Impact of Political Stability on Economic Development

Addis Ababa Othow Akongdit,2019-10-04 The main theme of this study is chosen in response to the general consensus on the

importance of conducting a comprehensive study that may shape the economic policies and promote the business sector as well as the government and other organizations. However, the key question posed by this study is whether the theory that political stability fosters economic development is simply the wishful thinking of people who value both stability and growth or whether it is a delusion of those who believe that most developing countries may enjoy rapid growth if they are stable. The importance of this study is clear. South Sudan is confronted with enormous challenges of administrative, ethnic, political, and economic development. In light of this, the current study addresses the following issues: What is the impact of the political system in South Sudan on economic development? What is the impact of oil resources on sustainable development? What is the impact of the oil shutdown on political and economic stability, and what is the possibility of deficit financing? Is there any possibility for cooperation between Sudan and South Sudan? In this context, the major objective of this study is to analyze the political development of the country to verify that political stability fosters the achievement of economic and social development. It also seeks to analyse the political history of Sudan in general and South Sudan in particular, emphasising the importance of political stability among other considerations as a precondition for socioeconomic development. Furthermore, other objectives of the study include suggestions on how political stability could be ensured in South Sudan and how good governance may promote political and economic stability. In light of the above, this study focuses on the issues of the political transition and policies that will improve the economic, political, and social well-being of the people of South Sudan. It seeks ways of setting up policies that will raise the standard of living of people with sustained growth and move from a simple low income economy to a modern high income economy. It also attempts to develop a framework for cooperation between Sudan and South Sudan. The methodology that is adopted to address these issues is collecting, sorting, and analysing primary and secondary information relating to the history of political and economic development in South Sudan using empirical approaches such as SWOT analysis, information sources, references, and books. However, this study is organized as follows: chapter 1 discusses political stability and economic development in a theoretical framework through which we explore the empirical analysis; it is divided into four sections. Section 1 focuses on definition, causes, and measurement of political stability with an aim to assess the effect of political stability on growth-related variables. In section 2, we define the concept of political instability and measure it by using indicators like the number of coups, the number of major government crises, the number of cabinet changes, and the number of political revolutions as well as political assassinations. Section 3 discusses the concept and definition of economic development and summarizes the major theories of economic development in five fundamental elements. The last section explores the implications of financing economic development by discussing domestic resources including deficit financing and foreign financial resources and the role of each of them in achieving economic development. Chapter 2 presents the political and social background of South Sudan; it is divided into three sections. Section 1 discusses South Sudan's ability to function and successfully implement its policies and strategic vision for the year 2040.

Section 2 focuses on the demographic structure of South Sudan in terms of population education languages and culture Section 3 discusses the social indicators such as infrastructure poverty and corruption which affect improving social welfare as well as the political stability and economic development of the Republic of South Sudan Chapter 3 focuses on the South Sudan economy and the challenges Here we discuss the political and development challenges facing South Sudan as well as the investment opportunities This chapter discusses the major challenges which face South Sudan especially issues such as border demarcation political reform and oil shutdown as well as investment opportunities in oil and agriculture In chapter 4 we discuss South Sudan's oil and economic development It focuses on oil resources and their impact on sustainable development the impact of oil shutdown on political and economic development and the possibility of deficit financing In chapter 5 we discuss the future of stability and prosperity in South Sudan It discusses how good governance and cooperation can be enormously beneficial to South Sudan in the process of building sustainable political and economic stability and what South Sudan can learn from other countries The major findings of this study are as follows Political stability plays an important role in determining economic growth and economic development in many economies The degree of political stability is high if there is a high degree of democracy or autocracy Strong democracies or strong autocracies are best equipped to provide political stability that may lead to economic development It is then the level of political stability within a given country regardless of regime type that results in economic growth Long term sustainable economic growth depends on the ability to raise the rates of accumulation of physical and human capital by securing necessary sources domestic foreign or deficit finance to use efficiently for financing economic development Most economists view corruption as a major obstacle to development It is seen as one of the causes of low income and is believed to play a critical role in generating poverty traps e.g Blackburn et al 2006 Thus corruption according to this view sands the wheels of development and it makes economic and political transitions difficult Not only is good governance critical to development but it is also the most important factor in determining whether a country has the capacity to use resources effectively to promote economic growth and reduce poverty

The Effect of Political Stability and Governance on Economic Development Rüçhan Kamil Altun, 2017 This paper studies the effect of political stability and governance on economic development by consulting the literature examining the data and through empirical estimations Additionally further attention is paid to the role of political leadership and democratic institutions The empirical estimations involve a panel dataset containing 157 countries including 35 developed and 122 developing countries covering a 10 year period between 2002-2011 The results confirm the statistically and economically significant effect of political stability on economic development in the short and long run All else equal a one point increase in the political stability variable is associated with an increase of the GDP growth rate by around 1.38-1.62 percentage points or an increase of GDP per worker by around 1.207-1.730 These results are robust to alternative model specifications and political stability indicators as well as after controlling for autocorrelation and heteroskedasticity Using a cross sectional IV

analysis these results are addressed for potential endogeneity caused by simultaneity bidirectionality although this point requires more attention and the use of strong time variant instrumental variables Regarding governance the effect of the control of corruption government efficiency and regulatory quality are significant and robust while contrary to expectations the rule of law and voice and accountability give insignificant results Untimely and unanticipated executive changes have an additional significant detrimental effect on growth rates while elections have no significant effect regardless of the political system and level of development

Education and Development Walter W. McMahon, 2000-01-27 This book develops a new approach to measuring the total returns to human resource development through investment in education Drawing on microanalytic foundations it uses regional and worldwide data to estimate the net marginal contributions of education and new knowledge both to economic growth and to wider effects on democratization human rights political stability health net population growth rates reduction of poverty inequality in income distribution crime drug use and the environment The total impact of education policy changes on endogenous development is then estimated using an interactive model This new approach is important to industrialized and developing countries alike The diffusion of knowledge and the adaptation of new techniques has been identified as crucial to the growth process in the new endogenous growth models and is of increasing strategic importance in current knowledge based globalizing economies Similarly the non monetary returns from education are important in improving human welfare Measurement of these non market returns is a crucial but much neglected subject It has proved frustrating and existing microanalytic

measures have proved piecemeal The new approach developed here offers some comprehensive estimates and simulation techniques for finding more cost effective policies and also suggests new hypotheses for further microanalytic testing

Master s Thesis from the year 2019 in the subject Politics Other International Politics Topics grade 10 University of Marburg Faculty of Business Administration and Economics Economics Institutions language English abstract Since both food security and energy security are countries strategic objective this study typically advocates a deep understanding of the concept of political stability to incorporate food and energy security as a new pillar of conflict management based on an empirical understanding of the nexus and its effect We used food deficit as proxy for food security and energy imports for energy security from the World Bank database Suffering mutilation and death of human beings are the most obvious and important effects of all conflicts as well as natural disasters Yet material losses are also important because they reduce the livelihood and recovery capacities of conflict survivors Moreover in many cases the indirect effects of conflict cause more deaths than direct violence It has been found that generally the indirect costs of war are greater than its direct costs and persist long after the end of the conflict Instability and conflict affect many economic sectors such as reducing foreign exchange earnings which can have serious consequences for development and food security Indeed global population growth combined with the effects of climate change on agriculture pose the risk of a Malthusian trap to humanity that can only be avoided by a more efficient and sustainable production system Energy security policies and climate policies are often considered as two sides of the same coin their objectives being at least complementary if not identical **Political Problems of American**
