Krimins,2020-11-25

Learning from Disease in Pets A One Health Model for Discovery is the first encompassing reference guide for veterinarians researchers and physicians on conducting studies using spontaneous models of disease in animals The study of naturally occurring disease in pet animals can help model our understanding of the biology prevention and therapy of human and animal diseases Studies of pet dogs for instance can aid treatment of complex medical problems such as cancer orthopedic cardiopulmonary and neuro inflammatory diseases and zoonotic infections Each chapter within this novel cross species approach is contributed by a leader or leaders in their field of research Using clinical trials to learn how pets with real diseases respond to therapy can lead to breakthroughs in human medicine as well as benefiting pets suffering from otherwise debilitating illness Despite similarities of diseases across species there are very few spontaneous models of disease used in research compared with models where disease is induced in healthy laboratory animals Many medical researchers and veterinarians have a multitude of questions regarding how to use naturally occurring diseases in pets for the discovery of

treatments and diagnostics this book will demonstrate how to safely make this happen This book encourages veterinarians to build on and disseminate existing findings for the wider benefit of pets and humans Many pets suffering from incurable illnesses may benefit from clinical trials the book includes a section on the imperative communication styles necessary within the research environment and with clients a compelling discussion on the ethics of using pets in veterinary clinical research comprehensive tables of diseases that spontaneously occur in animals and humans the regulatory requirements necessary to move therapy from benchside research to patient bedside as well as intricate details on how to design a robust clinical study
