**The Political Economy of China's Economic Zones** George T. Crane, 2019-07-04 In 1979 China launched a new international economic policy with the establishment of four Special Economic Zones SEZs Shenzhen Zhuhai and Shantou in Guangdong Province and Xiamen in Fujian Province Modelled loosely on export processing zones and free trade zones found in other less developed countries the SEZs offer a variety of financial inducements to foreign investors in order to harness international business for national economic advantage Designed to be a cornerstone of China's economic reforms by 1985 the SEZs in the mid 80s zone like policies were extended to fourteen coastal cities were scandal ridden and fraught with serious problems This work the first book length analysis in English of China's SEZs examines the problems and promise of this innovative approach to structural economic reform and the comparative significance of the SEZs **The Political**

**Economy of Special Economic Zones** Lotta Moberg, 2017-03-16 Special Economic Zones SEZs have become a popular development policy throughout the world over the last half a century These zones form designated areas where governments offer businesses lower taxes tariffs and often lighter regulations Generally SEZs aim to attract investments and raise a country's export and employment rates but although success stories are often cited there are numerous failed projects that have instead become burdens for their host countries This book examines SEZs from a political economy perspective both to dissect the incentives of governments zone developers and exporters and to uncover both the hidden costs and untapped potential of zone policies Costs include misallocated resources the encouragement of rent seeking and distraction of policy makers from more effective reforms However the zones also have several unappreciated benefits They can change the politics of a country by generating a transition from a system of rent seeking to one of liberalized open markets In revealing the hidden promise of SEZs this book shows how the SEZ model of development can succeed in the future Applying frameworks from various schools of political economy this volume places SEZs in the context of their mixed past and promising future It is essential reading for anyone with an interest in international economics development economics and political economy including practitioners and consultants of SEZ policies **Special Economic Zones and China's**

**Development Path** Yitao Tao, Zhiguo Lu, 2018-10-05 The book provides insights into the development of special economic zones which are an important factor in the political and economic reforms in China It discusses a number of topics including the history and the modernization of special economic zones in China the contributions of special economic zones to China's economic success and cultural change as well as the new mission of special economic zones in the current economic social context Applying institutional economics and growth poles theory it discusses the mechanism of China's path driven by special economic zone practices The book is a valuable resource for researchers interested in special economic zones political and institutional reforms and economic transformation during China's modernization *Special Economic Zones and the Economic Transition in China* Wei Ge, 1999 This book examines China's economic development since 1949 with

special emphasis on the economic transition of the past two decades and the role of special economic zones in this gradually evolving process Various issues concerning the formation of the zones are explored The performance of the zones and their impacts on the Chinese economy and the transitional path are assessed in aspects such as economic growth structural changes investment financing employment and wages technology transfers and learning productivity gains standards of living trade expansion and the changing pattern of foreign investment The implications of the special economic zones as a policy instrument to facilitate the process of economic transition and development as well as the relevant policy issues are examined

A Political Economy Analysis of China's Civil Aviation Industry Mark Dougan, 2016-04-29 First published in 2002 This volume is a political economy analysis of China's civil aviation industry with a focus on the reform period beginning in the late 1970s up to the present The chief aim is to identify and analyze the most important political economy variables impacting on the industry's development during this time

*The Political Economy of Special Economic Zones* Lotta Moberg, 2014 This paper is a first attempt to apply a robust political economy framework to explain when Special Economic Zones SEZs can contribute to economic development A robust political economy is one that channels the actions of self-interested individuals with limited information to promote economic progress In the right institutional context SEZs tend to promote economic growth In the wrong institutional context they can cause resource misallocation and rent-seeking Policy makers introducing SEZs must overcome the knowledge problem to avoid misdirected economic planning Yet the scheme can only fulfill its purpose if it also prevents destructive rent-seeking behavior both from businesses and from government authorities The political economy framework of SEZs can be applied to judge their potential efficacy something that orthodox studies of country features such as natural resources infrastructure and zone location fail to do The Indian and Chinese experiences with SEZs illustrate these points

**China's Special Economic Zones** George Thomas Crane, 1988

**The Political Economy of Chinese Development** Mark Selden, 2016-09-16 The first edition of *The Political Economy of Chinese Socialism* reconceptualized the political economy of China by highlighting the changing character of urban rural and state society conflicts in the era of Mao Zedong's leadership and in the contemporary post-Mao reforms The economic and social crises that engulfed China and indeed much of the rest of the socialist world in the late 1980s culminating in the 1989 democratic movement and its suppression stimulated a rethinking of central propositions of the first edition It particularly led the author to inquire anew into the meaning of socio-political as well as economic development in a populous and poor agrarian nation This volume then assesses the economic performance and social consequences of China's political economy over four decades with a focus on China's countryside and city countryside relations In addition to a reconceptualization and updating of the introductory chapter there is a new chapter *The Social Origins and Limits of the Chinese Democratic Movement*

