Religiously Oriented Parties and Democratization Luca Ozzano, Francesco Cavatorta, 2014-04-03 To the surprise of both academics and policy makers religion has not been relegated entirely to the private sphere quite the contrary Over the last few decades religion has begun to play a significant role in public affairs and in many cases directly in political systems This edited volume analyses in detail how religion and religious precepts inform the ideology strategies and electoral behaviour of political parties Working with an original and innovative typology of religiously oriented political parties the book examines cases from different regions of the world and different religious traditions to highlight the significance of religion for party politics This interest for religiously oriented parties is combined with an interest in processes of democratic change and democratic consolidation Political parties are central to the success of processes of democratization while religion is seen in many circles as an element that prevents such success because it is perceived to be a polarising factor detrimental to the consensus necessary to build a liberal democratic system Through the different case studies presented here a much more complex picture emerges where religiously oriented political parties perform very different and often contradicting roles with respect to democratic change This book was published as a special issue of *Democratization*

Building Democracy and Civil Society East of the Elbe Sven Eliaeson, 2006-04-18 This book explores the idea of civil society and how it is being implemented in Eastern Europe The implosion of the Russian empire fifteen years ago and the new wave of democratization opened a new field of inquiry The wide ranging debate on the transition became focused on a conceptual battle the question of how to define civil society Because totalitarian systems shun self organization real existing civil society barely existed East of the Elbe and the emergence of civil society took unusually complex and puzzling forms which varied with national culture and reflected the deep historical past of these societies This insightful text relates the concept of civil society and developments in Eastern Europe to wider sociological theories and makes international comparisons where appropriate It discusses particular aspects of civil society and examines the difficulties of establishing civil society It concludes by assessing the problems and prospects for civil society in Eastern Europe going forward

The Future of Liberation Theology Ivan Petrella,2017-03-02

The Future of Liberation Theology envisions a radical new direction for Latin American liberation theology One of a new generation of Latin American theologians Ivan Petrella shows that despite the current dominance of end of history ideology liberation theologians need not abandon their belief that the theological rereading of Christianity must be linked to the development of historical projects models of political and economic organization that would replace an unjust status quo In the absence of historical projects liberation theology currently finds itself unable to move beyond merely talking about liberation toward actually enacting it in society Providing a bold new interpretation of the current state and potential future of liberation theology Ivan Petrella brings together original research on the movement with developments in political theory critical legal theory and political economy to reconstruct liberation theology's understanding of theology democracy and capitalism The result is the recovery of historical projects thus allowing liberation theologians to once again place the reality of liberation and not just the promise at the forefront of their task
