The Transcendent Adventure Robert Reilly, 1985-01-24

Religion in Science Fiction Steven Hrotic, 2014-07-31 Religion in Science Fiction investigates the history of the representations of religion in science fiction literature Space travel futuristic societies and non human cultures are traditional themes in science fiction Speculating on the societal impacts of as yet undiscovered technologies is after all one of the distinguishing characteristics of science fiction literature A more surprising theme may be a parallel exploration of religion its institutional nature social functions and the tensions between religious and scientific worldviews Steven Hrotic investigates the representations of religion in 19th century proto science fiction and genre science fiction from the 1920s through the end of the century Taken together he argues that these stories tell an overarching story a metanarrative of an evolving respect for religion paralleling a decline in the belief that science will lead us to an ideal and religion free future Science fiction's metanarrative represents more than simply a shift in popular perceptions of religion it also serves as a model for cognitive anthropology providing new insights into how groups and identities form in a globalized world and into how crucial a role narratives may play Ironically this same perspective suggests that science fiction as it was in the 20th century may no longer exist

Scientific Mythologies James A. Herrick,2008-01-01 What does science have to do with science fiction What does science fiction have to do with scientists What does religion have to do with science and science fiction In the spiritual vacuum of our post Christian West new mythologies continually arise The sources of much religious speculation however may be surprising Author James Herrick directs our attention to a wide range of scientists filmmakers science fiction writers and religious philosophers and discovers there the role that science and science fiction have played in such mythmaking From scientists such as Francis Bacon Francis Crick Carl Sagan and Freeman Dyson to filmmakers such as George Lucas and Steven Spielberg to science fiction writers such as Olaf Stapledon Sir Arthur C Clarke Robert Heinlein and Isaac Asimov Herrick finds a curious collusion of science with science fiction for promoting and justifying alternative spiritualities The rise of these new mythologies he argues is no longer a curiosity at the edge of Western culture This alchemy is catalyzing a religious vision of new gods a new humanity and alien races with superior intelligence and secret knowledge This new mythology overshadows the realms of politics science and religion Should we follow such visions Does science endorse these mythologies Are we being offered a spirituality superior to the Judeo Christian tradition This book will help you decide

What If? Mike Alsford,2000 Who am I Why am I here Where am I going What if Science fiction delights in asking old questions in new ways Rather than being primarily about advanced technology and the imagined future science fiction novels and films are more fundamentally about issues of human nature and destiny They provide a unique perspective on the same questions that have dominated theology and philosophy throughout history In this fascinating book Mike Alsford aims neither to give a history of science fiction nor to systematically identify specific religious motifs within the genre but to create an interdisciplinary exploratory space where we can engage with the primal themes in new ways Whether we are already well versed in science fiction or have had only the briefest encounters with Frankenstein s monster and Doctor Who this book will provide exciting insights into questions of identity the human condition our relationships and our destiny

Religious Science Fiction in Battlestar Galactica and Caprica Jutta Wimmeler,2015-09-08 Why did it seem strange when Battlestar Galactica ended its narrative on a religious note instead of providing a scientific explanation And what does this have to do with gender This book explores the connection between the triumph of religion and the dominance of femininity in Battlestar Galactica and its prequel series Caprica Both series breached science fiction s convention of representing the irrationality of femininity and religion Analyzing the connections and disconnections between women and men and theology and technology the author argues that the Battlestarverse depicts women as zones of contact between the seemingly contradictory spheres of science and religion by simultaneously employing and breaking gender stereotypes
