Political Spectacle And The Fate Of American Schools:

Political Spectacle and the Fate of American Schools Mary Lee Smith, Linda Miller-Kahn, Walter Heinecke, Patricia F. Jarvis, 2004-02-02 The authors argue that the most influential and well known educational policy programs in the past 30 years are not based on democratic consensus but are instead formulated by the political community as symbolic efforts meant to generate personal partisan gain *The Political Classroom* Diana E. Hess, Paula McAvoy, 2014-11-13 WINNER 2016 Grawemeyer Award in Education Helping students develop their ability to deliberate political questions is an essential component of democratic education but introducing political issues into the classroom is pedagogically challenging and raises ethical dilemmas for teachers Diana E Hess and Paula McAvoy argue that teachers will make better professional judgments about these issues if they aim toward creating political classrooms which engage students in deliberations about questions that ask How should we live together Based on the findings from a large mixed method study about discussions of political issues within high school classrooms *The Political Classroom* presents in depth and engaging cases of teacher practice Paying particular attention to how political polarization and social inequality affect classroom dynamics Hess and McAvoy promote a coherent plan for providing students with a nonpartisan political education and for improving the quality of classroom deliberations **Hidden Markets** Patricia Burch, 2009-01-13 Across the U S test publishers software companies and research firms are swarming to take advantage of the revenues made available by the No Child Left Behind Act In effect the education industry has assumed a central place in the day to day governance and administration of public schools a trend that has gone largely unnoticed by policymakers or the press until now Drawing on analytic tools *Hidden Markets* examines specific domains that the education industry has had particular influence on home schooling remedial instruction management consulting test development data management and staff development Burch s analysis demonstrates that only when we subject the education industry to systematic and in depth critical analysis can we begin to demand more corporate accountability and organize to halt the slide of education funds into the market *Education Research in the Public Interest* Gloria Ladson-Billings, William F. Tate, 2014-04-15 Acclaimed African American scholar and teacher educator Gloria Ladson Billings examines the field of teacher education through the accomplishments and contributions of well known African American teacher educators Lisa Delpit Carl Grant Jacqueline Jordan Irvine Geneva Gay Cherry McGee Banks William Tate and Joyce King Using in depth interviews and storytelling Ladson Billings depicts deeply personal portraits of these scholars experiences to confront race and racism not only theoretically but within their everyday professional lives in the Big House of the academy Ladson Billings gives these portraits even greater resonance and meaning by pairing these teacher educators with historical figures such as Harriet Tubman Nat Turner and Charlotte Forten whose contributions to the struggle for social justice are a wellspring of hope and courage to all educators and a tribute to African Americans whose political scientific and spiritual efforts made life better for us all This compelling book is important reading for all educators

who want to transform teacher education for the better The American Association of Colleges for Teacher Education is enthused and excited about Ladson Billings s dynamic and provoking scholarship Its focus on outstanding African American teacher educators is a major contribution to teacher education literature This cutting edge research is likely to prompt some of the best of unconventional teacher education thought David G Imig President and CEO American Association of Colleges for Teacher Education In this moving and original book Gloria Ladson Billings offers complex insights about the politics of scholarship the experiences of scholars of color in universities and the larger enterprise of teaching and teacher education for social justice Marilyn Cochran Smith Lynch School of Education Boston College and President of the American Educational Research Association AERA for 2004-05

A Good Investment? Amy Brown, 2015-11-15 Select students and teachers worked the room at a fundraising event for a New York City public high school Amy Brown calls College Preparatory Academy It was their job to convince wealthy attendants that College Prep with its largely minority and disadvantaged student body and its unusually high rate of graduation and college acceptance was a worthy investment To this end students and teachers tried to seem needy and deserving hoping to make supporters feel generous important and not threatened How much Brown asks does competition for financing in urban public schools depend on marketing and perpetuating poverty in order to thrive And are the actors in this drama deliberately playing up stereotypes of race and class A Good Investment offers a firsthand look behind the scenes of the philanthropic approach to funding public education a process in which social change in education policy and practice is aligned with social entrepreneurship The appearance of success equity or justice in education Brown argues might actually serve to maintain stark inequalities and inhibit democracy Her book shows that models of corporate or philanthropic charity in education can in fact reinforce the race and class hierarchies that they purport to alleviate As their voices reveal the teachers and students on the receiving end of such a system can be critically conscious and ambivalent participants in a school s racialized marketing and image management Timely and provocative this nuanced work exposes the unintended consequences of an education marketplace where charity masquerades as justice

Radical Possibilities Jean Anyon, 2014-03-14 The core argument of Jean Anyon's classic *Radical Possibilities* is deceptively simple if we do not direct our attention to the ways in which federal and metropolitan policies maintain the poverty that plagues communities in American cities urban school reform as currently conceived is doomed to fail With every chapter thoroughly revised and updated this edition picks up where the 2005 publication left off including a completely new chapter detailing how three decades of political decisions

leading up to the Great Recession produced an economic crisis of epic proportions By tracing the root causes of the financial crisis Anyon effectively demonstrates the concrete effects of economic decision making on the education sector revealing in particular the disastrous impacts of these policies on black and Latino communities Going beyond lament Radical Possibilities offers those interested in a better future for the millions of America s poor families a set of practical and theoretical insights Expanding on her paradigm for combating educational injustice Anyon discusses the Occupy Wall Street movement as a recent example of popular resistance in this new edition set against a larger framework of civil rights history A ringing call to action Radical Possibilities reminds readers that throughout U S history equitable public policies have typically been created as a result of the political pressure brought to bear by social movements Ultimately Anyon s revelations teach us that the current moment contains its own very real radical possibilities **Act Your Age!** Nancy Lesko,2012-03-15 Are our current ways of talking about the problem of adolescence really that different than those of past generations For the past decade Act Your Age has provided a provocative and now classic analysis of the accepted ways of viewing teens By employing a groundbreaking history of the present methodology that resists traditional chronology author Nancy Lesko analyzes both historical and present social and political factors that produce the presumed natural adolescent This resulting seminal work in the field of youth study forces readers to rethink the dominant interpretations on the social construction of adolescence from the 19th century through the present day This new edition is updated throughout and includes a full new chapter on 1950s era assumptions about adolescence and the corresponding connections to teens today As in all chapters Lesko provides careful examination of the concerns of nationalism sexuality and social order in terms of how they are projected onto the definitions of adolescents in the media in schools and in the home
