Terrorism, Risk and the Global City Jon Coaffee, 2016-03-16 First published in 2003 this account of the anti terrorist measures of London s financial district and the changes in urban security after 9 11 has been revised to take into account developments in counter terrorist security and management particularly after the terrorist attack in London on July 7th 2005 It makes a valuable addition to the current debate on terrorism and the new security challenges facing Western nations Drawing on the post 9 11 academic and policy literature on how terrorism is reshaping the contemporary city this book explores the changing nature of the terrorist threat against global cities in terms of tactics and targeting and the challenge of developing city wide managerial measures and strategies Also addressed is the way in which London is leading the way in developing best practice in counter terrorist design and management and how such practice is being internationalized

Terrorism, Risk and the City Jon Coaffee, 2017-10-24 The development of defensive strategies encompassing the fortification and privatization of the city has attracted significant attention during recent years and has become particularly relevant in the aftermath of September 11th Dealing with issues of risk security and the spatial restructuring of contemporary western cities this book examines how the perceived risk of terrorist attack led to changes in the physical form and institutional infrastructure of the city of London during the 1990s when the city was a prime terrorist target The book analyses how the various formal and informal strategies adopted in the City attempted to reduce both the physical and financial risk of terrorism This was undertaken through a series of place specific security initiatives and risk management policies which led to increased fortification a substantial rise in terrorism insurance premiums and changing institutional relations at a variety of spatial scales It also argues that the security measures deployed were developed not in terms of an anti terrorist effort but in relation to the unintended by products of these approaches such as crime reduction and enhanced traffic management capabilities
