Political Science Looking To The Future Political Behavior:

Do Voters Look to the Future? Brad Lockerbie, 2008-06-30 Do voters look to the past the future or both when deciding how to vote In *Do Voters Look to the Future* Brad Lockerbie shows voters to be more sophisticated than much of the work in political science would suggest He argues that voters do not simply reward or punish the incumbent administration but instead make a comparative evaluation of the likely performance of each candidate and vote for the one that will most likely provide them with a prosperous future Making use of data from 1956 through the present Lockerbie finds that voters take into account both what has happened and what they think will happen when they vote He finds these economic evaluations to be strongly related to voting behavior both for the House and the Senate as well as the presidency Additionally Lockerbie examines the role of these economic items to explain changes in party identification **Political Science** William J.

Riener, Douglas W. Simon, Joseph Romance, 2013-02-15 So often political science is introduced to students as a segmented field *The Challenge of Politics* instead enables students to see how the subfields converge around a set of crucial questions can we as citizens and students articulate and defend a view of the good political life and its guiding political values Can we develop a science of politics to help us understand significant political phenomena the empirical realities of politics Can we bring a high level of political prudence or wisdom to bear on judgments about politics and public issues Can citizens and students creatively address the future of politics Riener Simon and Romance aim to harmonize the valuable lessons of classic and contemporary theory as well as to reconcile politics to scientific and empirical study The book gives students an avenue to explore the impact of philosophy and ideology to recognize major forms of government to evaluate empirical findings and to understand how policy issues directly affect people's lives Throughout the authors look at political dynamics of American comparative and international affairs While continuing to pursue its distinctive normative approach and showing politics to be a potentially humanizing enterprise this new edition of *Challenge* has been revised and updated for major world events like the global financial crisis recent elections in the U S and elsewhere important policy decisions like the recent Supreme Court ruling in the U S on healthcare and the aftermath of the Arab Spring Based on reviewer feedback it has also been substantially streamlined throughout

Michael Alvarez, 2010-05-07 R Michael Alvarez examines how voters make their decisions in presidential elections He begins with the assumption that voters have neither the incentive nor the inclination to be well informed about politics and presidential candidates Candidates themselves have incentives to provide ambiguous information about themselves their records and their issue positions Yet the author shows that a tremendous amount of information is made available about presidential candidates And he uncovers clear and striking evidence that people are not likely to vote for candidates about whom they know very little Alvarez explores how voters learn about candidates through the course of a campaign He provides a detailed analysis of the media coverage of presidential campaigns and shows that there is a tremendous amount of media coverage of these campaigns that much of this coverage is about issues and is informative and that voters learn from this coverage The paperback edition of this work has been updated to include information on the 1996 Presidential election Information and Elections is a book that will be read by all who are interested in campaigns and electoral behavior in presidential and other elections Thoughtfully conceptualized painstakingly analyzed with empirically significant conclusions on presidential election voting behavior this book is recommended for both upper division undergraduate and graduate collections Choice R Michael Alvarez is Associate Professor of Political Science California Institute of Technology *American Politics and the African American Quest for Universal Freedom* Hanes Walton, Jr, Robert C.
