**The Political Logic of Privatization** Mariusz Dobek,1993      The Political Logic of Privatization Mariusz M.

Dobek,1993-10-30 This book develops an analytical framework for the examination of the politics of privatization Dobek argues that privatization is a strategy that politicians employ in their drive for power The material resources and formal powers that governments have at their disposal make them great patrons for building coalitions intended to promote interests of political parties The author further argues that based on the examples of Great Britain and Poland any privatization campaign is ultimately shaped by political rather than economic concerns This book will be of interest to scholars and students of politics and economics

**Privatizing Poland** Elizabeth Cullen Dunn,2015-09-25 The transition from socialism in Eastern Europe is not an isolated event but part of a larger shift in world capitalism the transition from Fordism to flexible or neoliberal capitalism Using a blend of ethnography and economic geography Elizabeth C Dunn shows how management technologies like niche marketing accounting audit and standardization make up flexible capitalism s unique form of labor discipline This new form of management constitutes some workers as self auditing self regulating actors who are disembedded from a social context while defining others as too entwined in social relations and unable to self manage Privatizing Poland examines the effects privatization has on workers self concepts how changes in personhood relate to economic and political transitions and how globalization and foreign capital investment affect Eastern Europe s integration into the world economy Dunn investigates these topics through a study of workers and changing management techniques at the Alima Gerber factory in Rzesz w Poland formerly a state owned enterprise which was privatized by the Gerber Products Company of Fremont Michigan Alima Gerber instituted rigid quality control job evaluation and training methods and developed sophisticated distribution techniques The core principle underlying these goals and strategies the author finds is the belief that in order to produce goods for a capitalist market workers for a capitalist enterprise must also be produced Working side by side with Alima Gerber employees Dunn saw firsthand how the new techniques attempted to change not only the organization of production but also the workers identities Her seamless engaging narrative shows how the employees resisted redefined and negotiated work processes for themselves      Learning, Policy Making, and Market Reforms

Covadonga Meseguer Yebra,2009-03-30 In the 1980s and 1990s market reforms swept the world It is widely believed that the reformist wave can be partly explained in terms of the lessons learned from policy failures of the past Whereas this interpretation of events is well established it has never been empirically proved Learning and Market Reforms is the first study that tests the impact of policy learning on economic policy choices across time and space The study supports the popular explanation that on average governments around the world adopted privatization and trade liberalization and sustained open capital accounts as a result of learning from the experience of others      *The Political Logic of Privatization* Mariusz M. Dobek,1993-10-30 This book develops an analytical framework for the examination of the politics of privatization

Dobek argues that privatization is a strategy that politicians employ in their drive for power. The material resources and formal powers that governments have at their disposal make them great patrons for building coalitions intended to promote interests of political parties. The author further argues that based on the examples of Great Britain and Poland any privatization campaign is ultimately shaped by political rather than economic concerns. This book will be of interest to scholars and students of politics and economics.

**How Governments Privatize** Mark Cassell, 2003-08-01 Governments throughout the world confront enormous challenges when divesting. Whether it is poor performing bank loans in Japan and Korea, military bases in the United States or real estate in eastern Europe, the challenge of public divestment is more than just a question of how to map a path to economic efficiency. Conventional wisdom in public management and privatization literature says that the execution of such enormous tasks as divestment is typically done poorly and that the government strategy is likely to be inefficient. Mark Cassell argues that privatization must be understood as a political and administrative puzzle rather than simply an exercise in economic efficiency. This study of two successful divestment agencies, the U.S. Resolution Trust Corporation and the German Treuhandanstalt, presents a complex understanding of the two agencies' performance in privatizing hundreds of billions of dollars of assets following two very different crises: the savings and loan debacle in the United States and unification in Germany. In the U.S. the worst economic problem since the Great Depression forced the government to recreate and reshape private property on an immense scale. In Germany, melding East and West Germany involved converting an entire national economy that employed more than four million people. In each case, unassuming public agencies handled two of the largest public sales of assets in this century. Cassell identifies the importance and effects of managerial structures and of national institutions, legislatures and executives on the outcomes of the reform efforts. This book will be of interest to those interested in alternatives to traditional public sector structures, electoral connections to bureaucracies, comparative political economy and the historic events of the aftermath of the savings and loan crisis and German unification. It is crucial reading for policy and public administration practitioners and scholars alike.

