the California governorship in 1966, setting him on a path to the White House. The negative tone of campaigns has also been ratcheted up dramatically since the terrorist attacks of September 11, 2001. Campaign commercials now routinely run pictures of international villains and suggest, sometimes overtly and at other times more subtly, that political opponents are less than resolute in prosecuting the war on terror. The book also outlines a series of races in which negative campaigning has backfired because the charges were not credible or the candidate on the attack did not understand the political sentiments of the local electorate they were trying to persuade. The effect of newer technologies on negative campaigning is also examined, including blogs and Web video in addition to tried and true methods like direct mail.

*The Positive Case for Negative Campaigning* Kyle Mattes, David P. Redlawsk, 2014. For decades the conventional wisdom has been that voters hate negative campaigning. Some have even argued that it can be a deterrent to voting at all. *The Positive Case for Negative Campaigning* shows that negativity in campaigns is not only necessary but is also often viewed as acceptable by voters themselves. The most comprehensive treatment to date of negativity in campaigns, Mattes and Redlawsk

s book attacks the subject using a host of different approaches including formal models survey research and laboratory experiments The ability of candidates to go on the attack and to explicitly focus on information that otherwise would not be revealed provides voters with more and fuller information than they would have otherwise had At the same time the authors find that voters can and do accept negativity as a legitimate part of the political environment Much of their supposed dislike can be explained by how survey questions are worded Voters responses to negativity vary greatly and can be better explained by the content and believability of the ads than simply by whether the ads are negative All told Mattes and Redlawsk make an original and compelling case that voters are not as negative about negativity as previously believed as well as for its positive benefits in political campaigning