**Endogenous Origins of Economic Reforms in India and Chin** Rajiv G. Maluste,2011-07 Attitudinal change in the context of economic reforms has been referred to in Rodrik and Subramanian 2005 DeLong 2003 Kohli 1989 and Panagariya 2004 2008 This dissertation provides empirical support for this literature establishing an earlier start for India s economic policy liberalisation than presented in stylized accounts It demonstrates the endogenous nature of the origins of these policy shifts Attitudinal change literature had directed attention to the need for further research into India s policy changes of the early 1980s and for studying broader comparability issues in other developing countries This research makes a contribution towards filling these gaps This dissertation shows that India started its economic liberalisation under the Indira Gandhi administration from 1980 to 1984 These findings depart from the conventional view that India s economic policy changes were initiated by the Narasimha Rao government in 1991 or by the Rajiv Gandhi administration in the mid to late 1980s The dissertation establishes that policy shifts of the early 1980s had endogenous origins in the political leadership s attitudinal changes The Indira Gandhi administration of the early 1980s revisited the statist policies of its previous tenure from 1966 to 1977 The new approach entailed more openness towards private enterprise scaling back the role of the public sector and starting India s integration into the global economy The dissertation also discusses the comparable role of attitudinal changes at the start of China s policy liberalisation led by Deng Xiaoping from 1978 to 1982 It focuses on the significance and challenges faced by China s political leadership in bringing about societal attitudinal change The dissertation concludes by drawing comparisons between India and China developing a linkage between their endogenous attitudinal changes and economic policy liberalisation

Handbook of Research on Special Economic Zones as Regional Development Enablers Figueiredo, Paulo Guilherme,Leandro, Francisco José,Li, Yichao,2021-10-15 Special economic zones SEZs are important doorways for countries to attract foreign investment and promote trade A strong correlation between the creation of SEZs and economic development indicators has also been identified in previous studies at the municipal level in China Thus the fundamental question that needs to be explored is to what extent SEZs can play the role of development enablers in different regions development states and institutional settings The Handbook of Research on Special Economic Zones as Regional Development Enablers discusses the diverse and international track records in the implementation of SEZs the interplay of SEZ models and local institutional infrastructure

and stakeholders and the SEZ models that can best fit certain development states and or settings Covering topics such as the Belt and Road Initiative local and national economies and regional integration this book is essential for government officials development officers scholars students researchers entrepreneurs public decision makers aid agencies company executives investors and academicians

The Nationalist Dilemma Marvin Suesse, 2023-05-11 Nationalists think about the economy Marvin Suesse argues and this thinking matters once nationalists hold political power Many nationalists seek to limit global exchange but others prioritise economic development The potential conflict between these two goals shapes nationalist policy making Drawing on historical case studies from thirty countries from the American Revolution to the rise of China this book paints a broad panorama of economic nationalism over the past 250 years It explains why such thinking has become influential despite the internal contradictions and chequered record of many nationalist policy makers At the root of economic nationalism's appeal is its ability to capitalise upon economic inequality both domestic and international These inequalities are reinforced by political factors such as empire building ethnic conflicts and financial crises This has given rise to powerful nationalist movements that have decisively shaped the global exchange of goods people and capital

**Intellectual Property in Asia** Paul Goldstein, Joseph Straus, 2009-01-07 Introduction Intellectual property rights foster innovation But if as it surely does intellectual property means not just intellectual property rules the law of patents copyrights trademarks designs trade secrets and unfair competition but also intellectual property institutions the courts police regulatory agencies and collecting societies that administer these rules what are the respective roles of intellectual property rules and institutions in fostering creativity And to what extent do forces outside intellectual property rules and institutions economics culture politics history also contribute to innovation Is it possible that these other factors so overwhelm the impact of intellectual property regimes

that it is futile to expect adjustments in intellectual property rules and institutions to alter patterns of innovation and ultimately economic development. It was to address these questions in the most dynamic region of the world today Asia that we invited leading country experts to contribute studies that not only summarize the current condition of intellectual property regimes in countries ranging in economic size from Cambodia to Japan and in population from Laos to China but that also describe the historical sources of these laws and institutions, the realities of intellectual property enforcement in the marketplace and the political, economic, educational and scientific infrastructures that sustain and direct investment in innovative activity. Decolonization and the Cold War Leslie James, Elisabeth Leake, 2015-02-26 The Cold War and decolonization transformed the twentieth century world. This volume brings together an international line up of experts to explore how these transformations took place and expand on some of the latest threads of analysis to help inform our understanding of the links between the two phenomena. The book begins by exploring ideas of modernity, development and economics as Cold War and postcolonial projects and goes on to look at the era's intellectual history and investigate how emerging forms of identity fought for supremacy. Finally, the contributors question ideas of sovereignty and state control that move beyond traditional Cold War narratives. Decolonization and the Cold War emphasizes new approaches by drawing on various methodologies, regions, themes and interdisciplinary work to shed new light on two topics that are increasingly important to historians of the twentieth century.

**Globalization and the Decline of Social Reform** Gary Teeple, 2000-01-01 Globalization is the coming of the triumph of capitalism, the growing ascendancy of economics over politics, of corporate demands over public policy, of private over public interest. It represents the approaching completion of the capitalization of the world carried out by self-generating capital in the form of transnational corporations within an increasingly coherent transnational regulatory regime. Neo-liberal policies at the national level, argues the author, represent the policy side of globalization, the political requirements of global capital, the harmonization of the national with the global. They mark the transition between two eras from a world of national corporations and nation states to a world of transnational corporations and supranational regulatory agencies. The author examines the postwar conditions that gave rise to the modern welfare state and the politics of social democracy throughout the industrial world. He traces the transformation of these conditions in the 1970s with the coming of a computer-based mode of production and the consequent necessity for global relations of production. In the face of global assertions of the rights of corporate private property, he makes the case that the world's subordinate classes and peoples will have to create global means of resistance.
