Realms Of The Human Unconscious Observations From Lsd Research:

Realms of the Human Unconscious Stanislav Grof, 1975 Records research studies and case histories of LSD sessions and experiences describing the types dynamics and scopes of LSD induced visions and extensions and their psychiatric and psychological implications Bibliography **Realms of the Human Unconscious : Observations from Lsd Research S.**

Grof, 1979 **A Mental Ethnography: Conclusions from Research in LSD** Niccolo Caldararo, 2023-02-20 There has recently been a renewed interest in both casual use of psychedelics as well as experimental use and attempts to discover therapeutic value There is an effort to recapture the achievements and failures of past work to guide present use This book is based around material derived from unpublished scientific research from Dr Robert Mogar's laboratory and built upon by forty years of field research by the author The author Niccolo Caldararo participated in a number of studies of perception including sensory deprivation and psychotropic drugs some of recent manufacture or discovery and some of primitive or traditional societies He places this analysis of the physiological aspects of hallucinations delusions visions and dreams in context through an as well as cross cultural data on dreams dreaming and drug use and the social value of hallucinations dreams and visions The book reviews ethnographic literature in this area and contributes to a comprehensive evaluation of past work done in this area The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of

the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that we've all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldn't normally do Does subliminal advertising influence us to buy products Are our memories stored indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves **Primordial Psyche: a Reliving of the Soul of Ancestors**

Diego Pignatelli Spinazzola, 2011-03-23 *Primordial Psyche* iUniverse 2011 introduces innovative perspectives to the etiology of personality disorders and their connection with the unconscious phenomena tribal rituals in pre ancestral religions magical thinking and animistic thought visionary revelations in ancient worldviews reviewed from an archetypal perspective as reorganization of the archaic depth of the psyche in psychosis This Jungian synthesis by Diego Pignatelli introduces a new positive evolutionary theory of borderline psychosis the relationship between the creative individual and the society creativity as well as the Hero archetype and the archetype of meaning the methods and avenues of cutting edge explorations of transpersonal psychology to primordial psyche and shamanic experiences for healing insight and growth including holotropic therapy and consciousness research and some difference with Jungian therapy in coping with the archetypal experiences through a revaluation of Jungian thought and analytical psychology

Beyond the Brain Stanislav Grof, 1985-08-01 *Beyond the Brain* seriously challenges the existing neurophysiological models of the brain After three decades of extensive research on those non ordinary states of consciousness induced by psychedelic drugs and by other means Grof concludes that our present scientific world view is as inadequate as many of its historical predecessors In this pioneering work he proposes a new model of the human psyche that takes account of his findings Grof includes in his model the recollective level or the reliving of emotionally relevant memories a level at which the Freudian framework can be useful Beyond that is perinatal level in which the human unconscious may be activated to a reliving of biological birth and confrontation with death How birth experience influences an individual s later development is a central focus of the book The most serious challenge to contemporary psycho analytic theory comes from a delineation of the transpersonal level or the expansion of consciousness beyond the boundaries of time and space Grof makes a bold argument that understanding of the perinatal and transpersonal levels changes much of how we view both mental illness and mental health His reinterpretation of some of the most agonizing aspects of human behavior proves thought provoking for both laypersons and professional therapists
