Political Consultants in U.S. Congressional Elections

Stephen K. Medvic, 2001 Campaign consultants are arguably now as famous in the United States as the politicians themselves. During the past decade those who know the names Bill Clinton, George Bush, Newt Gingrich, and Christine Todd Whitman also recognize the names James Carville, Mary Matalin, Frank Luntz, and Ed Rollins. Professional consultants, once part of the privileged inner circle of presidential and gubernatorial candidates, are increasingly found at all levels of politics. Indeed, more than half of congressional candidates hire campaign consultants. These professionals have become as important to a candidate's success as money. In this innovative study, Stephen K. Medvic explores all aspects of political consultancy and develops an empirically based theory that ensures the impact consultants have on elections. *Political Consultants in U.S. Congressional Elections* answers two simple questions: What do professional political consultants do, and how successful are they? Medvic analyzes the way consultants shape political dialogue and uses empirical data to show the benefits and limits of a consultant's involvement in a campaign. He focuses on issues as diverse as vote shares, outcomes, and fundraising. Finally, the author demonstrates how the adversarial nature of campaigns fosters the kind of electioneering advocated by most political consultants and argues that this process may not be as harmful for the country as is often suggested.

Latino Politics in Massachusetts Carol Hardy-Fanta, Jeffrey Gerson, 2014-01-14 This collection of original essays explores the major challenges to Latino political representation in cities where Latino populations do not make up the majority of the population and therefore cannot rely on sheer numbers to gain representation.

Human Needs and Politics Ross Fitzgerald, 2016-06-21 *Human Needs and Politics* is a collection of papers that examines the intercorrelation between political trends and the fulfillment of society's human needs. The title discusses the concepts of human needs, wants, and politics. Next, the selection details some theories that will shed light into the mechanisms of human needs-politics interaction. The text also reviews Maslow's hierarchy of needs along with Marx's opinion on human needs. The book will be of great interest to political scientists, sociologists, and behavioral scientists.

foundation of the Discipline of Political Science **Narratives of Justice** Grant Reeher, 2010-05-06 Narratives of Justice offers a provocative contemporary look at the timeless questions of justice and fairness Using face to face interviews Grant Reeher plumbs the minds of legislators for their beliefs about distributive justice and attempts to discover the ways in which those beliefs influence their behavior The book calls into question many notions of American political ideology and in particular the idea of an American exceptionalism regarding views from the political left and the dominance in the United States of a liberal tradition Political philosophers have amassed a large body of work on justice and fairness from a theoretical perspective but there is comparatively little empirical work on the subject The work that does exist concentrates on the beliefs of the public We know very little concerning the beliefs about justice held by political elites This work offers a window into the beliefs of legislators a group for which such an inquiry is rarely undertaken The book is based on a set of extended in depth interviews with the members of the Connecticut State Senate as well as a year of close observation of the Senate in action The interviews averaged four hours in length and covered a variety of topics related to fairness Through this material Reeher employs a narrative based framework to understand the patterns in the senators interview responses and develops a typology of the senator s narratives These narratives vary in both content and form and as a whole present a surprising range of views Narratives of Justice will be of interest to those concerned with justice political ideologies and political beliefs as well as state and local politics and more generally American politics Its wide research and thorough documentation make it a useful guide to the literature within and beyond political science concerning beliefs ideologies legislative behavior and qualitative research methods Grant Reeher is Assistant Professor Maxwell School of Citizenship and Public Affairs Department of Political Science Syracuse University and currently a Robert Wood Johnson Foundation Scholar in Health Policy Research University of Michigan **The Rationalizing Voter** Milton Lodge, Charles S. Taber, 2013-04-22 When citizens think about political leaders groups and issues their feelings bias how information is encoded evaluated and acted upon Neither Liberal nor Conservative Donald R. Kinder, Nathan P. Kalmoe, 2017-05-24 Congress is crippled by ideological conflict The political parties are more polarized today than at any time since the Civil War Americans disagree fiercely about just about everything from terrorism and national security to taxes and government spending to immigration and gay marriage Well American elites disagree fiercely But average Americans do not This at least was the position staked out by Philip Converse in his famous essay on belief systems which drew on surveys carried out during the Eisenhower Era to conclude that most Americans were innocent of ideology In Neither Liberal nor Conservative Donald Kinder and Nathan Kalmoe argue that ideological innocence applies nearly as well to the current state of American public opinion Real liberals and real conservatives are found in impressive numbers only among those who are deeply engaged in political life The ideological battles between American political elites show up as scattered skirmishes in the general public if they show up at all If ideology is out of reach for all but a few who are deeply and seriously engaged in political life how do Americans decide

whom to elect president whether affirmative action is good or bad Kinder and Kalmoe offer a persuasive group centered answer Political preferences arise less from ideological differences than from the attachments and antagonisms of group life

New Directions in American Politics

Raymond J. La Raja, 2013-02-15 *New Directions in American Politics* introduces students not just to how the American political system works but also to how political science works. La Raja brings together top scholars to write original essays across the standard curriculum of American government and politics, capturing emerging research in the discipline in a way that is accessible for undergraduates. Each chapter combines substantive knowledge with the kind of skill building and analytical inquiry that is being touted in higher education everywhere. Contributors to *New Directions* highlight why the questions they seek to answer are critical for understanding American politics and situate them in the broader context of controversies in research. The teaching of American politics follows a well-worn path. Textbooks for introductory courses hew to a traditional set of chapters that describe the Founding, American institutions, the ways citizens participate in politics, and sometimes public policy. The material rarely engages students in the kind of questions that animate scholarship on politics. One hurdle for instructors is finding material that reflects quality scholarship and thus teaches students about why, not just what, and yet is accessible for undergraduates. Articles in scholarly journals are typically unsuited for undergraduate courses, particularly introductory courses. What is needed is a book that conveys exciting trends in scholarship across vital topics in American politics and illustrates analytical thinking. *New Directions in American Politics* is that book and will be an ideal companion to standard textbooks that focus mostly on nuts and bolts of politics. The book features Contributions from a top-notch cast of active scholars and a highly regarded editor. A focus on analytical thinking that addresses questions of causality. Full coverage of the American politics curriculum. Short interviews with each contributor on a companion website to help the research come alive and prompt critical thinking questions for students. Work that draws on the highest quality research in political science but is written specifically for first-year undergraduate students. There is simply no book like this available to the growing number of faculty who want their introductory American politics course to be a reflection of the political science discipline and not just the nuts and bolt facts of the American political system. *Quarterly Review of Military Literature*
