## **Real World Of The Public Schools:**

**The Real World of the Public Schools** Harry S. Broudy, 1972      *The Best Schools* Thomas Armstrong, 2006-11-15

Educators politicians parents and even students are consumed with speaking the language of academic achievement Yet something is missing in the current focus on accountability standardized testing and adequate yearly progress If schools continue to focus the conversation on rigor and accountability and ignore more human elements of education many students may miss out on opportunities to discover the richness of individual exploration that schools can foster In *The Best Schools* Armstrong urges educators to leave narrow definitions of learning behind and return to the great thinkers of the past 100 years Montessori Piaget Freud Steiner Erikson Dewey Elkind Gardner and to the language of human development and the whole child *The Best Schools* highlights examples of educational programs that are honoring students differences using developmentally appropriate practices and promoting a humane approach to education that includes the following elements An emphasis on play for early childhood learning Theme and project based learning for elementary school students Active learning that recognizes the social emotional and cognitive needs of adolescents in middle schools Mentoring apprenticeships and cooperative education for high school students Educators in the best schools recognize the differences in the physical emotional cognitive and spiritual worlds of students of different ages This book will help educators reflect on how to help each student reach his or her true potential how to inspire each child and adolescent to discover an inner passion to learn and how to honor the unique journey of each individual through life

**The American Dream and the Public Schools** Jennifer L. Hochschild, Nathan Scovronick, Nathan B. Scovronick, 2004-10-21 Examines desegregation school funding testing vouchers bilingual education multicultural education and ability grouping These seem to be separate problems but much of the contention over them comes down to the same thing an apparent conflict between policies designed to promote each student s ability to pursue success and those designed to insure the good of all students or the nation as a whole The authors show how policies to promote individual success too often benefit only those already privileged by race or class The book also examines issues such as creationism and afrocentrism

**The Public-school Journal** , 1895      **Practicing What the Doctor Preached** Susan B. Ridgely, 2016-11-01 Dr James Dobson PhD founder of the conservative Christian foundation Focus on the Family is well known to the secular world as a crusader for the Christian right But within Christian circles he is known primarily as a childrearing expert Millions of American children have been raised on his message disseminated through books videos radio programs magazines and other media While evangelical Christians have always placed great importance on familial responsibilities Dobson placed the family at the center of Christian life Only by sticking to proper family roles he argues can we achieve salvation Women for instance only come to know God fully by submitting to their husbands and nurturing their children Such uniting of family life and religion has drawn people to the organization just as it has forced them to wrestle with what it means to be a Christian wife husband mother father son or daughter Adapting

theories from developmental psychology that melded parental modeling with a conservative Christian theology of sinfulness salvation and a living relationship with Jesus Dobson created a new model for the Christian family But what does that model look like in real life Drawing on interviews with mothers fathers sons and daughters Practicing What the Doctor Preached explores how actual families put Dobson s principles into practice To what extent does Focus shape the practices of its audience to its own ends and to what extent does Focus understanding of its members practices and needs shape the organization Susan B Ridgely shows that while Dobson is known for being rigid and dogmatic his followers show surprising flexibility in the way they actually use his materials She examines Focus s listeners and their changing needs over the organization s first thirty years a span that saw the organization expand from centering itself on childrearing to entrenching itself in public debates over sexuality education and national politics

*Why Public Schools?* Jenice L. View, Daniel A. Laitsch, Penelope M. Earley, 2013-03-01 What is the purpose of public education What is the value of taxpayer supported public schools Who is invited to answer these questions Except among policymakers few publicly answer or debate these questions Instead the neoliberal forces of competition and deregulation seem to be driving education decision making The formal education system is seen as a tool for personal and national economic growth Much of the education policy debate is centered on how to attain academic success as measured by standardized high stakes tests and evaluations But how to educate children and youth is a second order question The first question must be what is the purpose of schooling and is it limited to the presumed answer that it is to prepare workers so our nations can sustain economic superiority Students parents teachers business people artists retirees First Nations people military veterans and religious professionals are not typically invited to answer these questions despite their stake in educational outcomes Twenty four such people including professional educational policy makers and scholars offer their thoughts in these essays from the US and Canada The intended audience for this volume includes all who are concerned with the future of public schools in both nations

**The Academic Gateway** Timothy Sibbald, Victoria Handford, 2017-04-18 The Academic Gateway Understanding the Journey to Tenure investigates the experiences of professors employed in tenure track positions who are starting their career within a university environment but have not yet attained the affirmation and permanence that tenure offers The role that they have taken on entails the preparation of students within a professional school Some of them have very limited professional experience while others bring multiple years of experience with them in their transition to a faculty of education The contributors speak to the three key components of their faculty role teaching service and research Addressing organizational structures and differences relative to prior roles they examine how these changes have assisted confused or altered the way they conduct their day to day work They speak about relevant prior experiences the preparation they received through graduate school and the details of the learning curve as they entered into their tenure track role Have they been successful The reader will experience the same uncertainty and anticipation every professor goes through during their journey to tenure

This approach amplifies the realism of not knowing whether issues that are spoken about will ultimately be overcome and enhances the validity of their experiences by not biasing the contributions towards those who expect success