*The Political Economy of Property Rights* David L. Weimer, 1997-04-13 Originally published in 1997, *The Political Economy of Property Rights* reports on comparative research into the transformation of property rights in post-communist countries and China. Two important theoretical questions unify the contributions: what aspects of political systems give credibility to systems of property rights? What can be learned from the transformation of property rights in post-communist countries about the large scale change of economic institutions? The contributors consider the credibility of property rights as arising from the strategic interaction of political and economic actors and they apply this perspective and test its implications.

using a variety of qualitative and quantitative methods Overall the volume demonstrates the value of coordinated cross national research by area specialists sharing a common focus on questions of political economy

**The Politics of Telecommunications In Mexico** J. Clifton,2015-12-22 This text argues that instead of leading toward greater democratization Mexico s policies of privatization in the 1980s were used for personal benefit and to lubricate the existing state labour relationship It builds its case around the privatization of Mexico s telecommunications

Power and Privatization J. Wolfe,1996-06-07 This book shows that privatization in Britain constitutes a form of state power After analyzing the historical and ideological background the study examines how market processes indirectly extend state control by governing participation in state asset sales regulatory regimes deregulated policymaking and the marketization of trade unions Privatizing control remade British democracy Direct state power has been concentrated and held in reserve while market processes guide wide areas of routine decision making Thus it is demonstrated that privatization has depoliticized choice and diminished freedom

**Privatisation in the European Union** Judith Clifton,Francisco Comín,Daniel Díaz Fuentes,2013-03-09 Judith Clifton Francisco Comín and Daniel Díaz Fuentes in Privatisation in the European Union reject the two dominant explanations provided in literature which include a simple Americanisation of policy and a varied privatisation experience without a common driving force Using a systematic comparative analysis of privatisation experiences in each country from the 1980s to the beginning of the twenty first century the authors show how the process of European integration and the need for internationally competitive industries have constituted key driving forces in the quest for privatisation across the EU As privatisation slows down at the turn of the millennium what future can citizens expect for public enterprises Privatisation in the European Union is essential reading for researchers students and policy makers interested in privatisation EU policy and the history of public enterprises

firms shareholders and workers      **Privatisation and Development** Claude V. Chang, 2017-11-28 The book interrogates privatisation in terms of its effectiveness vis vis its stated goals and more fundamentally in terms of its success in delivering economic development It investigates why privatisation was successful in the UK and other OECD countries and why it has not met with equal success in developing countries In this regard it further examines the policy prescriptions of the IMF and World Bank in relation to the conceptualised benefits and theoretical assumptions underlying these supposed benefits The author assesses the extent to which culture and customs indeed the mode of production stand in determinate relationship to the goals techniques and outcome of the process Furthermore Chang examines the degree to which socioeconomic and moral consequences of privatisation have been ignored in pursuit of the ideological imperative implicit in the Washington Consensus Hence the book contributes to the reflective thought that must necessarily be part of theory validation and provides the basis for a balanced and empirically valid theory of privatisation      In Search of the True West Esther Kingston-Mann, 1998-12-21 This ground breaking work documents Russian efforts to appropriate Western solutions to the problem of economic backwardness since the time of Catherine the Great Entangled then as now with issues of cultural borrowing educated Russians searched for Western nations ideas and social groups that embodied universal economic truths applicable to their own country Esther Kingston Mann describes Russian Westernization which emphasized German as well as Anglo U S economics while she raises important questions about core values of Western culture and how cultural values and priorities are determined This is the first historical account of the significant role played by Russian social scientists in nineteenth century Western economic and social thought In an era of rapid Western colonial expansion the Russian quest for the right Western economic model became more urgent Was Russia condemned to the fate of India if it did not become an England In the 1900s Russian liberal economists emphasized cultural difference and historical context while Marxists and prerevolutionary government reformers declared that inexorable economic laws doomed peasants and their medieval communities On the eve of 1917 both the tsarist regime and its leading critics agreed that Russia must choose between Western style progress or feudal stagnation And when peasants and communes survived until Stalin s time he mercilessly destroyed them in the name of progress Today Russia s painful modernizing traditions shape the policies of contemporary reformers who seem as certain as their predecessors that economic progress requires wholesale obliteration of the past

**Regulatory Implications of Water and Wastewater Utility Privatization** Janice A. Beecher, 1995      Women, Land Rights and Rural Development Esther Kingston-Mann, 2018-01-17 The failure to include gender in the economic history of rural development has severely limited our understanding of privatizing collectivist and colonial economic policies that disrupted and transformed the lives of rural women and men in the modern world This book is unique in its focus on female economic agency and in its exploration of the latter virtue in comparative historical perspective It presents the apparently disparate cases of 17th century England 20th century Russia and the Soviet Union and 20th century Kenya as their top down

modernization projects were implemented in similar fashion particularly in the case of women The female half of the population was largely absent from contemporary economic databases but nevertheless stereotyped as obstacles to rational economic decision making Introducing rural women and their innovations into male centered narratives of economic history lays the foundation for a more demographically balanced and realistic understanding of rural behavior and rural development In this study women s labor and land claims are the lens through which both female agency and the delegitimizing of women s land claims become more visible Both policy makers and their leading critics deployed virtually identical language to describe backward unruly and invariably unsightly peasant women
