Jones, 2013-03-08 Volume 15 follows the format of earlier volumes in the series The contents give the next installment in the varied aspects of acoustical imaging research On this occasion some emphasis was placed on the relationship of underwater acoustics to acoustical imaging and a volume of papers under

the title Underwater Acoustics Proceedings from the 12th ICA Symposium held in Halifax will appear at roughly the same time as this volume There is no duplication in these volumes but they are interlinked at least to the extent that papers from common conference sessions appear in one or another volume An innovation is the review paper presented at the beginning of the volume A History of Acoustical Imaging by G Wade This fairly detailed review comes at a point in time when so much has been achieved and in some cases passed by that a record of some of the earlier work might help to keep a balance with the large collections of research papers which have appeared in the many volumes
