Brainmedia Flora Lysen,2022-07-28 Will we ever be able to see the brain at work Could it be possible to observe thinking and feeling as if watching a live broadcast from within the human head Brainmedia uncovers past and present examples of scientists and science educators who conceptualize and demonstrate the active human brain guided by new media technologies from exhibitions of giant illuminated brain models and staged projections of brainwave recordings to live televised brain broadcasts brains hooked up to computers and experiments with brain to brain synchronization Drawing on archival material

Brainmedia outlines a new history of live brains arguing that practices of and ideas about mediation impacted the imagination of seeing the brain at work By combining accounts of scientists examining brains in laboratories with examples of public demonstrations and exhibitions of brain research Brainmedia casts new light on popularization practices placing them at the heart of scientific work *Sensational Subjects* John Jervis, 2015-01-29 This book is available as open access through the Bloomsbury Open Access programme and is available on www.bloomsburycollections.com Under what conditions does sensation become sensational In the early nineteenth century murder was a staple of the sensationalizing popular press and gruesome descriptions were deployed to make a direct impact on the sensations of the reader By the end of the century public concern with the thrills spills and shocks of modern life was increasingly articulated in the language of sensation Media sensationalism contributed to this process and magnified its impact just as sensation was in turn taken up by literature art and film In the contemporary world the dramatization of these experiences in an era of media panics over terrorism and paedophilia has taken an overtly melodramatic form in which battles of good and evil play out across the landscapes of our lives *Sensational Subjects* develops an innovative interdisciplinary approach to exploring these themes their impact and their implications for understanding the modern world A companion volume *Sympathetic Sentiments Affect Emotion and Spectacle in the Modern World* is published simultaneously by Bloomsbury **Twenty Years on** Renate Rechtien, Dennis Tate, 2011 Twenty years on from the dramatic events that led to the opening of the Berlin Wall and the collapse of the GDR the subjective dimension of German unification is still far from complete The nature of the East German state remains a matter of cultural as well as political debate This volume of new research focuses on competing memories of the GDR and the ways they have evolved in the mass media literature and film since 1989/90 Taking as its point of departure the impact of iconic visual images of the fall of the Wall on our understanding of the historical GDR the volume first considers the decade of cultural conflict that followed unification and then the emergence of a more complex and diverse textual memory of the GDR since the Berlin Republic was established in 1999 It highlights competing generational perspectives on the GDR era and the unexpected afterlife of the GDR in recent publications The volume as a whole shows the vitality of eastern German culture two decades after the demise of the GDR and the centrality of these memory debates to the success of Germany's unification process *The Pragmatics of Literary Testimony* Chantelle Warner, 2013 In this book Warner examines a number of German language literary autobiographies that are connected to diverse social movements of the last forty years These books have all received critical attention from the popular press topped bestseller lists and have been pivotal in discussions of authenticity subjectivity and referentiality Because of the thematic diversity of these works scholars within literary and cultural studies have tended to treat them separately under topical categories such as women's literature the post war generation migration and multiculturalism etc Underlying Warner's analysis is the belief that the social construction of autobiographical acts is as much a matter of textuality as it is of topicality i.e. how language means rather than what it means and that a pragmatic

stylistic approach is well suited to describing how literary autobiographies come to function as testimonies to certain collective experiences By presenting a model for an integrative stylistics approach *The Pragmatics of Literary Testimony* participates in current discussions within fields of literary linguistic scholarship as well as autobiographical theory In its analysis of key examples of German social testimonies from the late twentieth century this book incorporates insights from discourse analysis pragmatics cognitive poetics and sociolinguistics in order to demonstrate that this diverse body of works constitutes a particular form of textual practice defined by what the author calls authenticity effects feelings of realism immediacy exemplarity genuineness and social relevance Such a study of authenticity as a poetic effect can help us to better understand the testimonial glamour owned by various types of autobiographical narration

The Nicest Kids in Town Matthew F. Delmont, 2012-02-22 American Bandstand one of the most popular television shows ever broadcast from Philadelphia in the late fifties a time when that city had become a battleground for civil rights Counter to host Dick Clark's claims that he integrated American Bandstand this book reveals how the first national television program directed at teens discriminated against black youth during its early years and how black teens and civil rights advocates protested this discrimination Matthew F. Delmont brings together major themes in American history civil rights rock and roll television and the emergence of a youth culture as he tells how white families around American Bandstand's studio mobilized to maintain all white neighborhoods and how local school officials reinforced segregation long after Brown vs Board of Education The Nicest Kids in Town powerfully illustrates how national issues and history have their roots in local situations and how nostalgic representations of the past like the musical film Hairspray based on the American Bandstand era can work as impediments to progress in the present

Until recently it was associated primarily with broadcast media and television in particular. However the emergence of social media has brought new forms of liveness into effect. These forms challenge common assumptions about and perspectives on liveness provoking a revisiting of the concept. In this book Karin van Es develops a comprehensive understanding of liveness today and clarifies the stakes surrounding the category of the live. She argues that liveness is the product of a dynamic interaction between media institutions technologies and users. In doing so she challenges earlier conceptions of the notion which tended to focus on either one of these contributors to its construction. By analyzing the live in four different cases a live streaming platform an online music collaboration website an example of social TV and a social networking site van Es explores the operation of the category and pinpoints the conditions under which it comes into being. The analysis is the starting point for a broader reflection on the relation between broadcast and social media. *Opening The X-Files* Darren Mooney, 2017-09-13 More than 20 years after it was first broadcast *The X-Files* still holds the public imagination. Over nine seasons and two feature films agents Mulder and Scully pursued monsters aliens mutants and shadowy conspirators across the American landscape. Running for more than 200 episodes the series transformed television crafting a postmodern mythology that spoke to the anxieties and uncertainties of the end of the 20th century. Covering the entire series from its debut through the second feature film this book examines how creator Chris Carter and his team of writers turned a scrappy cult favorite on Fox into a global phenomenon. *Grand Designs* Aneta Podkalicka, Esther Milne, Jenny Kennedy, 2018-11-28 This is the first academic book to examine the long running hit series *Grand Designs* which occupies a significant place in the popular imagination internationally. The authors apply an empirically grounded critical perspective to the study of television to reveal how people use the program in their everyday lives. The emphasis on everyday uses and meanings combines creatively with understanding the program theoretically textually and in terms of its production structures. This position challenges framings of the popular lifestyle and factual television genre that has been dominated by a neoliberal or governmentality perspective for many years. Presented by British designer and writer Kevin McCloud *Grand Designs* follows the progress of home owners

as they embark on design renovation and building projects at almost always dizzying scales of endeavour Understanding the program as both a text to analyse and a site of material impact the book draws on interviews with production members home renovators building practitioners and audiences as well as references to associated media formats to provide contextual depth to the analysis The authors argue that as a cultural object the program is both shaped by and enacts social discourses of home making design value and taste Navigating public commercial and promotional logics Grand Designs sparks new forms of cultural production and consumer markets
