Political Economy Of Basic Human Needs:

The Political Economy of Basic Human Needs Bruce Edward Moon, 1991 This volume reflects a new emphasis in development economics on conditions that promote the realization of human potential Moon defines development goals as attainment of basic needs and the reduction of absolute poverty He evaluates the effects of the state and political system as well as the role of the military in relation to these goals and makes a careful distinction between absolute poverty of basic needs deprivation and the relative poverty associated with income inequality Asserting that the normative case for concern with the poor is unassailable universal and compelling the author insists that the provision of basic needs may be necessary for rapid growth The volume includes a discussion of methodological premises in an appendix ISBN 0 8014 2448 8 45 00

The Political Economy of Poverty, Vulnerability and Disaster Risk Management Munyaradzi Mawere, 2017-11-29 Poverty remains a thorny and topical challenge and research topic to scholars and researchers on African development Scholars in the Global North have since the Second World War sought to research poverty and underdevelopment in Africa postulating what they think are the major causes of insipid and abject poverty in the continent but with little or no success on how to solve the poverty enigma Sadly little research and homework have been done by scholars in context in Africa on why there seems to be more production rather than eradication of poverty and vulnerability in Africa and among Africans This book is born out of the realisation for the need for both scholars on the ground and outside Africa to earnestly interrogate and reflect on the poverty situation that continues to haunt the people of Africa and rattle the conscience of the world at large With contributors from across the continent and beyond the volume offers a balanced and rigorous multi faceted analysis of Africa's poverty and vulnerability from a rich tapestry of perspectives The volume is handy to scholars and students in the fields of African and development studies as well as to students of Sociology Anthropology Political Science and Policy Studies

Political Economy from Below Rob Knowles, 2017-07-05 Communitarian anarchism is a generic form of socialism that denies the need for a state or any other authority over the individual from above and which requires absolute belief that the individual cannot exist outside of a community of others This book suggests that the communitarian anarchists of the nineteenth century developed and articulated a distinct tradition of economic thought The period of this study begins with the first major writing of the French communitarian anarchist Pierre Joseph Proudhon in 1840 and ends with the temporary burial of anarchist theorizing at the beginning of the First World War in 1914 However the tradition of communitarian anarchist economic thought did not end in 1914 The economic thought explored in this book provides a fresh perception of the fragmentation evident in many societies today especially where there is a substantial informal economy *Global Political Economy* Theodore H.
