Autobiography and the Psychological Study of Religious Lives, 2008-01-01

This volume positions itself on the cutting edge of two fields in psychology that enjoy rapidly increasing attention both the study of human lives and some core domains of such lives as religion and spirituality are high on the agenda of current research and teaching Biographies and autobiographies are being approached in new ways and have become central to the study of human lives as an object of research and a preferred method for obtaining unique data about subjective human experiences Ever since the beginning of the psychology of religion autobiographies have also been pointed out as an important source of information about psychic processes involved in religiosity In this volume a number of leading theoreticians and researchers from Europe and the USA try to bring them back to this field by drawing on new insights and latest developments in psychological theory

Mechanisms of Psychological Influence on Physical Health Laura L.

Carstensen, 2012-12-06 In recent years ideas about the influence of psychological status on physical health have been elevated from intuition and clinical lore to a legitimate area of scientific study Mechanisms of influence are indubitably diverse Some of this influence is indirect accounted for simply by the instrumental help that social engagement associated with good mental health affords people for example psychologically healthy people are probably more likely to comply with medication regimens and engage in other healthful behaviors to a greater extent than those who are socially withdrawn or

psychologically unstable But recent studies suggest that while the importance of these more obvious factors cannot be denied the complete picture includes factors that are much more subtle and complex A body of research is beginning to accumulate that suggests that all three major regulatory systems the central nervous system the endocrine system and the immune system are affected by cognitions emotions and behavior There is no doubt that a relationship between mental and physical health exists but very little is known about the specific mechanisms by which such influence occurs At least in part empirical research in this area has been limited by the inherent need for an interdisciplinary approach and synthesis of collected data Recently a few researchers in a number of different disciplines have begun to study directly the linkage between psychological and emotional well being and health

The Death Drive Niklas Hageback, 2020-11-01 Sigmund Freud's death drive remains among the most controversial concepts in psychoanalysis something which post Freudians never could reach consensus on Over time it fell into oblivion Recent developments however have actualized the interest in the death drive as political upheavals and turmoil lead to societal breakdowns that according to reigning academic theory should not exist It has become a burning and contentious topic Existing conflict theories generally unmask structural factors considered as explanatory root causes whether social economic or political in nature but typically these factors may

have been in place for decades These models consistently fail to identify the triggers that ignite abrupt change and what heralds it Anecdotal a certain self destructive sentiment seems to suddenly hold sway where the established order the status quo simply must be destroyed and the psychological urges to do so are too great to resist But why would individuals or collectives elect a self destructive path which on a superficial level seems to conflict with the survival instinct and the assumption of perpetual human progress Thus the question must be posed are these manifestations of the death drive The Death Drive Why Societies Self Destruct offers an explanatory framework and methodology to predict periods of destruction that often have grim effects on societies taking as its starting point the controversial death drive concept The book provides a model to understand and forecast the seemingly irrational destructive human forces that hold such great and sinister influence on world affairs **Searching for a Self: Identity in Popular Culture, Media and Society** Arthur Asa
